

Consultoria em Mobilidade Urbana e Planejamento Urbano

Especialista em soluções integradas com uso de dados espaciais, simulação de tráfego e políticas públicas urbanas.

WAGNER JALES
CONSULTORIA E PROJETOS

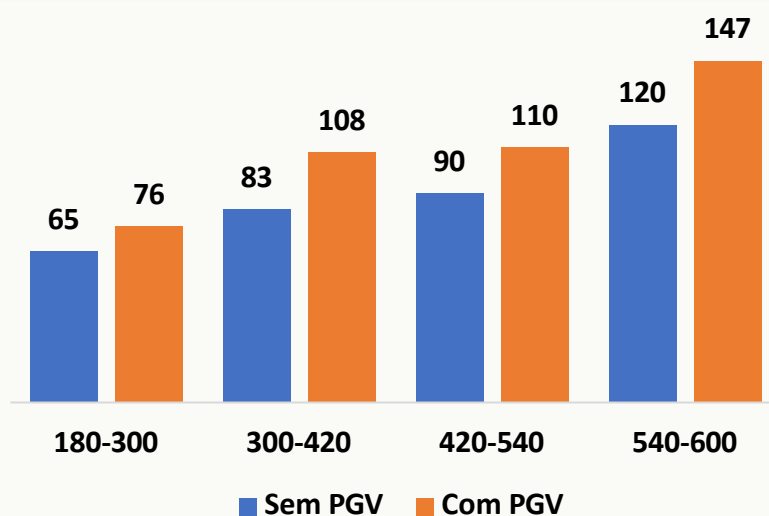

www.wagnerjales.com.br

The background of the slide is a faded, light gray aerial photograph of a city. It shows a dense network of streets, some green spaces, and a body of water on the right side. The image is semi-transparent, allowing the dark blue text box to stand out.

Microsimulação usando PTV VISSIM

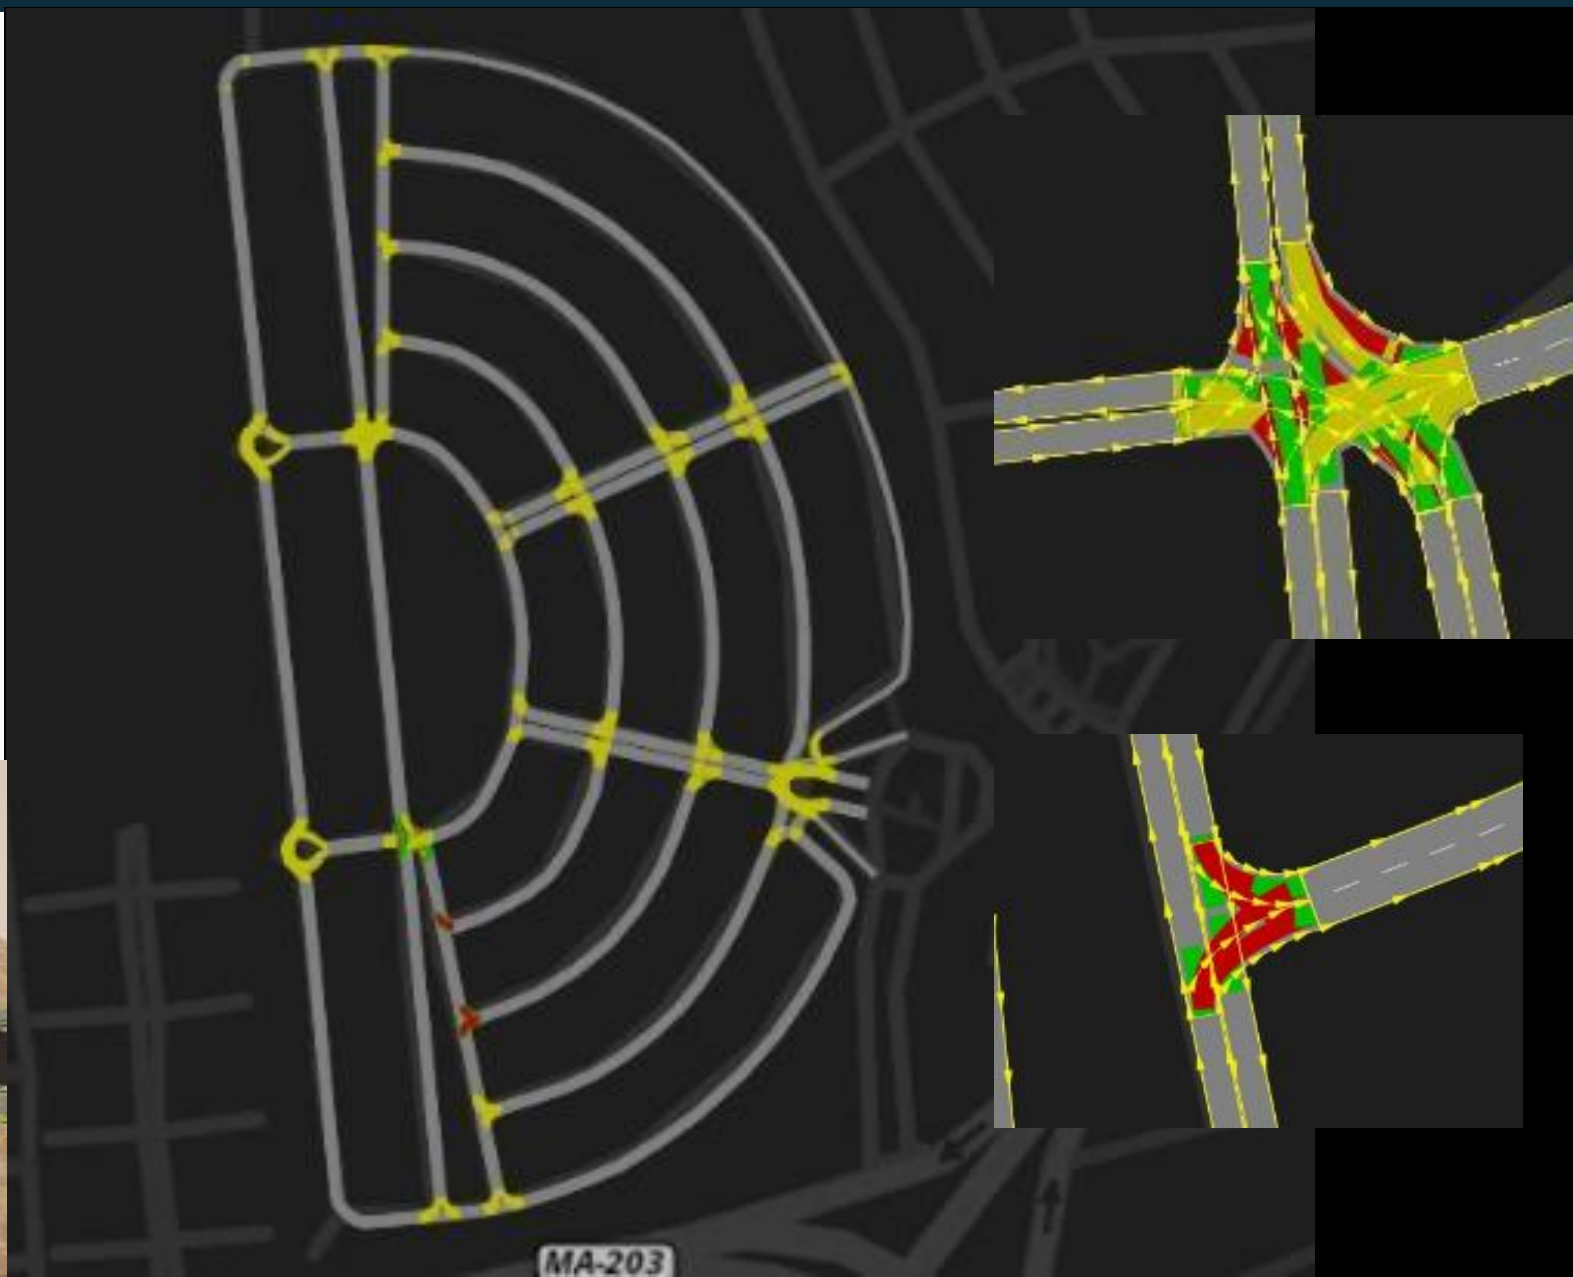

Polo Gerador de Viagens

Análise de impacto de Polo Gerador de Viagem simulando o crescimento de 300 veículos/hora. São Luís-MA (2022).

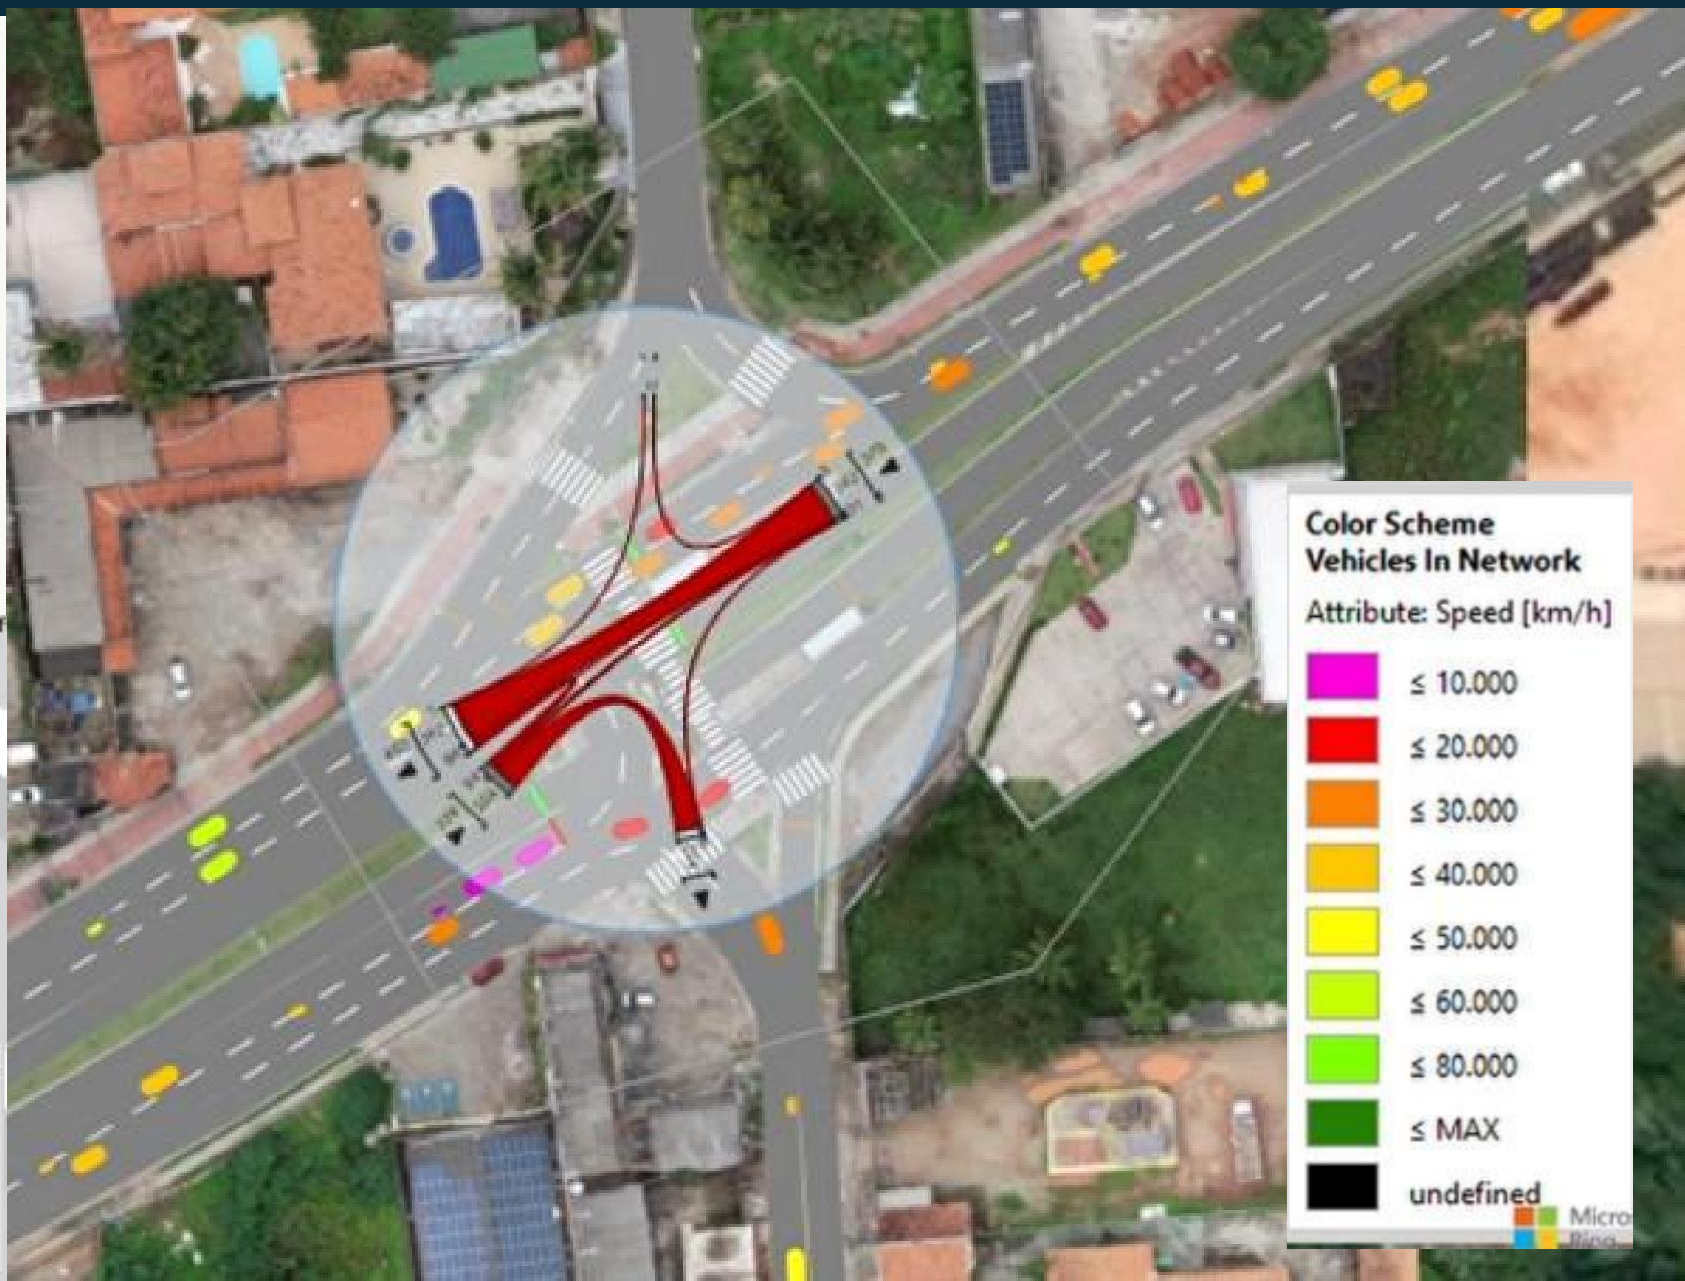

Segurança Viária

Projeto para implantação de “Medidas moderadoras de tráfego” como forma de reduzir as ocorrências de acidentes em condomínio de alto padrão. Paço do Lumiar-MA (2021).

Análise cruzamento

Simulação de tráfego como ferramenta para construção de cenários de intervenção viária.
São Luís-MA (2023).

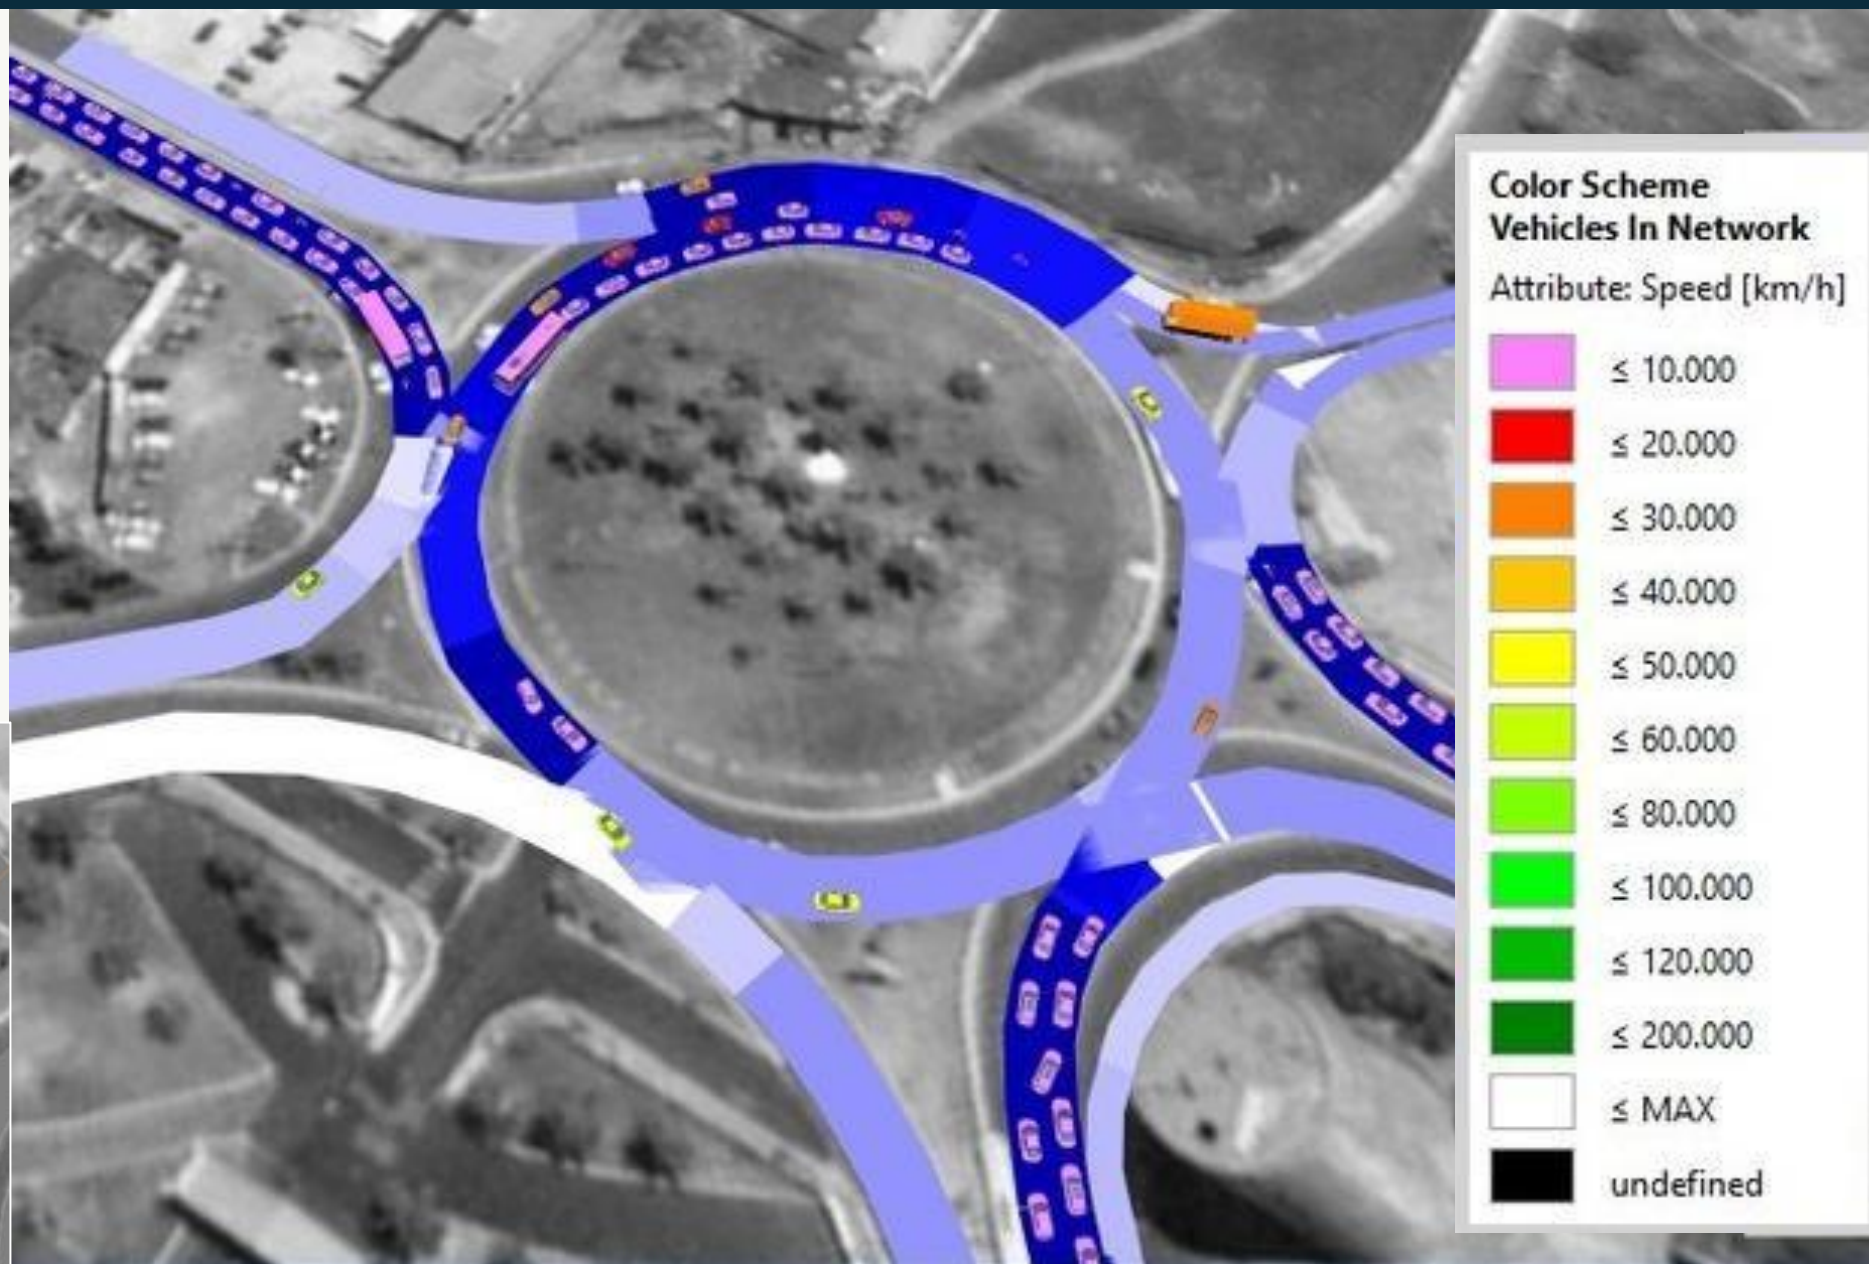

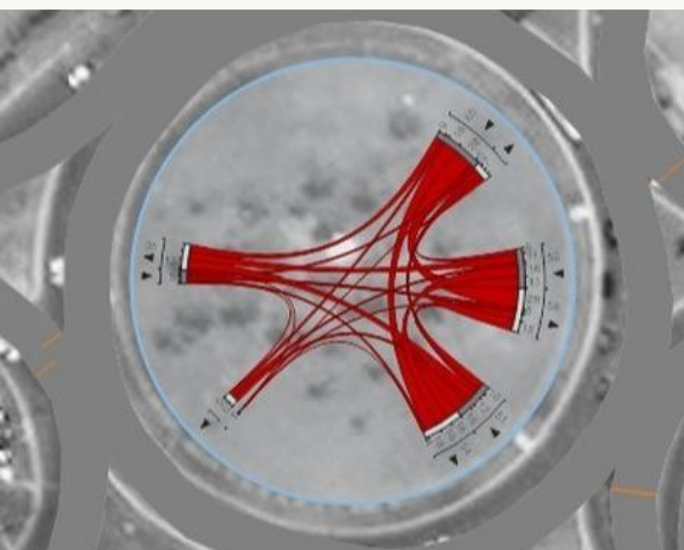

Cenários de intervenção

Criação de cenários de uma intervenção viária considerando 3 alternativas e considerando incremento do volume de veículos ao longo dos anos. São Luís-MA (2023).

Cenários de intervenção

Análise de circulação em rotatória – São Luís/MA

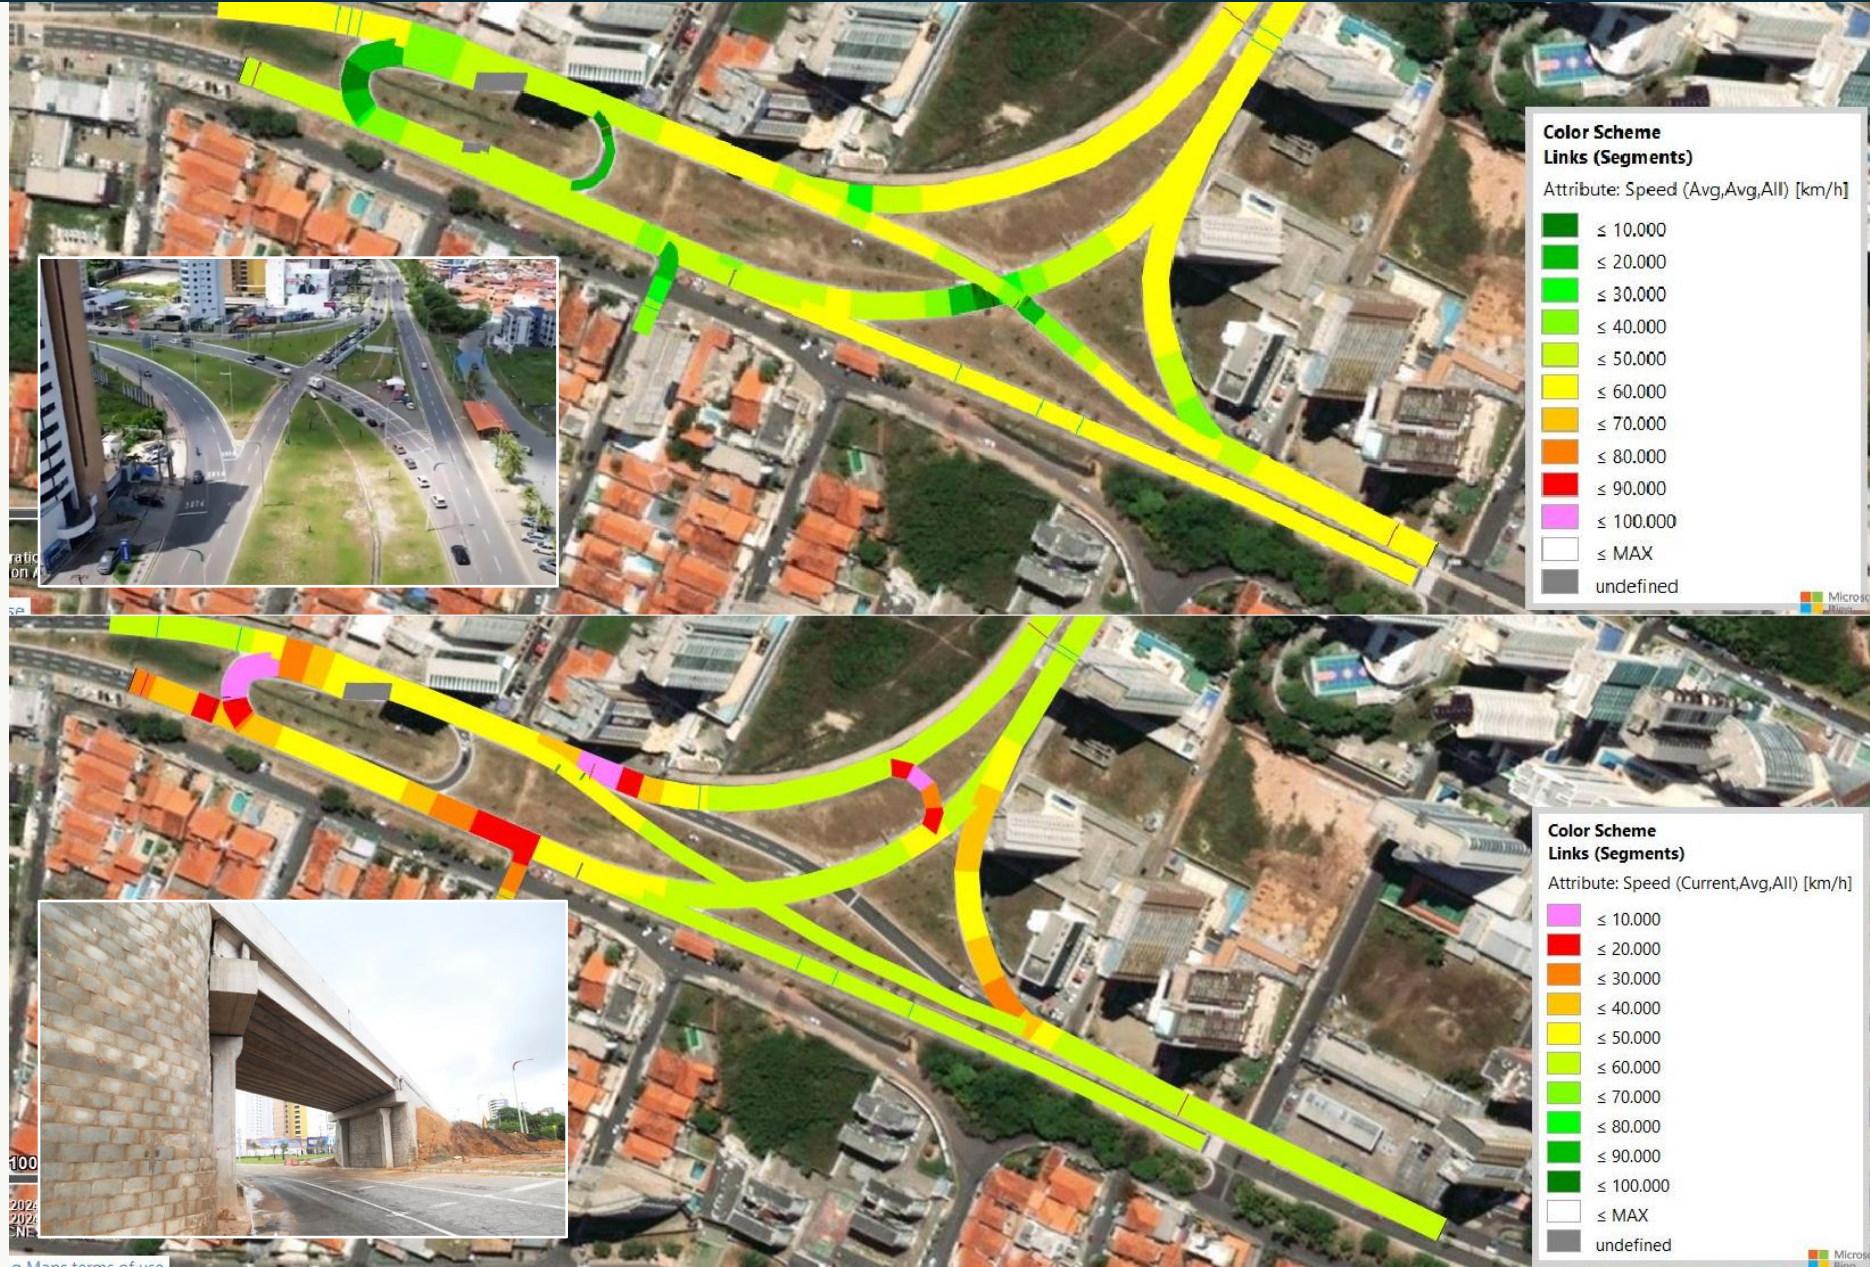

Simulação impacto de intervenção na circulação de pedestres

Simulando o impacto de
um stand de vendas
implantado na
circulação de pedestres
em uma alameda dentro
de um área tombada
pelo patrimônio

Impacto de uma elevatória

Análise territorial usando Sintaxe Espacial

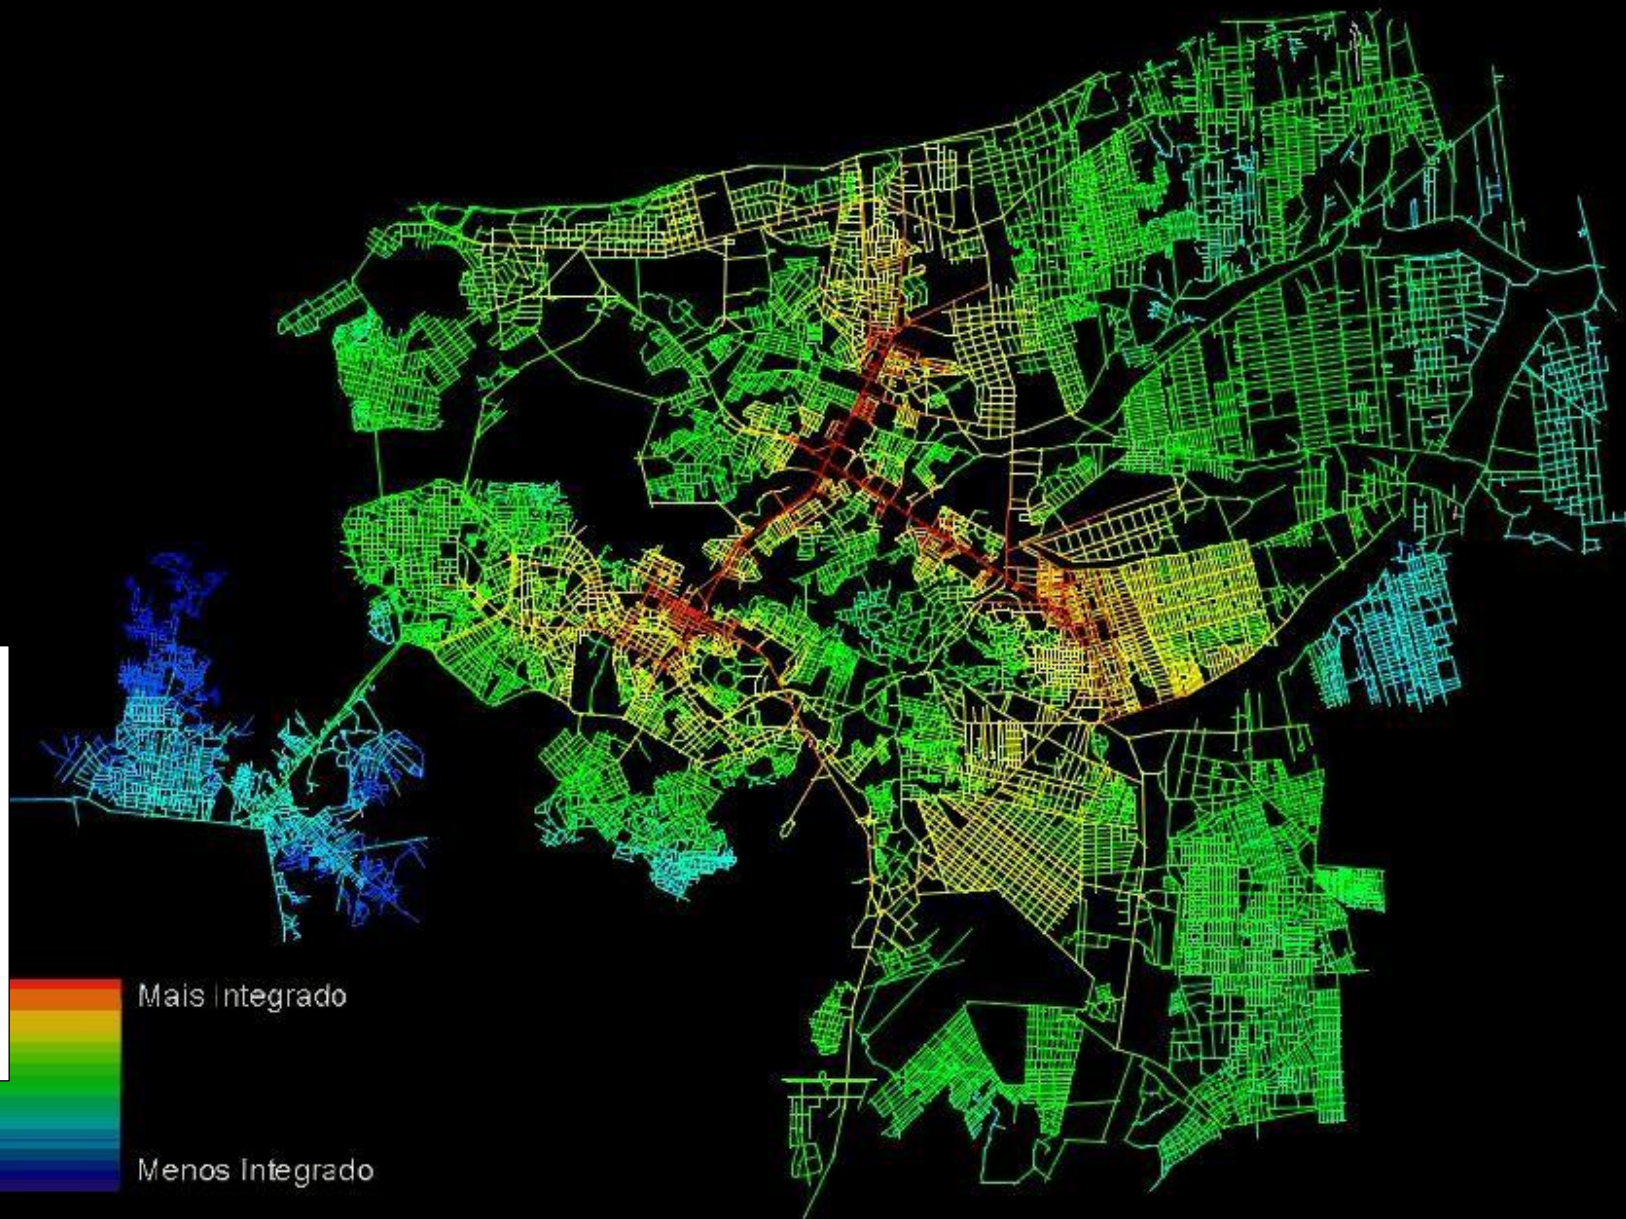

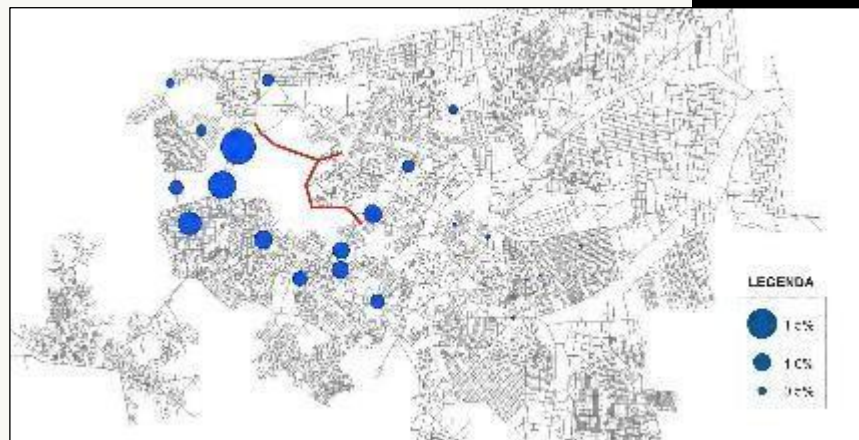

Macrossimulação

Método de baixo custo
para macrossimulação de
tráfego em áreas urbanas
usando morfologia.
Fortaleza-CE (2012)

Impacto Viário

Análise do impacto urbano de uma intervenção viária em São Luís-MA (2014)

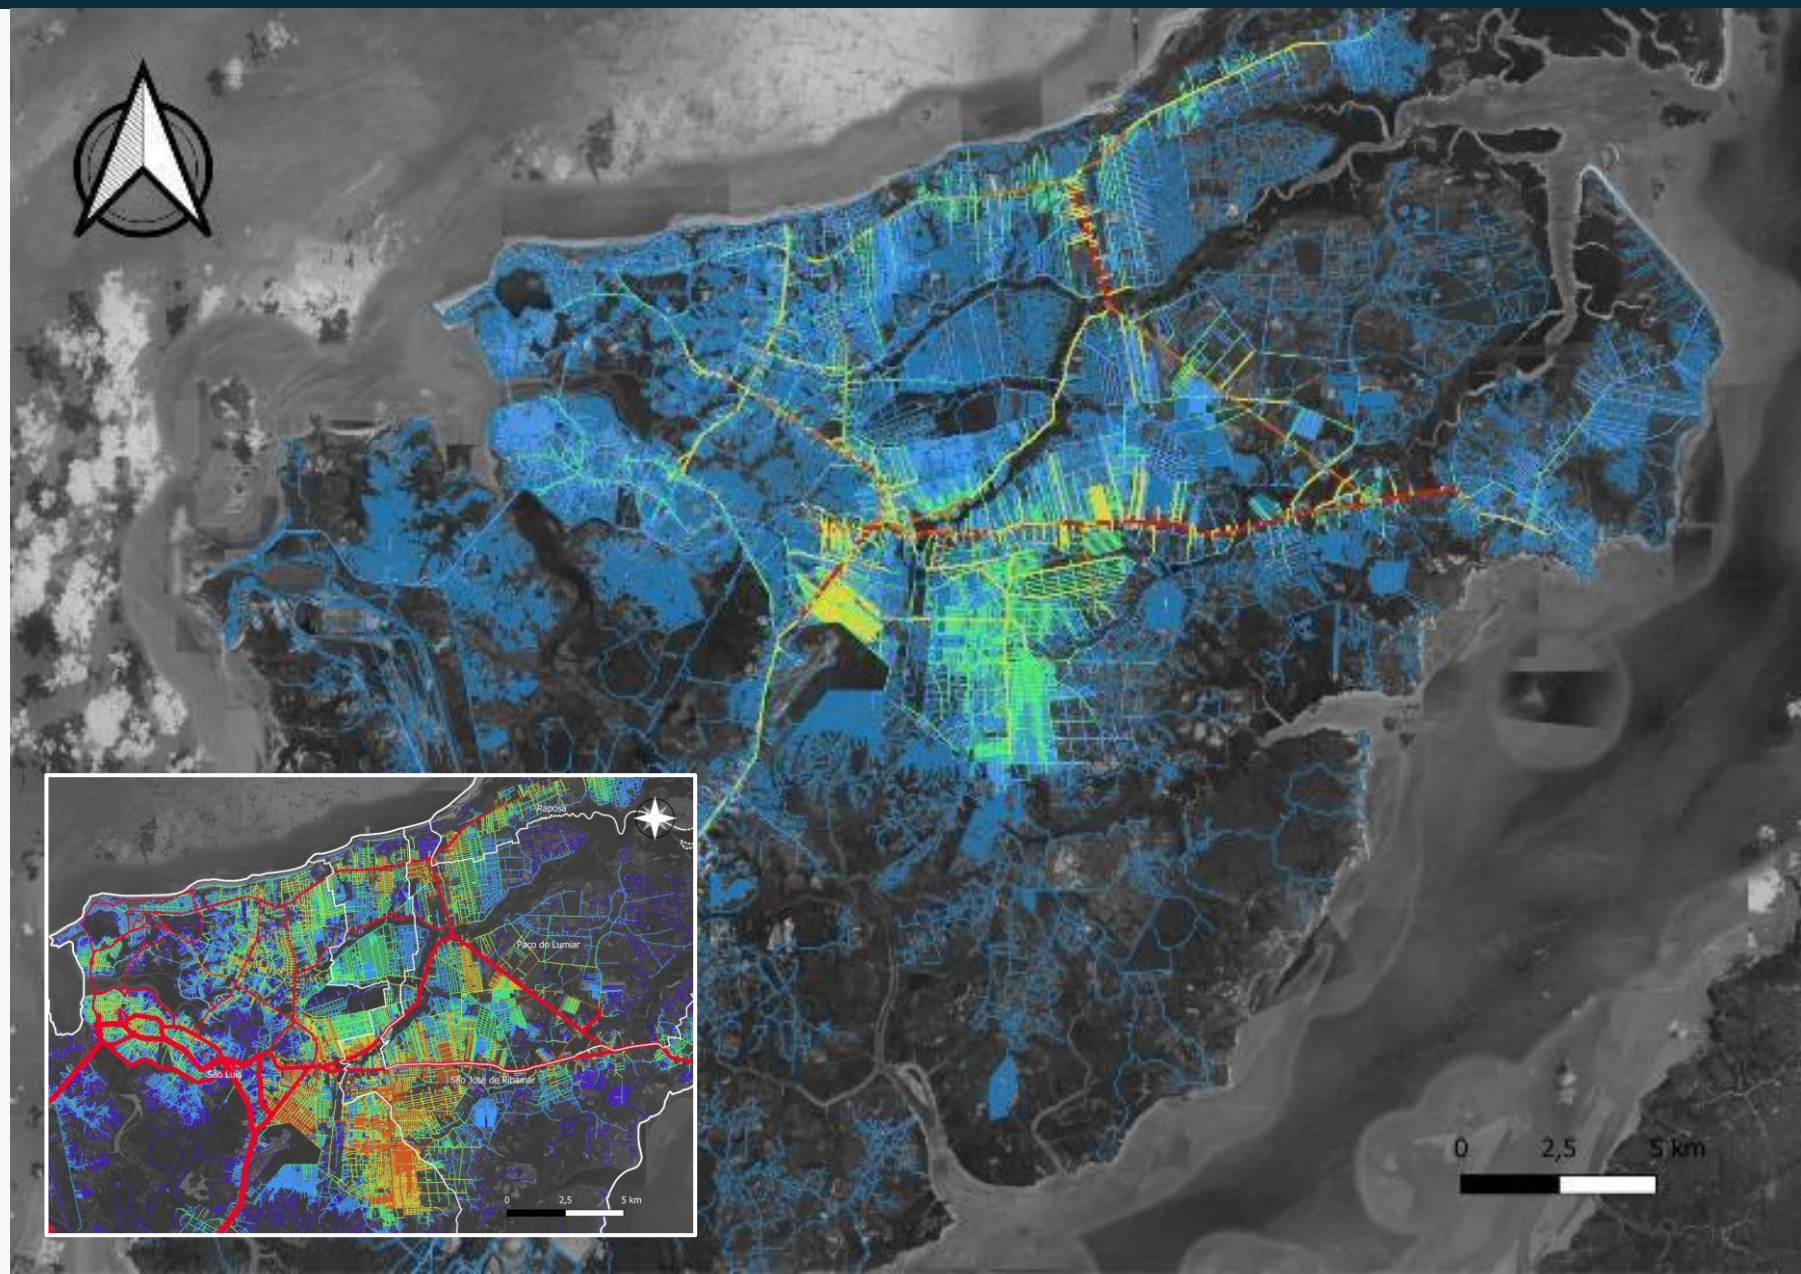

Estudo em áreas históricas

Análise do impacto de uma importante rua de comércio no Centro Histórico de São Luís-MA, através da morfologia urbana e uso do solo(2022).

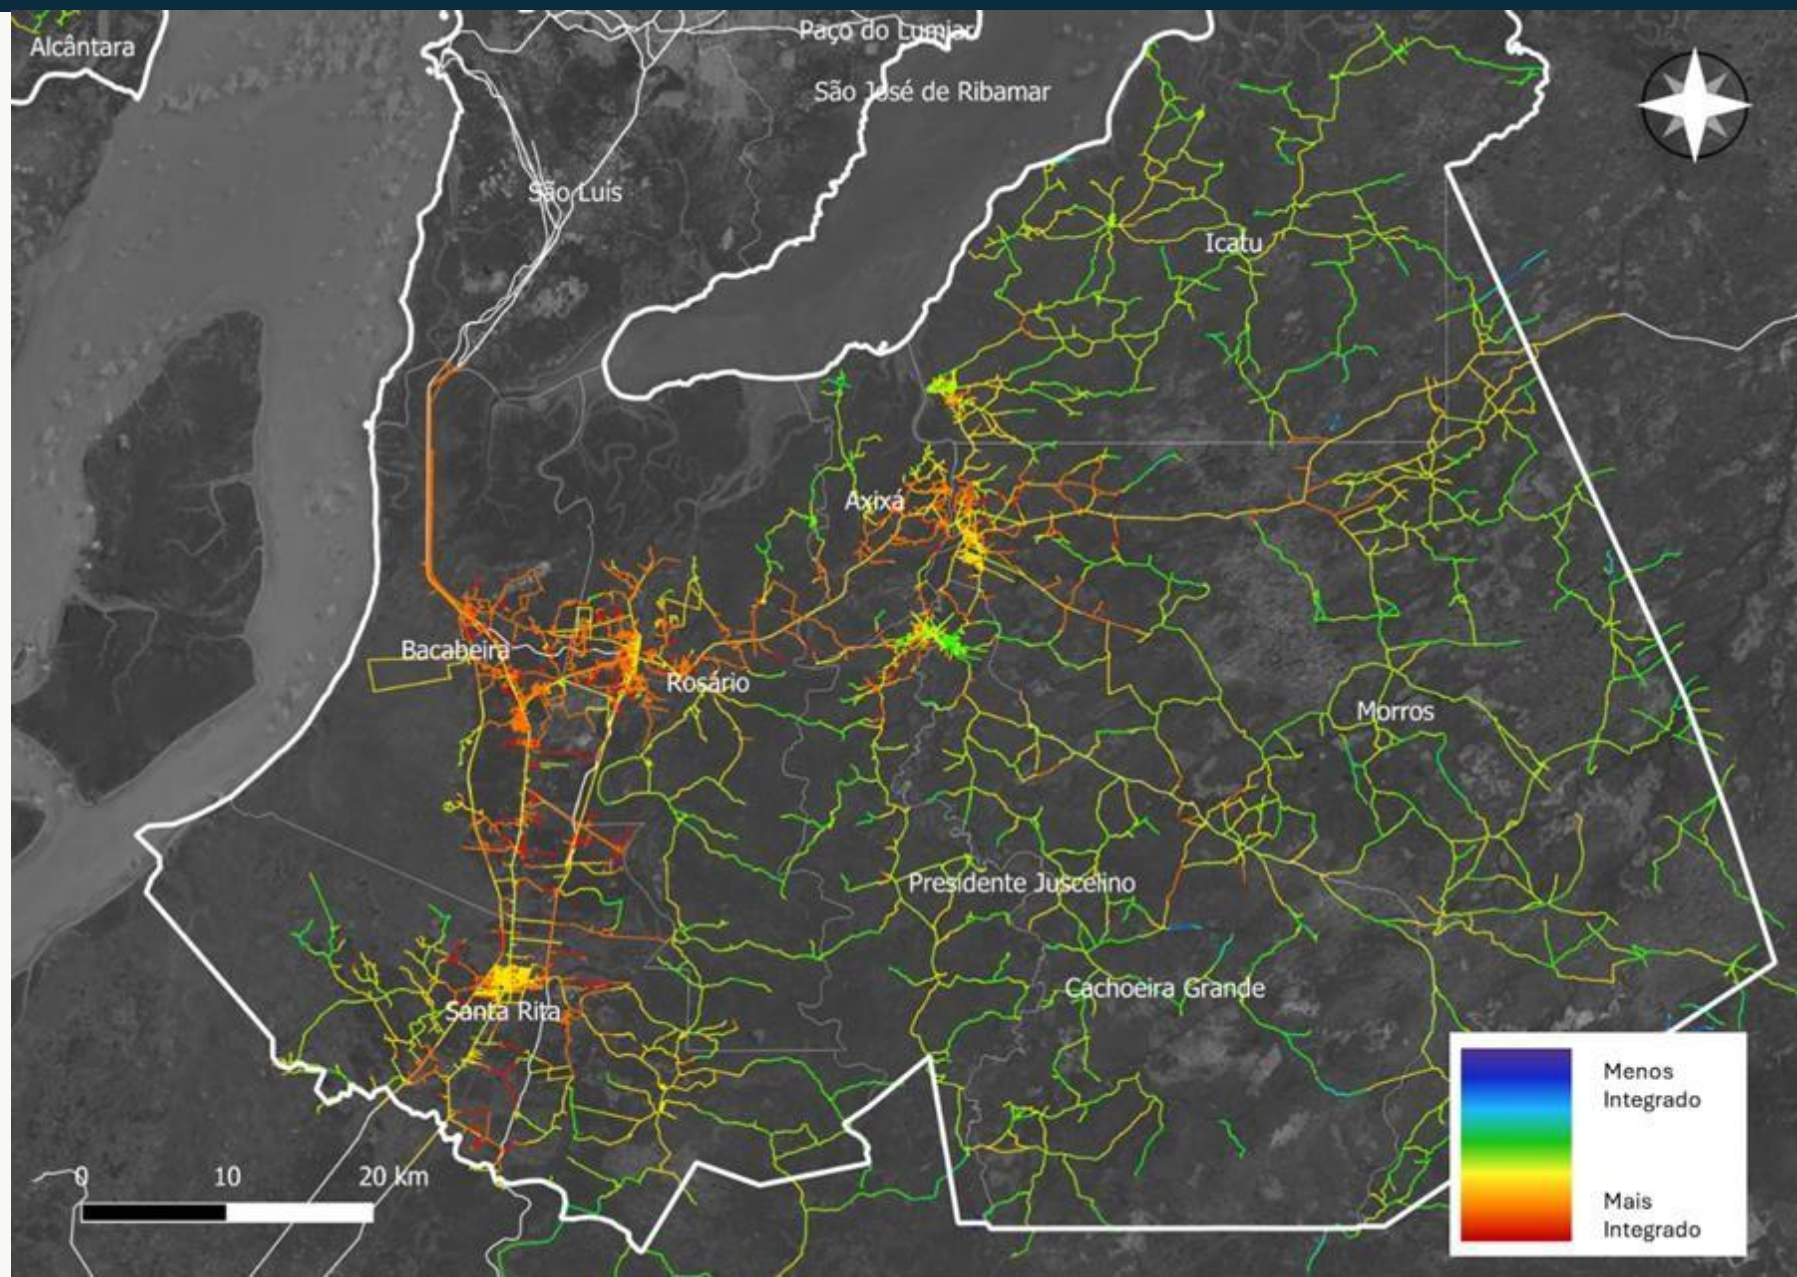

Análise viária Região Metropolitana – São Luís

Utilização de ferramentas SIG e Space Syntax para analisar, de forma integrada, o sistema viário de toda ilha de São Luís.

Análise viária Região Metropolitana – Continente

Utilização de ferramentas SIG e Space Syntax para analisar, de forma integrada, o sistema viário dos municípios da RMGSL que estão no continente.

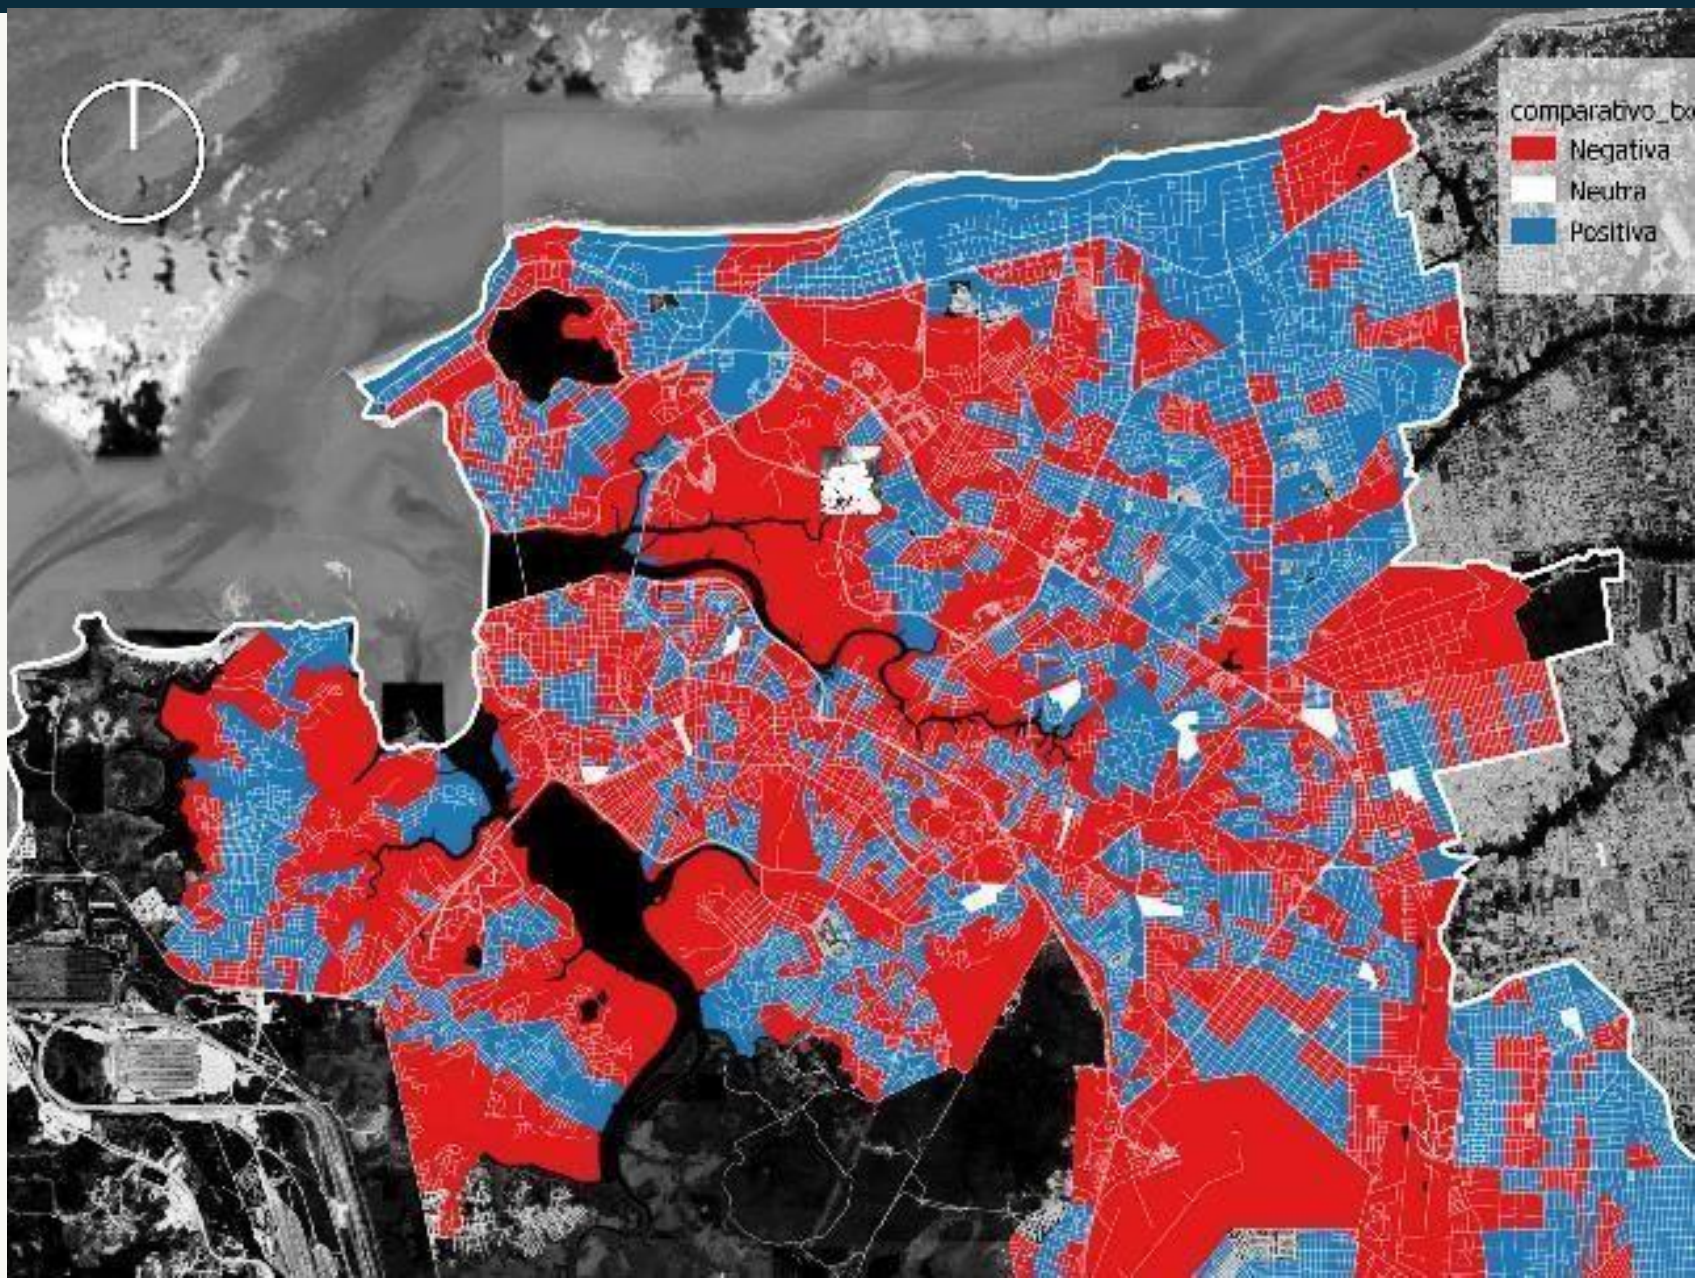

The background of the slide is a faded, light-colored aerial photograph of a coastal urban area. It shows a complex network of streets, buildings, and a large body of water on the right side. The map is oriented horizontally, with the coastline running from the top left towards the bottom right.

Geoprocessamento

Simulação evolução urbana

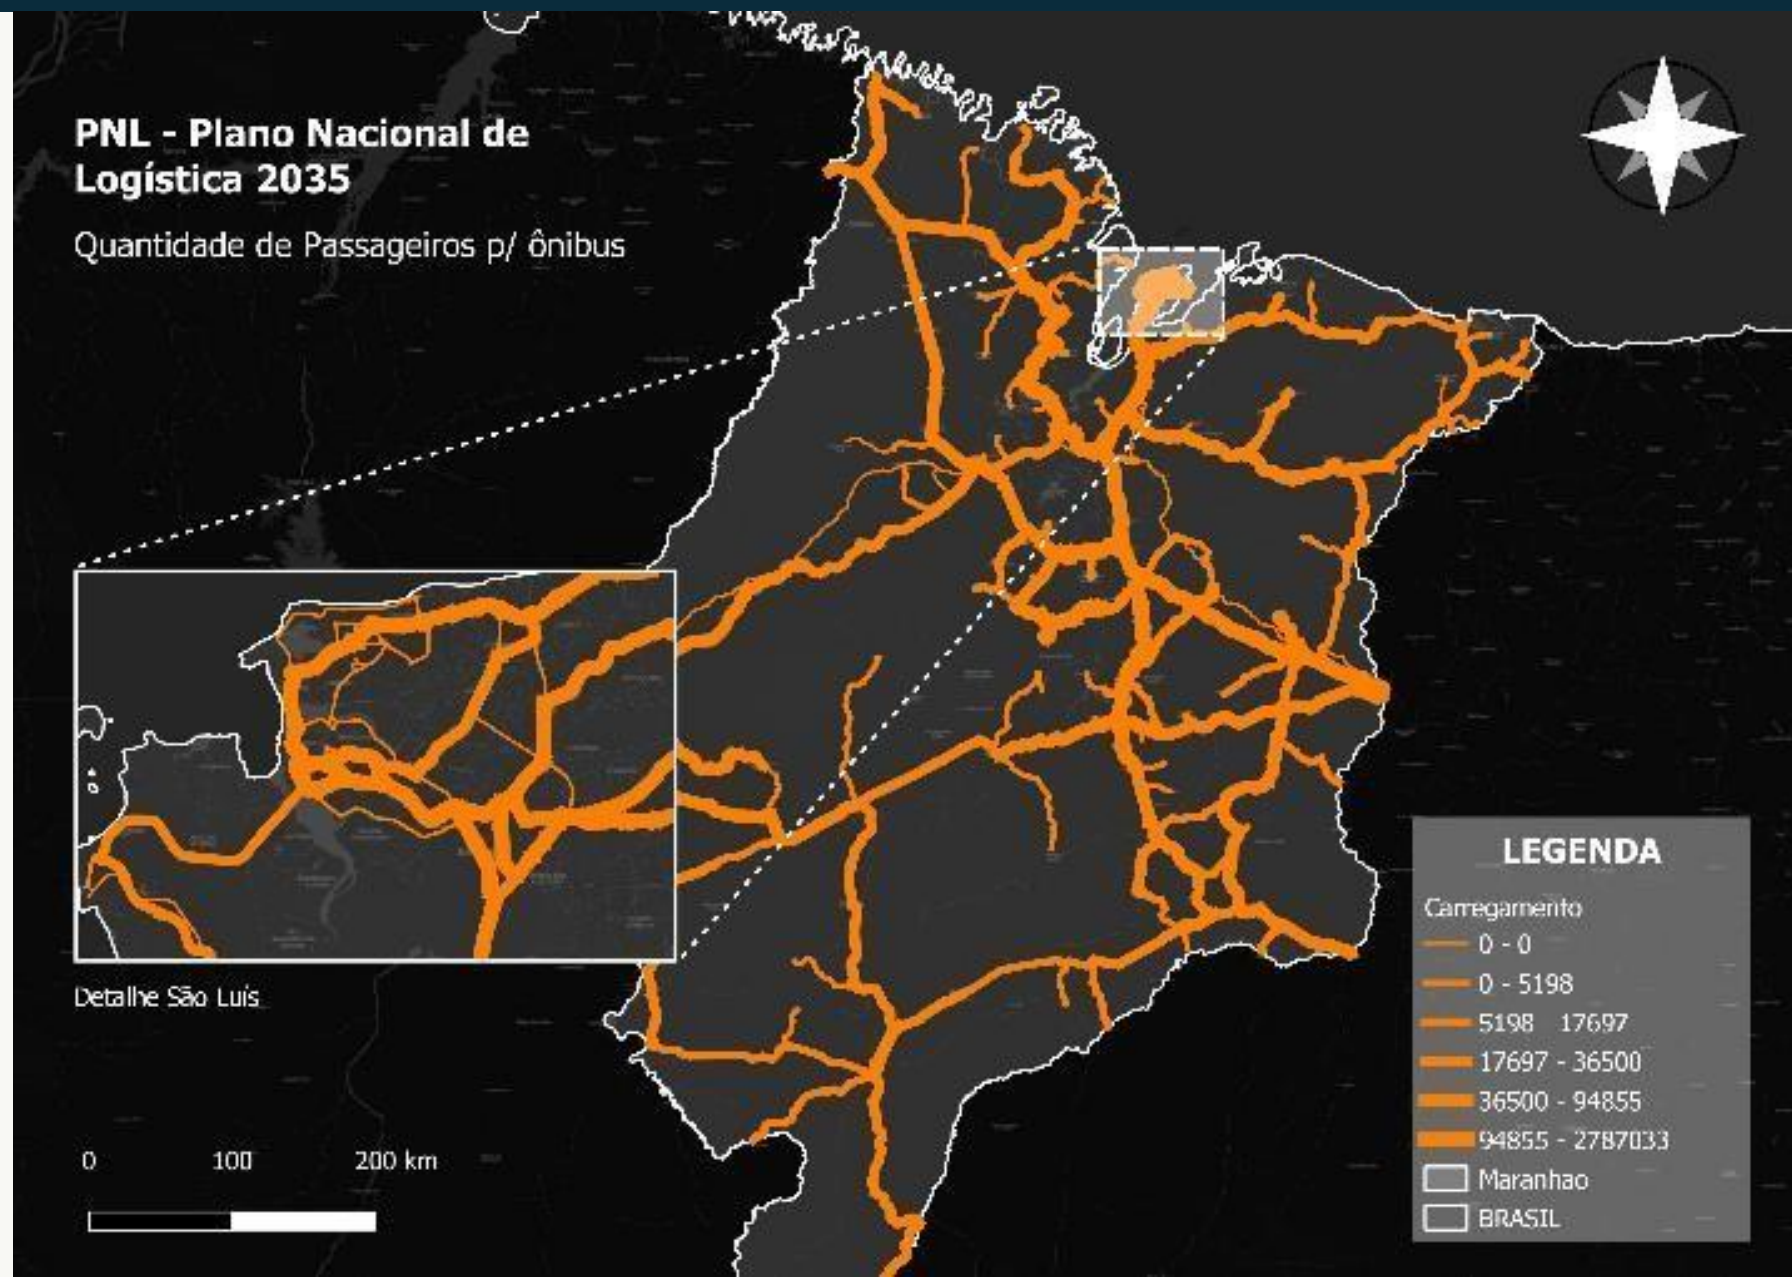

Utilização de Sistema de Informações Geográficas para representar simulação de crescimento urbano.
São Luís-MA (2023).

Densidade Setor Censitário

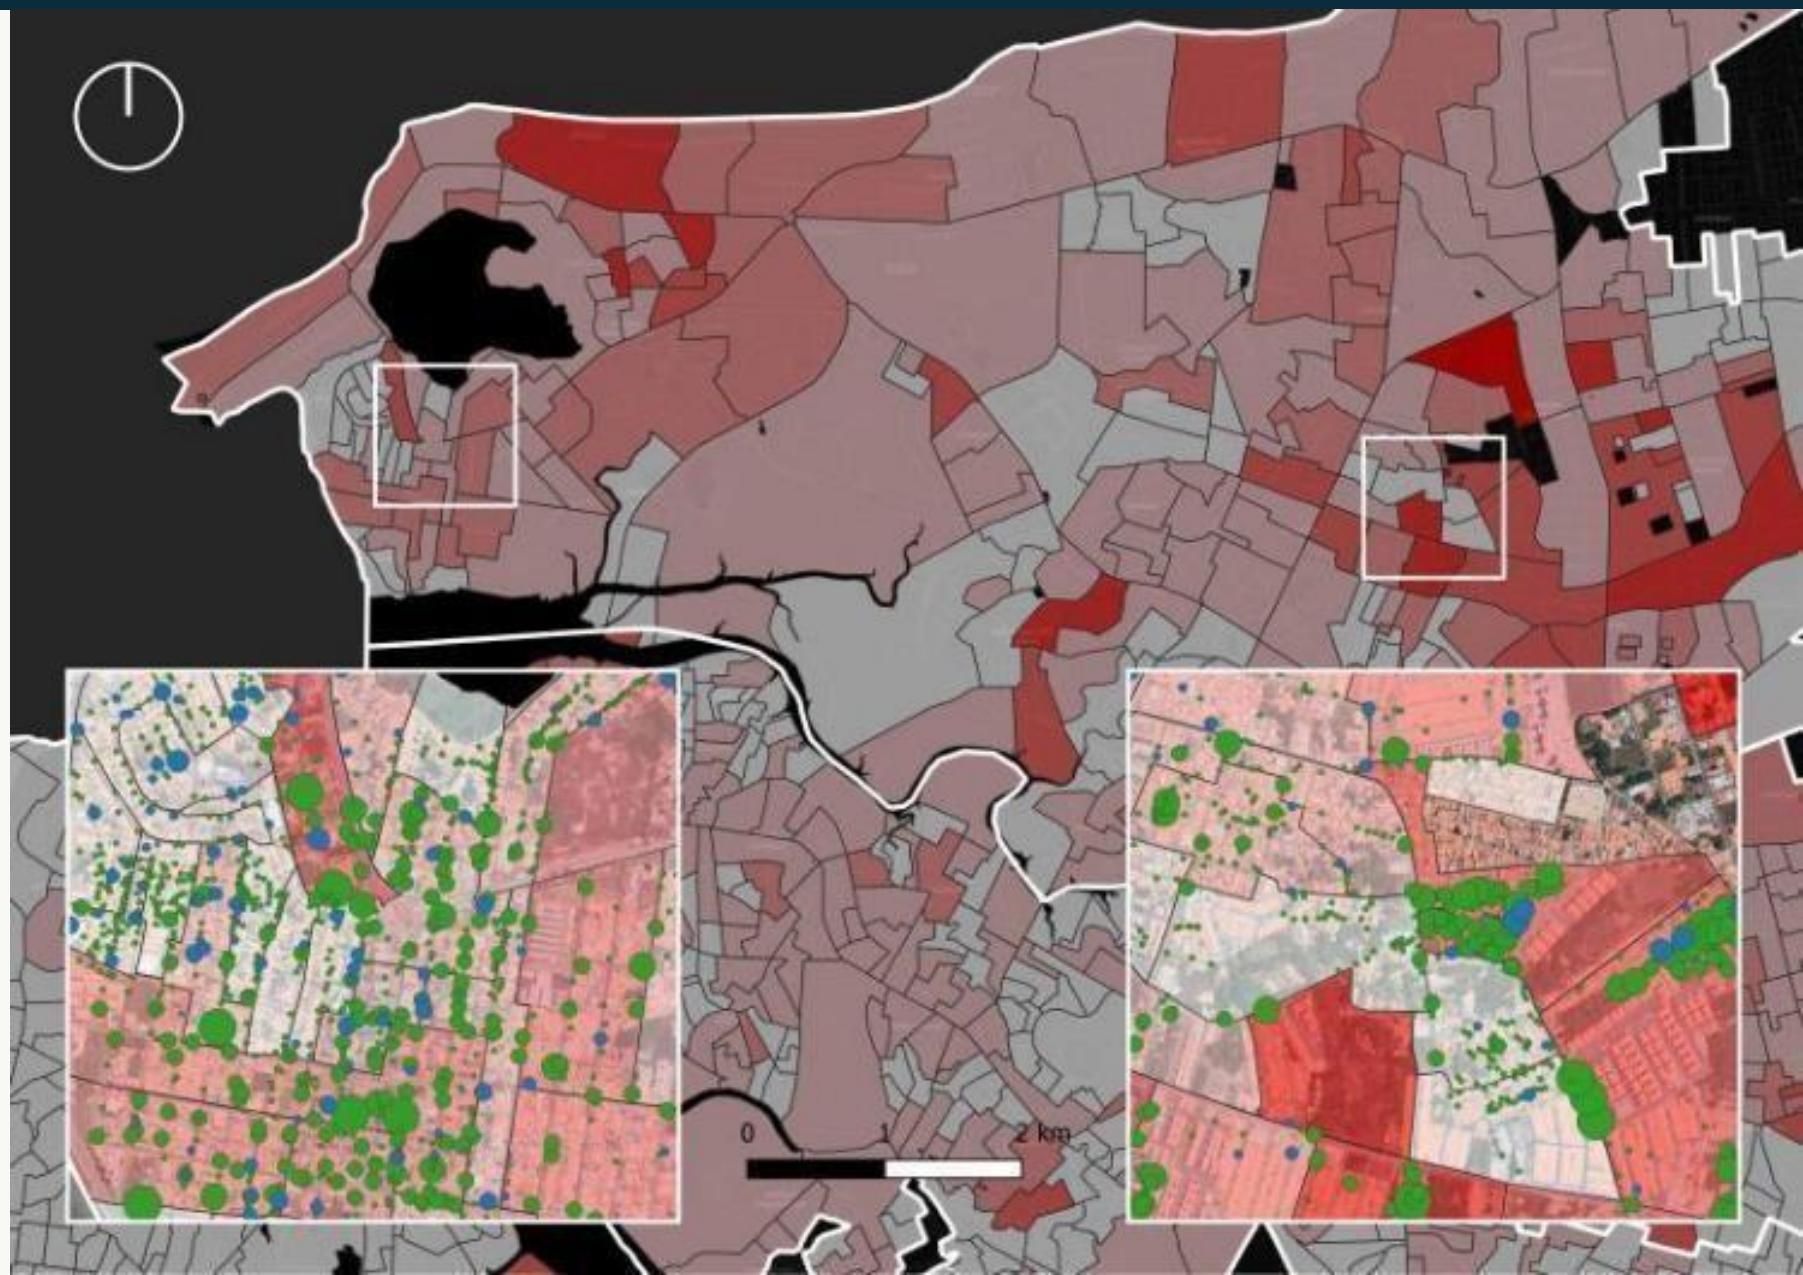

Carregamento Viário SIG

Representação carregamento viário transporte rodovias do Maranhão. Cargas e Pessoas. MA (2023).

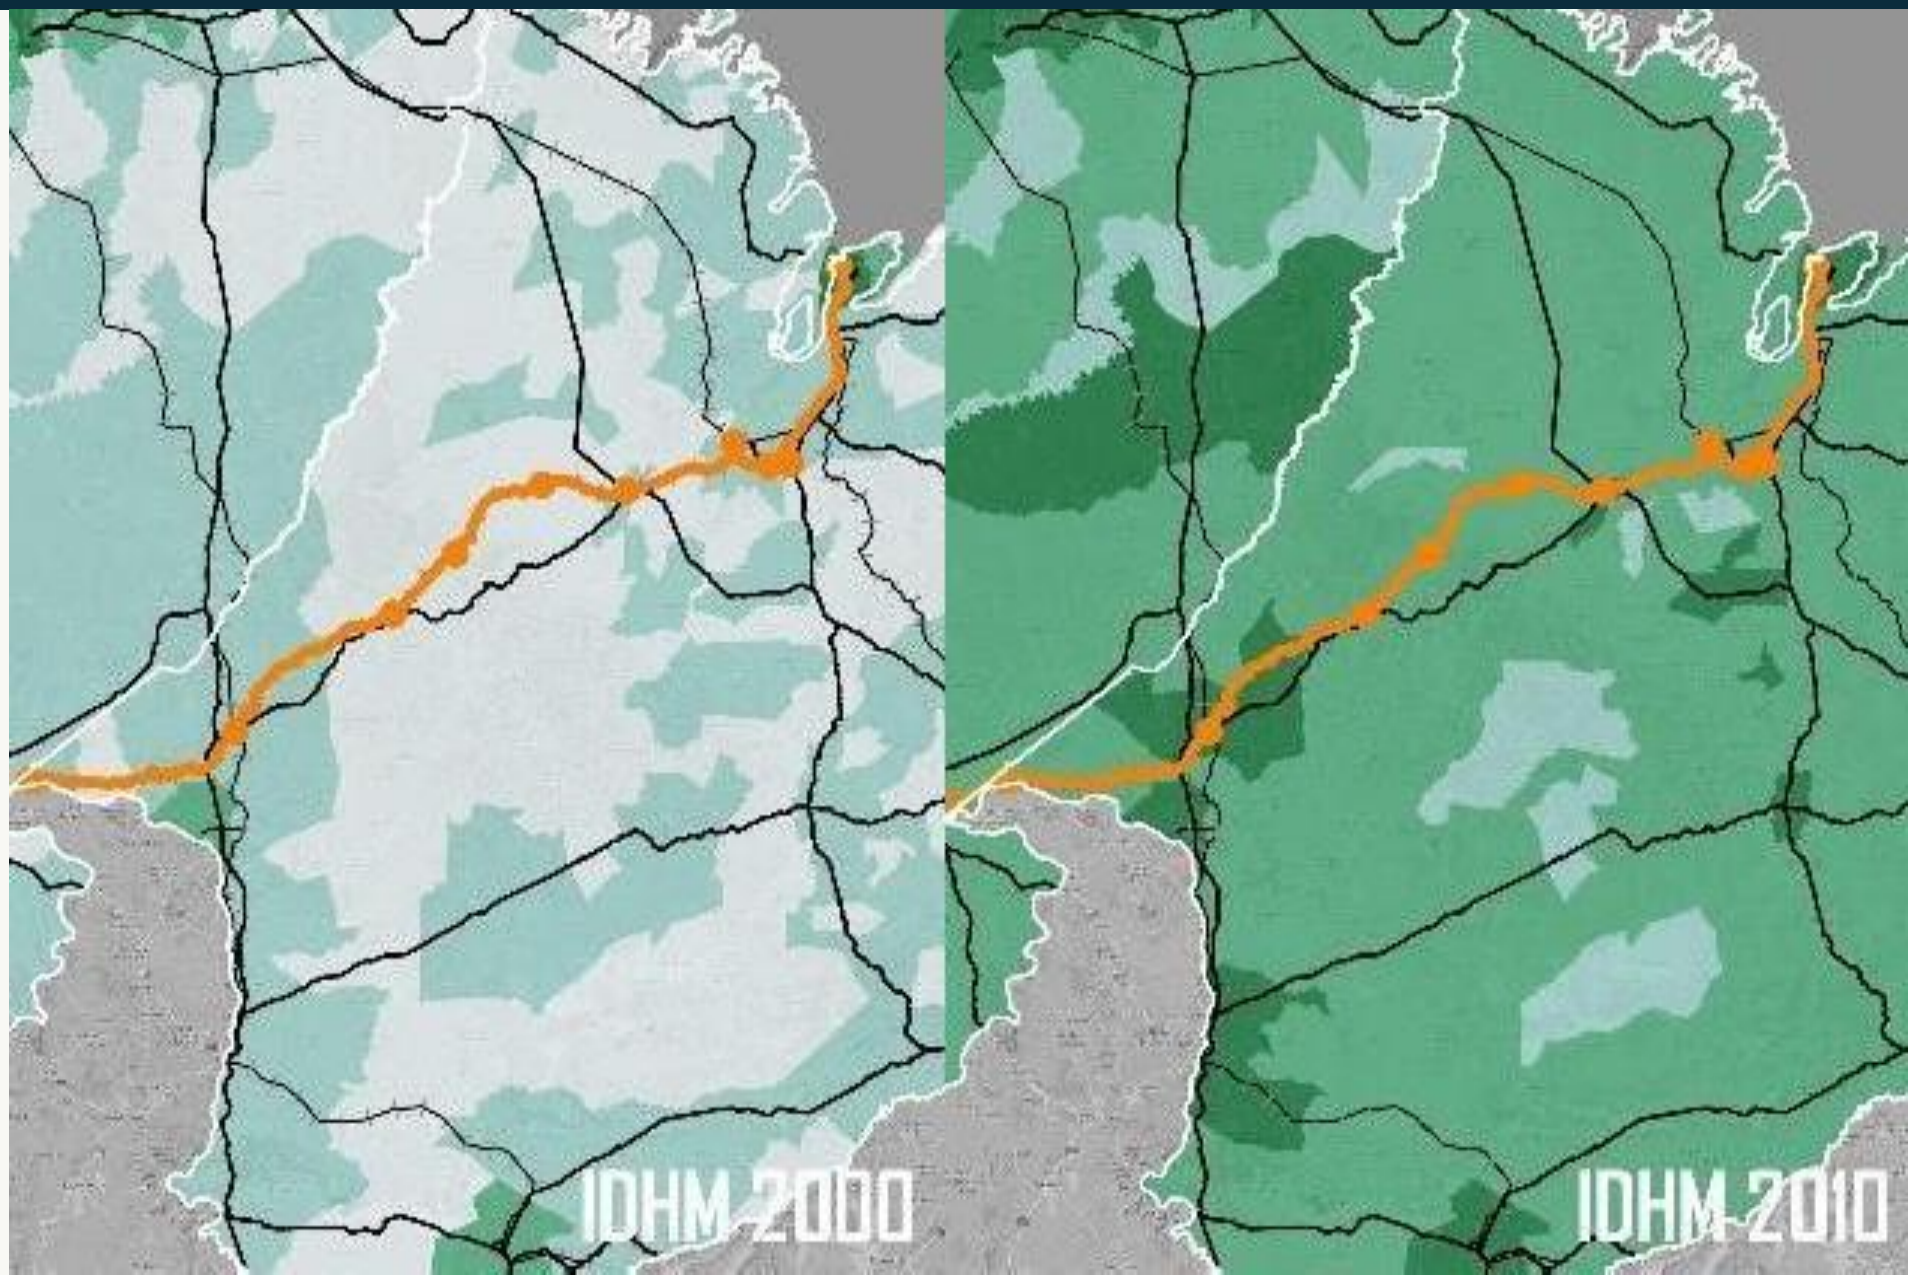

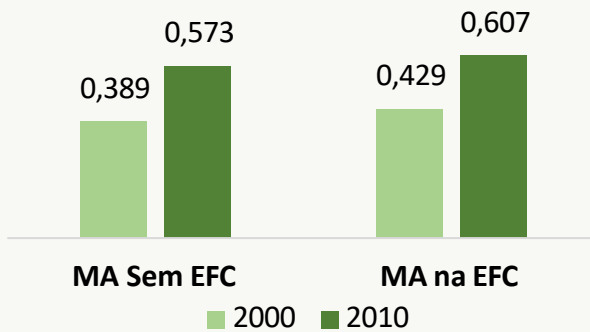

Uso de SIG em Saneamento

Utilização de ferramentas SIG para visualização de dados de Saneamento para definir a melhor estratégia de cobrança (2022).

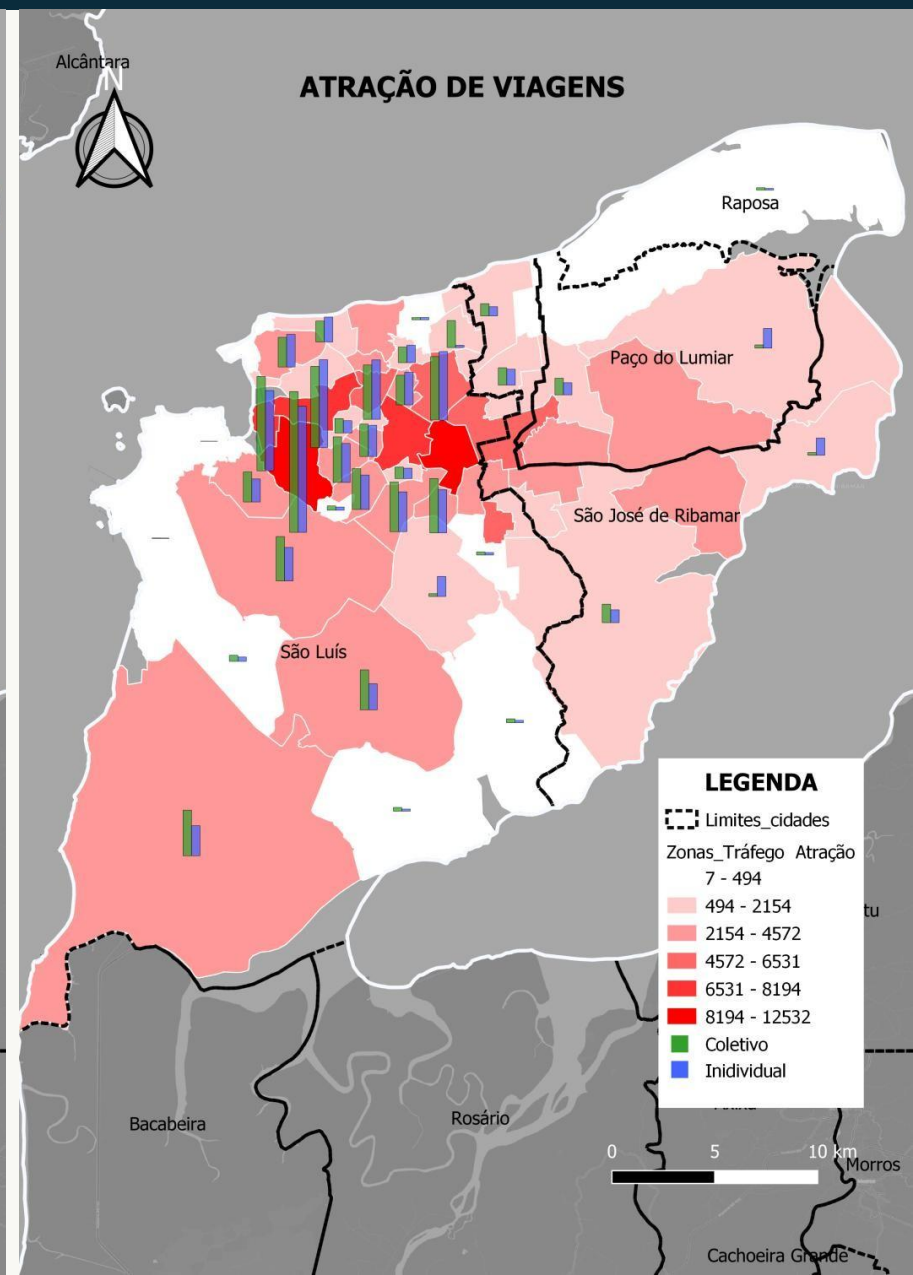

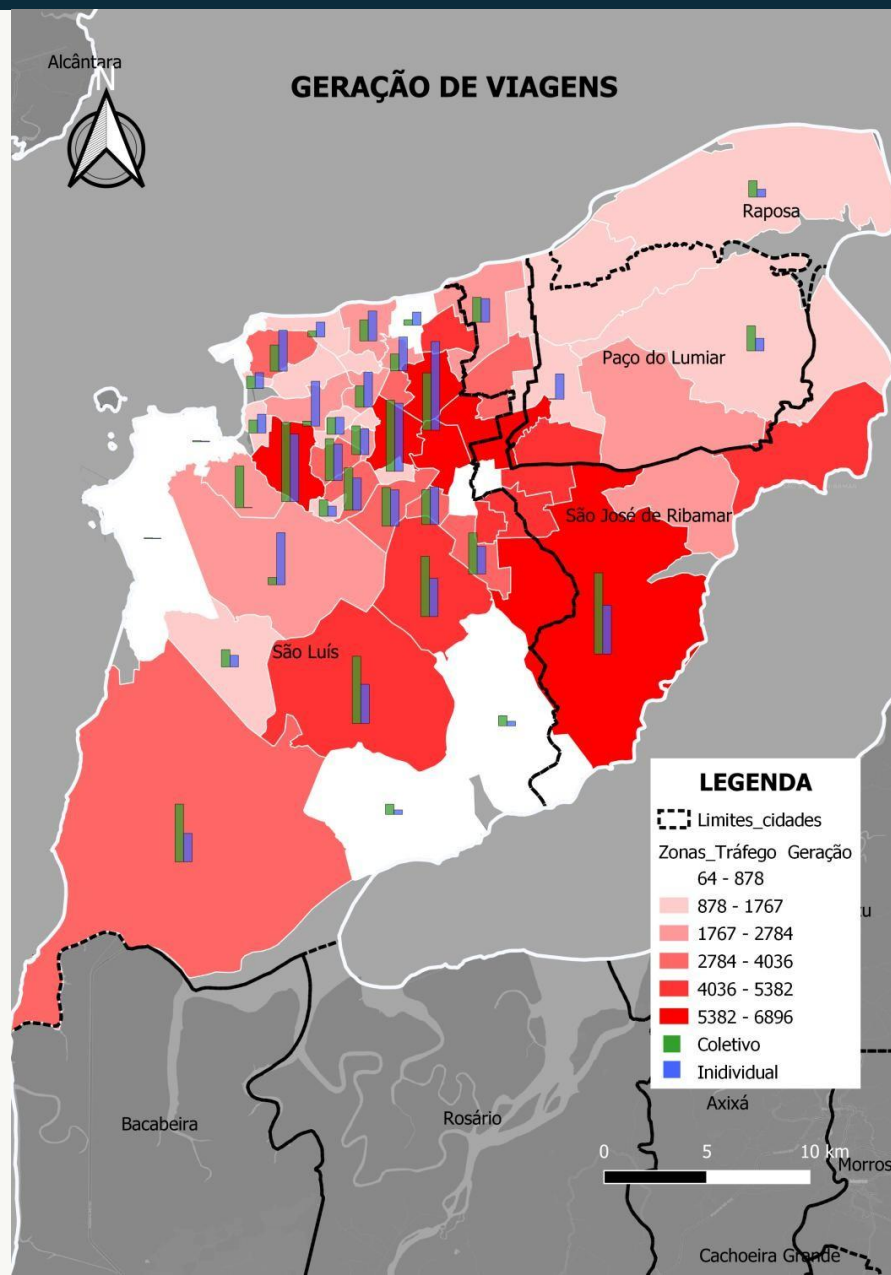

Impacto social da EFC

Utilização de ferramentas SIG para análise da evolução do IDH entre os censos de 2000 e 2010 dos municípios que estão ao longo da Estrada de Ferro Carajás.

Representação Geração e Atração de viagens

Utilização de ferramentas
SIG para análise dos
dados de geração e atração
de viagens da ilha de São
Luís. Dados planob 2017

The background of the slide is a faded, light gray aerial photograph of a coastal region. It shows a complex network of roads, a river or canal winding through the landscape, and various land parcels. The overall tone is muted and professional.

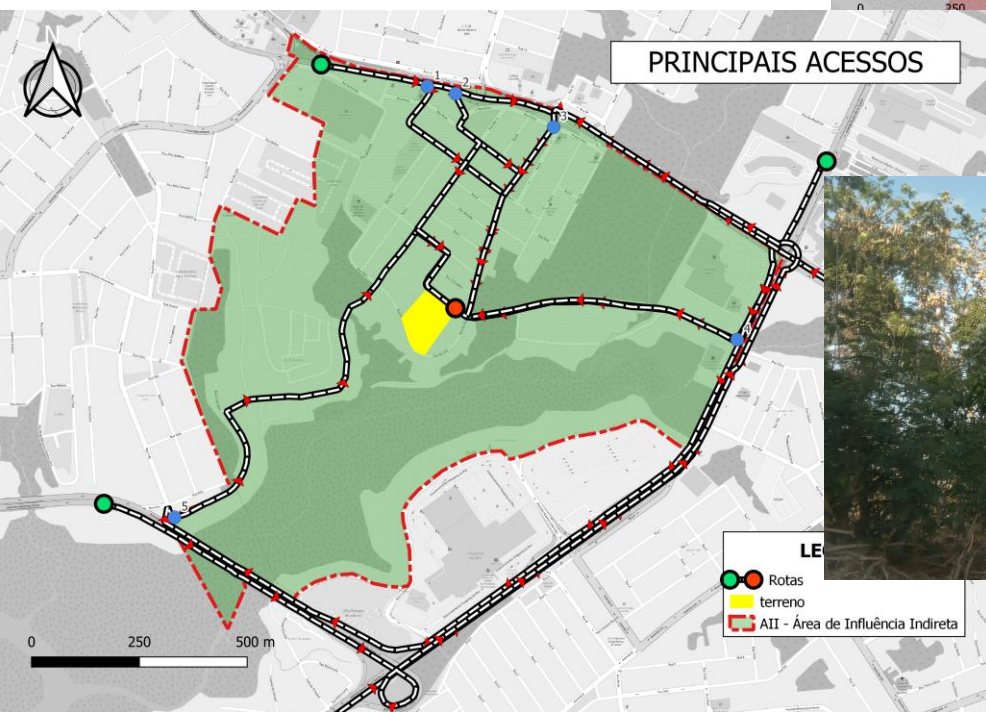

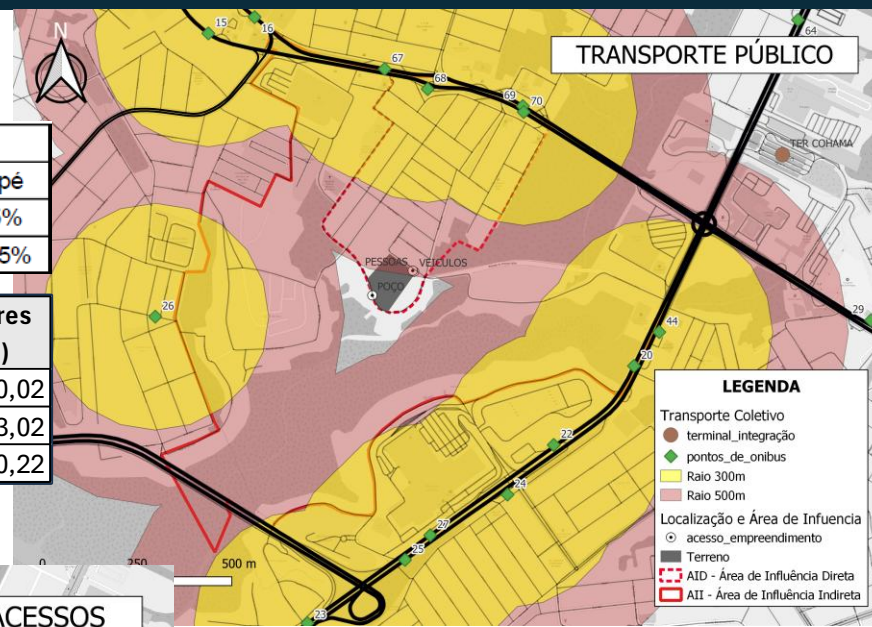

Estudos de Impacto de Empreendimentos

Relatório de Impacto de Trânsito – RIT

Avaliação de impacto de empreendimentos imobiliários através de modelos que estimam a geração de viagens e seus impactos no sistema viário atual

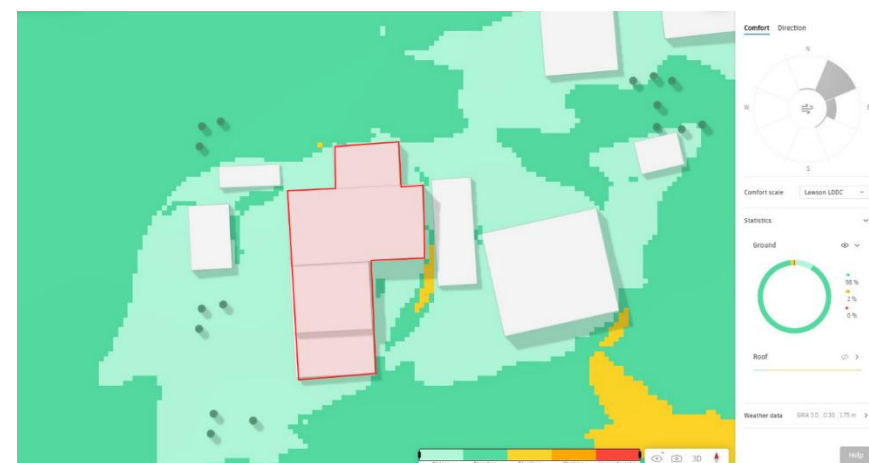

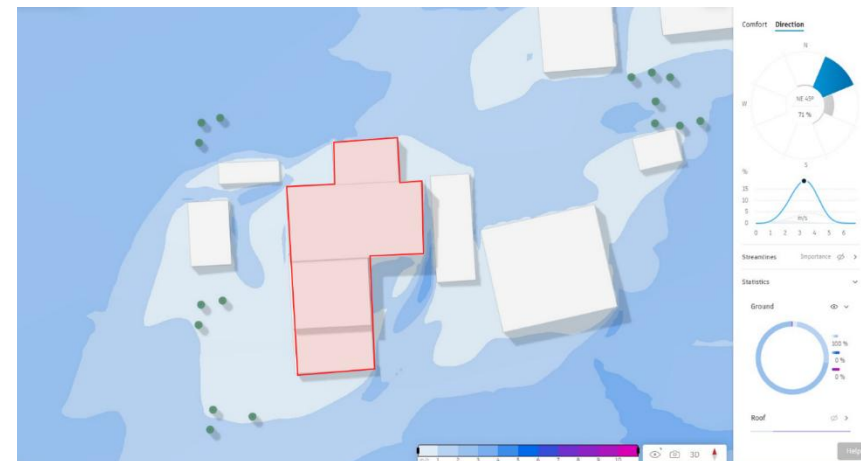

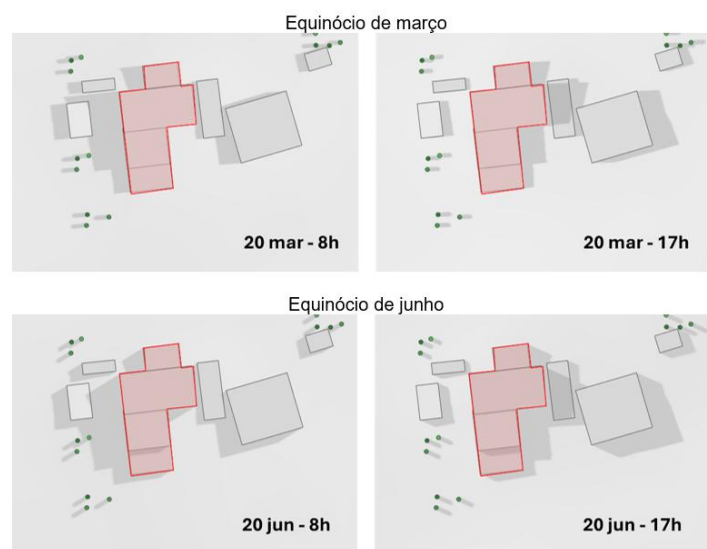

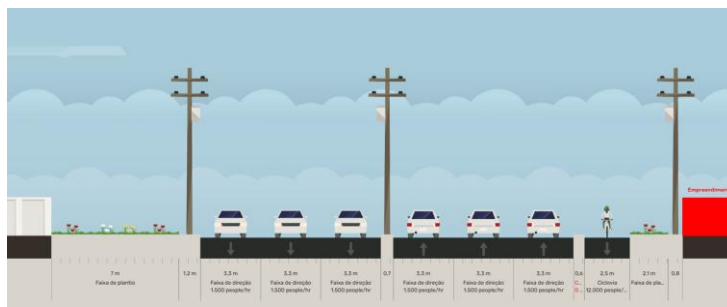

Pico	Equação de Geração	Atração % / Produção %	Divisão Modal %			
			Auto	Moto	Ônibus	A pé
Manhã	0,3543UH	15% / 85%	52%	12%	11%	25%
Tarde	0,3532UH	68% / 32%	48%	10%	13,5%	28,5%

Período	Viagens Geradas	Automóveis (70%)	T Público (20%)	Pedestres (10%)
Manhã (7h-9h)	200	140,04	40,04	20,02
Tarde (16h-18h)	230	161,04	46,04	23,02
Dia Todo	2500	1750,44	500,44	250,22

Estudo de Impacto de Vizinhança -EIV

Estudo mais aprofundado dos impactos de um empreendimento que observa diversos aspectos como ventilação, iluminação, geração de resíduo, geração de ruído, etc..

TRECHO DA VIA	No de Faixas	Sentido	Capacidade	Vei/equiv	Incremento	V/C	NS
MA-203 - Calhau	3	Único	4.131	979,5	1.175,4	28,5%	B
MA-203 - Raposa	3	Único	4.131	638,5	766,2	18,5%	A
Travessa Urucutua	2	Duplo	1.134	139,0	166,8	14,7%	A
Urucutua	2	Único	2.268	119,5	143,4	6,3%	A

The background of the slide is a faded, light gray aerial photograph of a coastal region. It shows a complex network of roads, a river or canal winding through the landscape, and various land parcels. The top and bottom portions of the slide are partially obscured by dark blue horizontal bars.

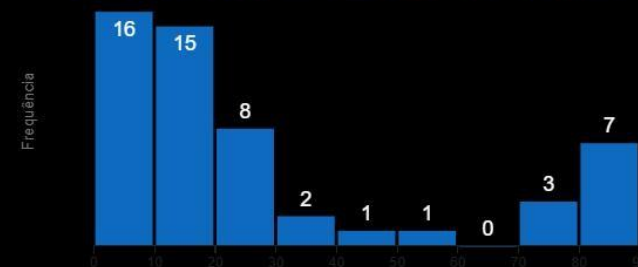

Usos de outras ferramentas/técnicas

Análise de Acidentes

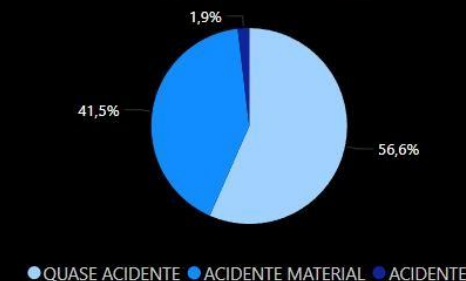

Aplicar técnicas de Inteligência de Negócios para analisar dados dos acidentes com ônibus e micros que fazem o transporte Sede - Residência dos empregados. São Luis-MA (2021).

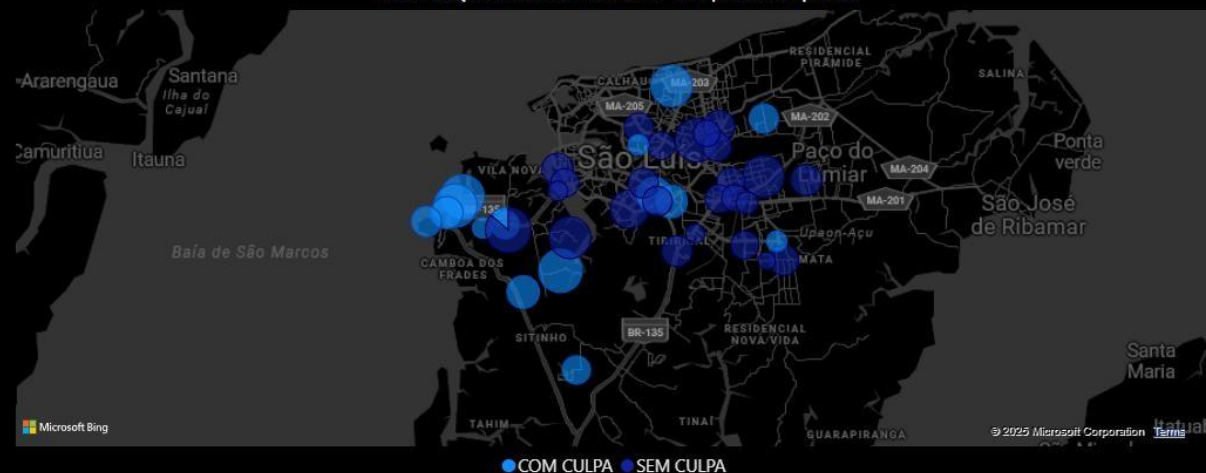

Histograma de "tempo de empresa" (meses) dos motoristas

Classificação da Ocorrência

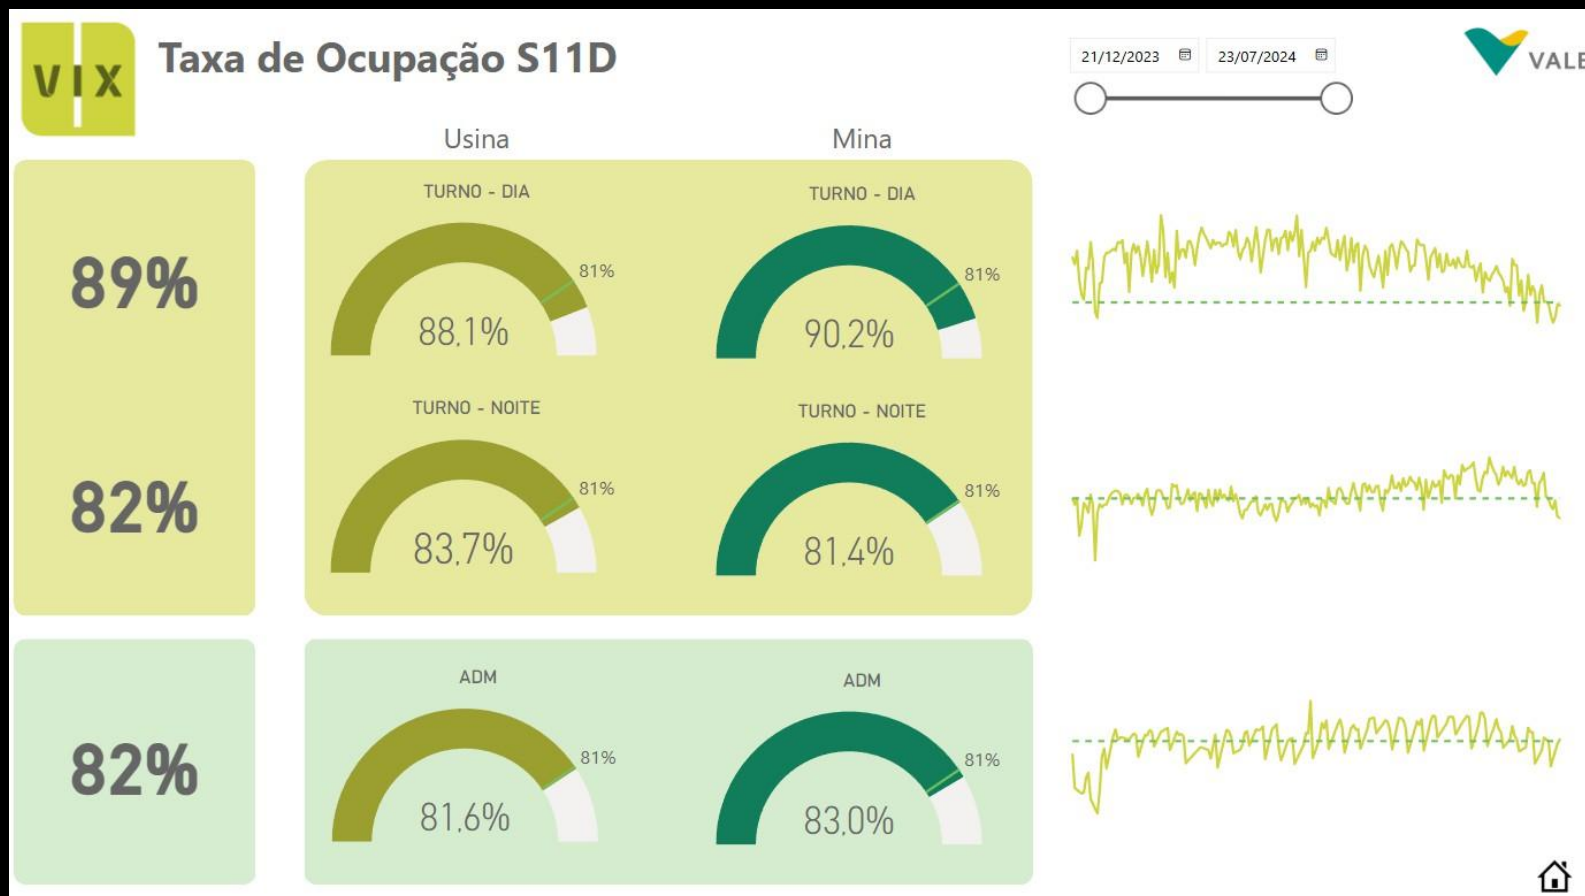

Localização das ocorrências / Tempo de Empresa

Dashboard Fretamento

Elaboração de Dashboards para acompanhamento e análise de indicadores de performance do serviço de transporte de empregados Sede Residência (2024)

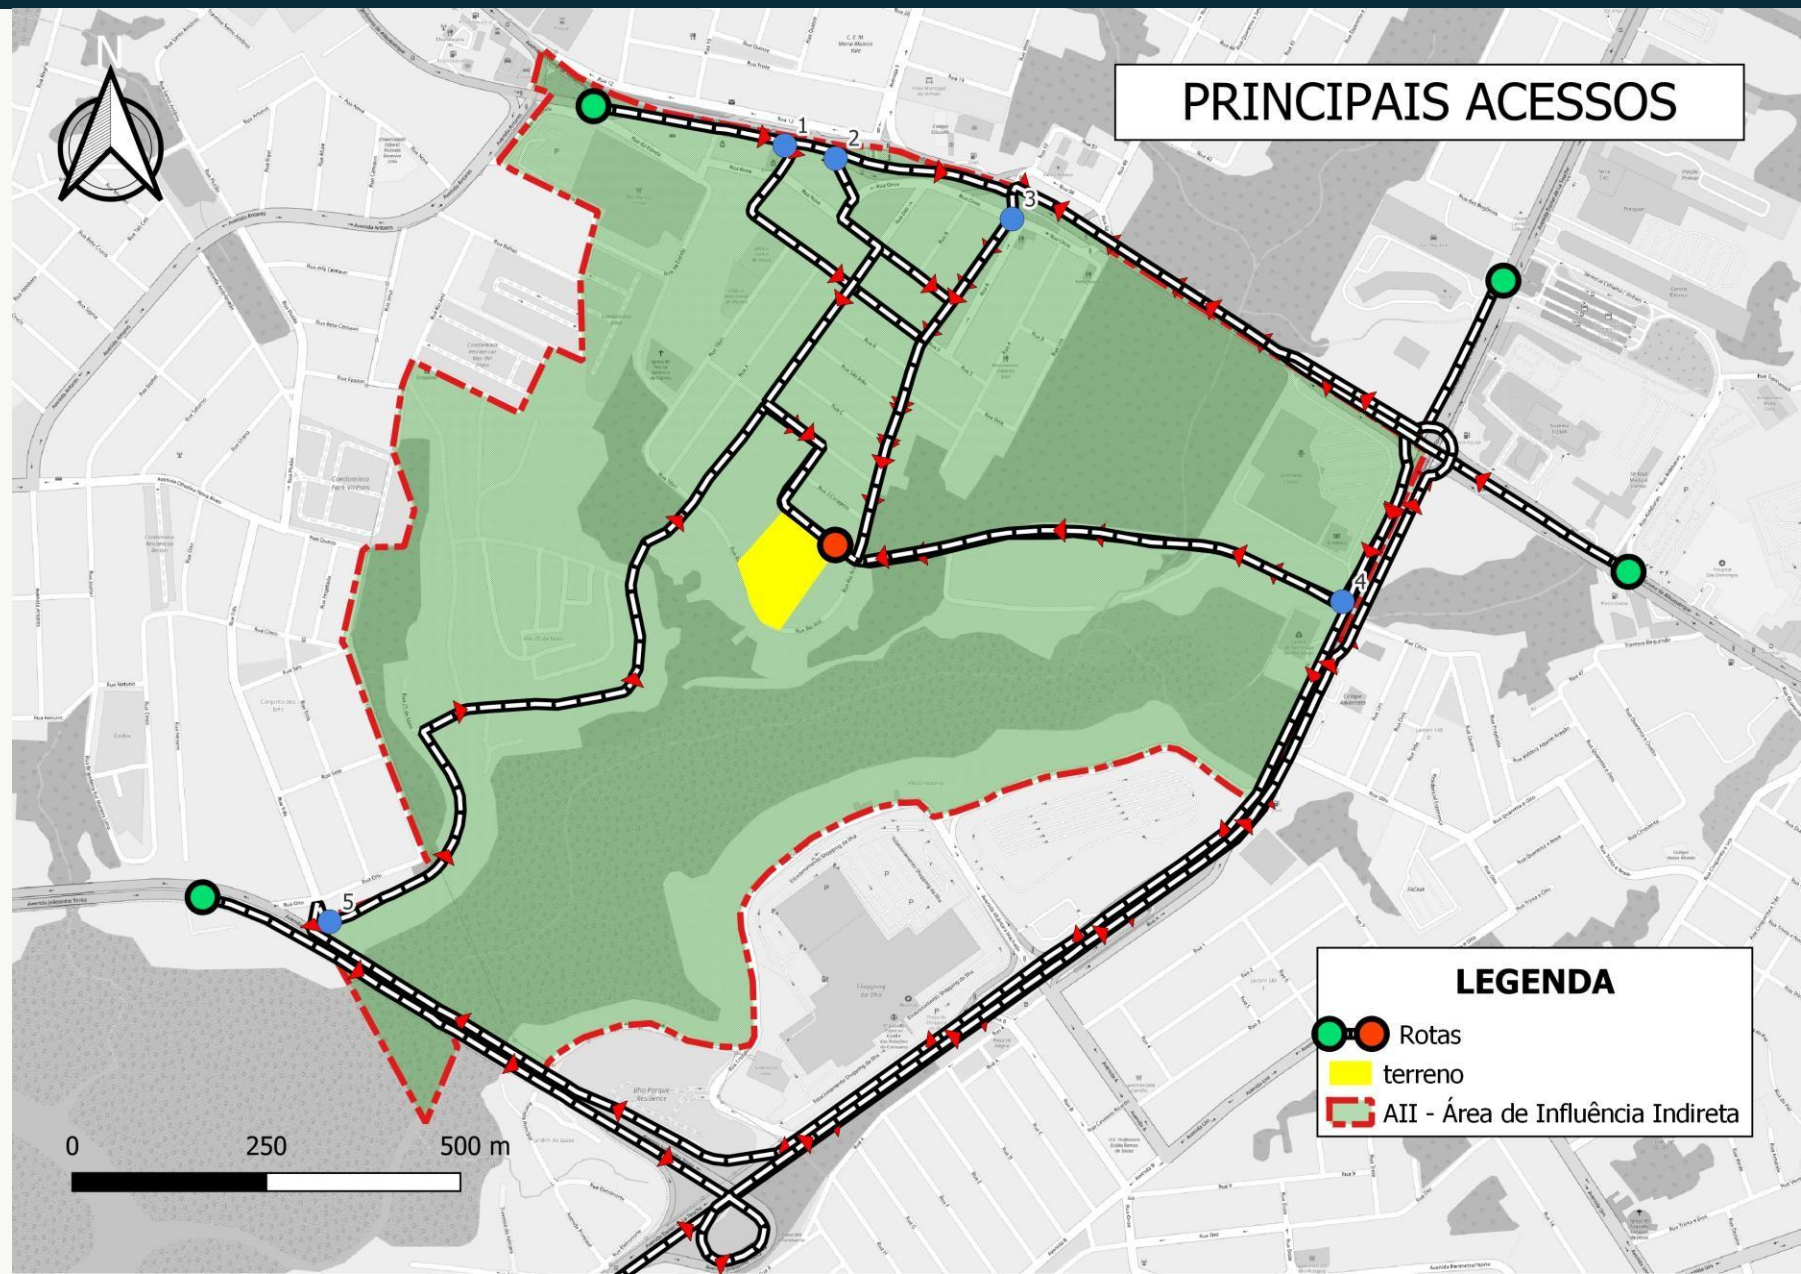

Intervenção viária

Proposta de intervenção viária
na rotatória do Calhau (2022)

Relatório de Impacto De Trânsito (RIT)

Elaboração de RIT para
avaliar o impacto do
empreendimento
imobiliário no sistema
viário da região (2024).

Projeto de Intervenção Urbana em São Luís/MA

www.wagnerjales.com.br

WAGNER JALES
CONSULTORIA E PROJETOS

Urban Mobility and Urban Planning Consulting

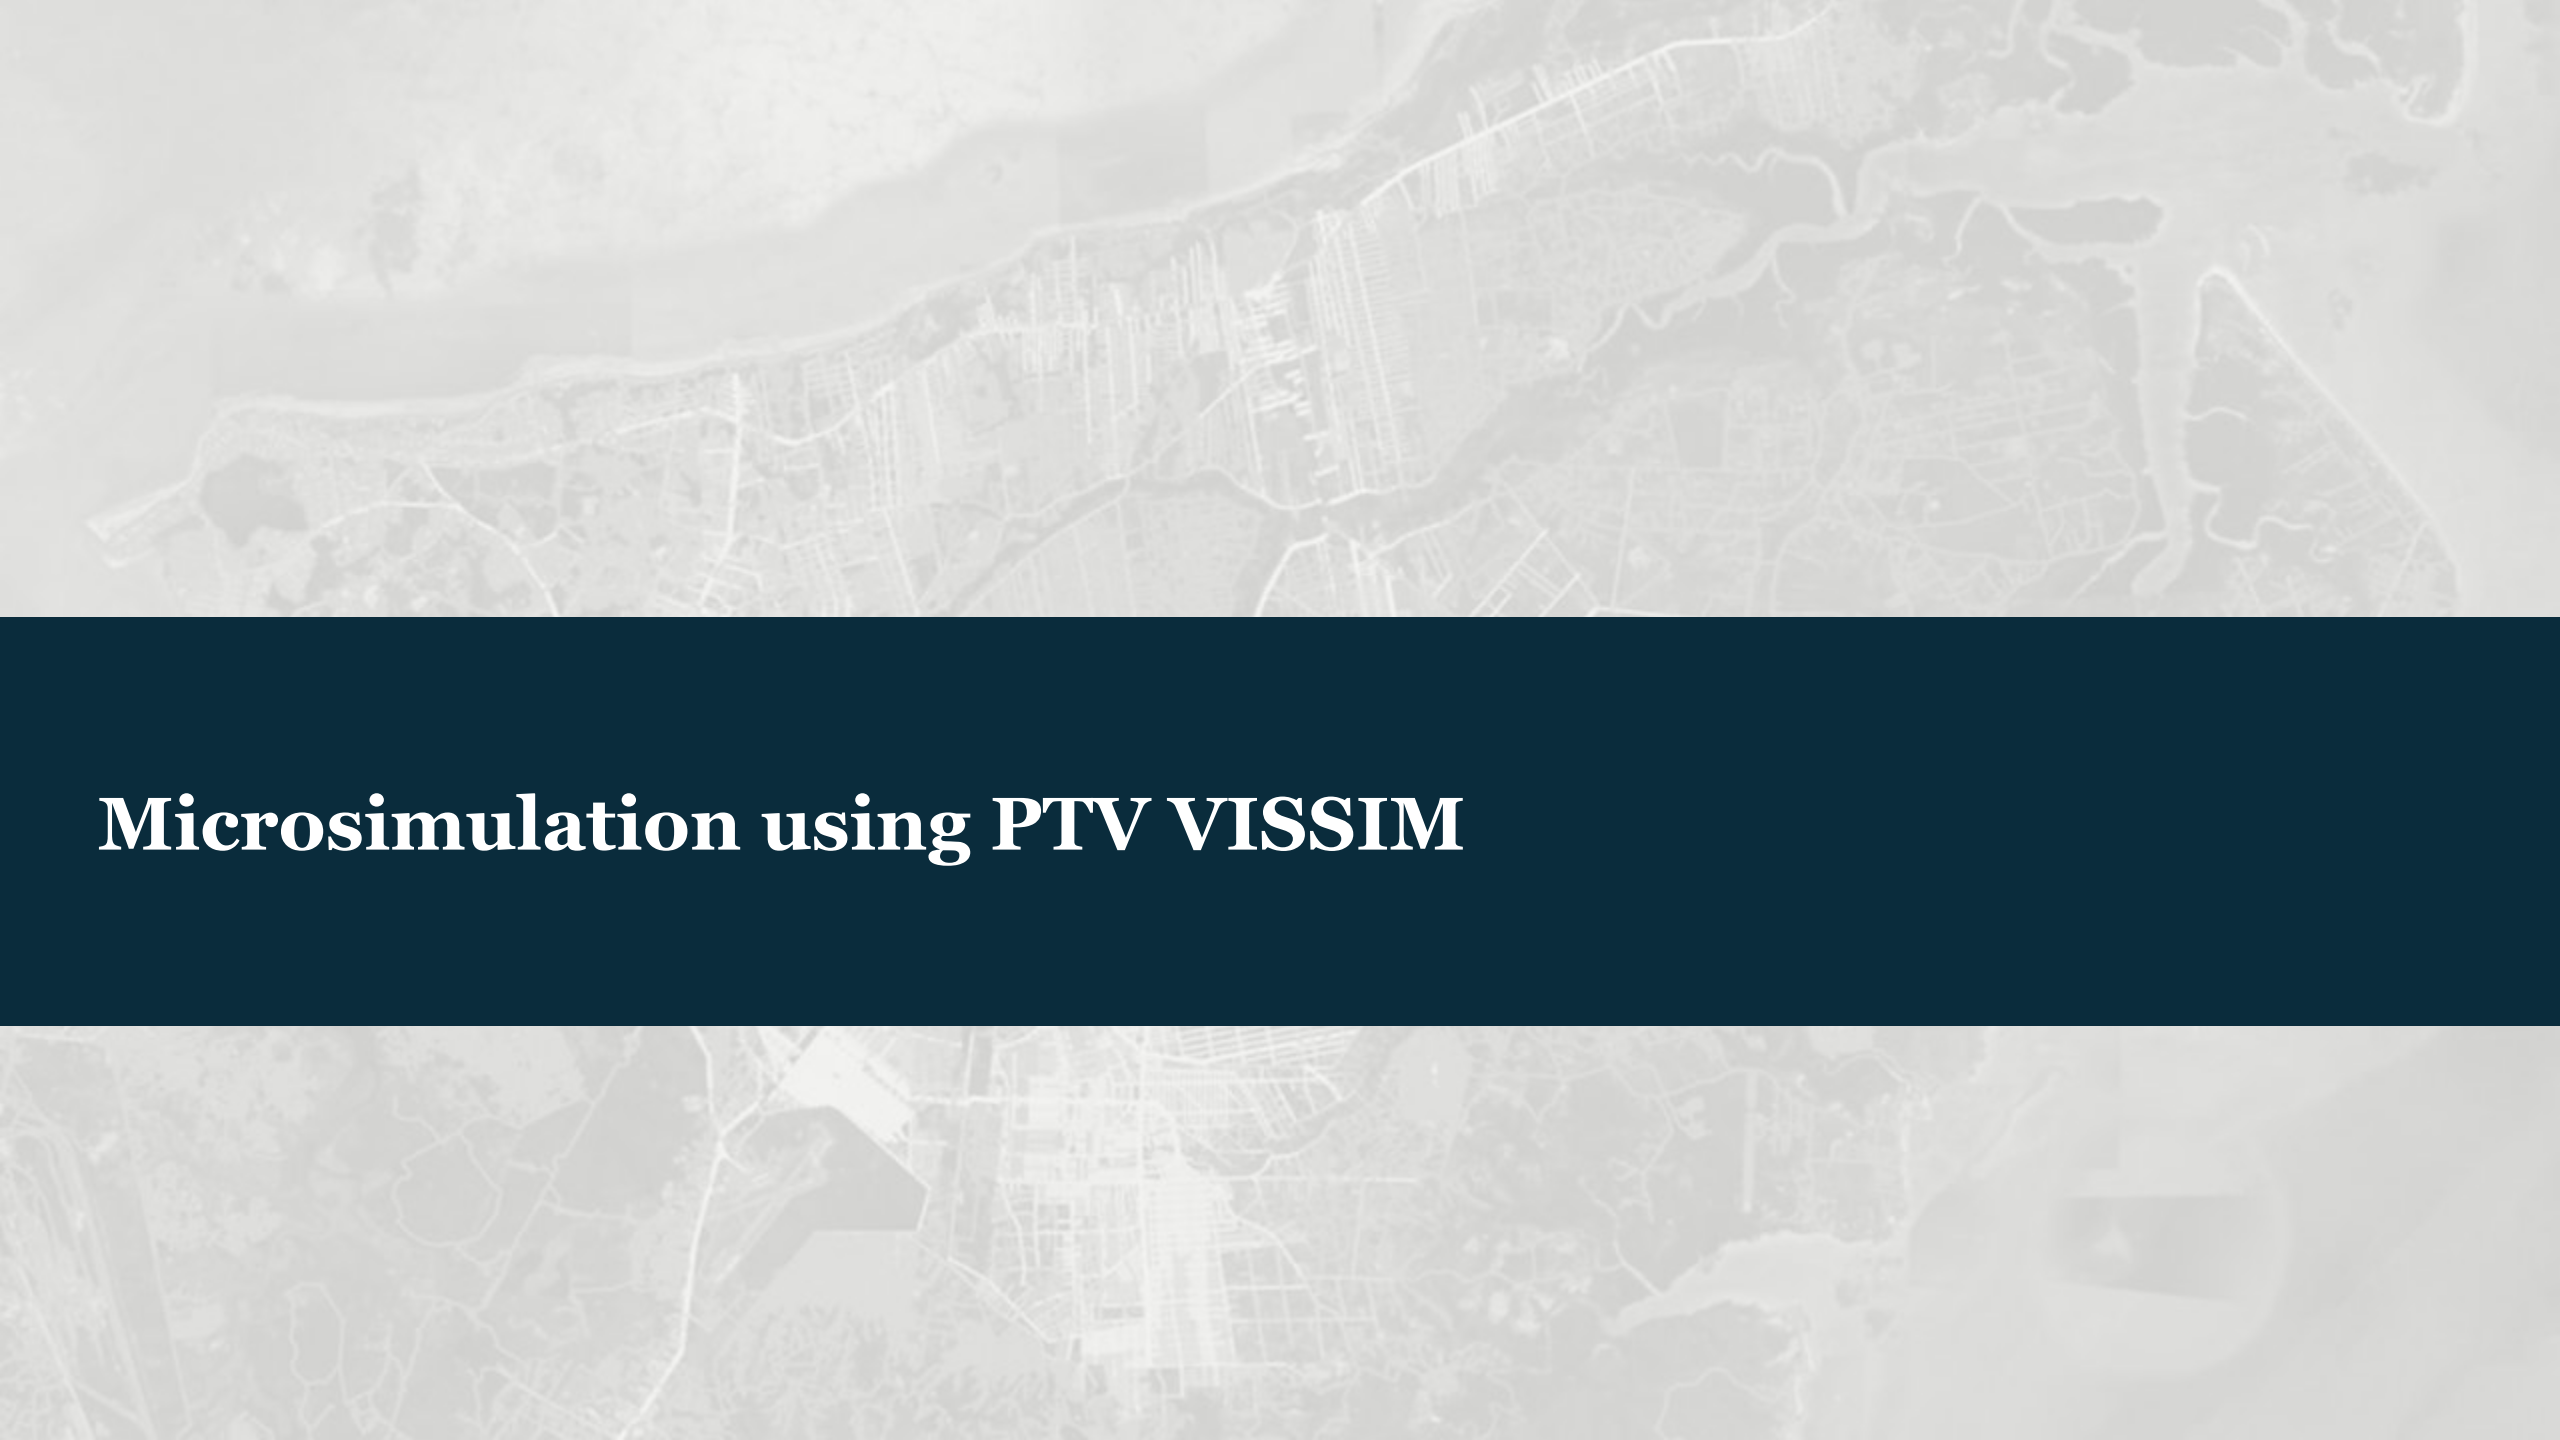

Specialist in integrated solutions using spatial data, traffic simulation and urban public policies.

WAGNER JALES
CONSULTORIA E PROJETOS

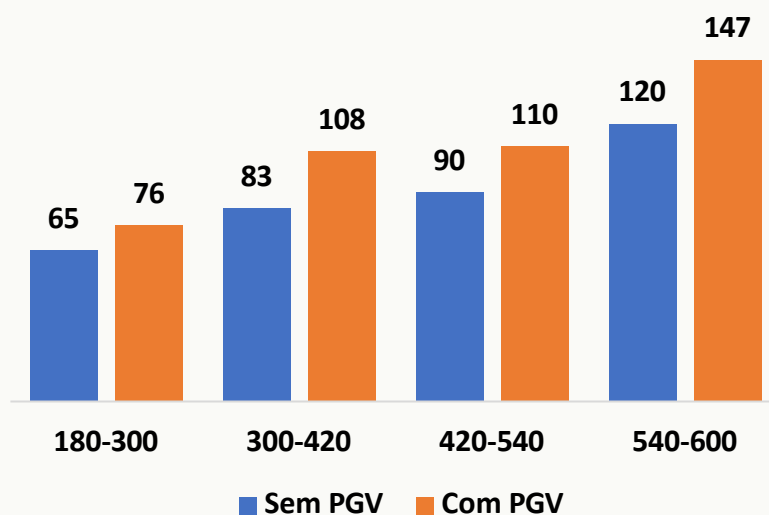

www.wagnerjales.com.br

The background of the slide is a faded, light gray aerial photograph of a city. It shows a dense network of streets, some larger roads, and green spaces. The city appears to be situated near a body of water, possibly a river or a lake, which is visible on the right side of the image. The overall tone is muted and professional.

Microsimulation using PTV VISSIM

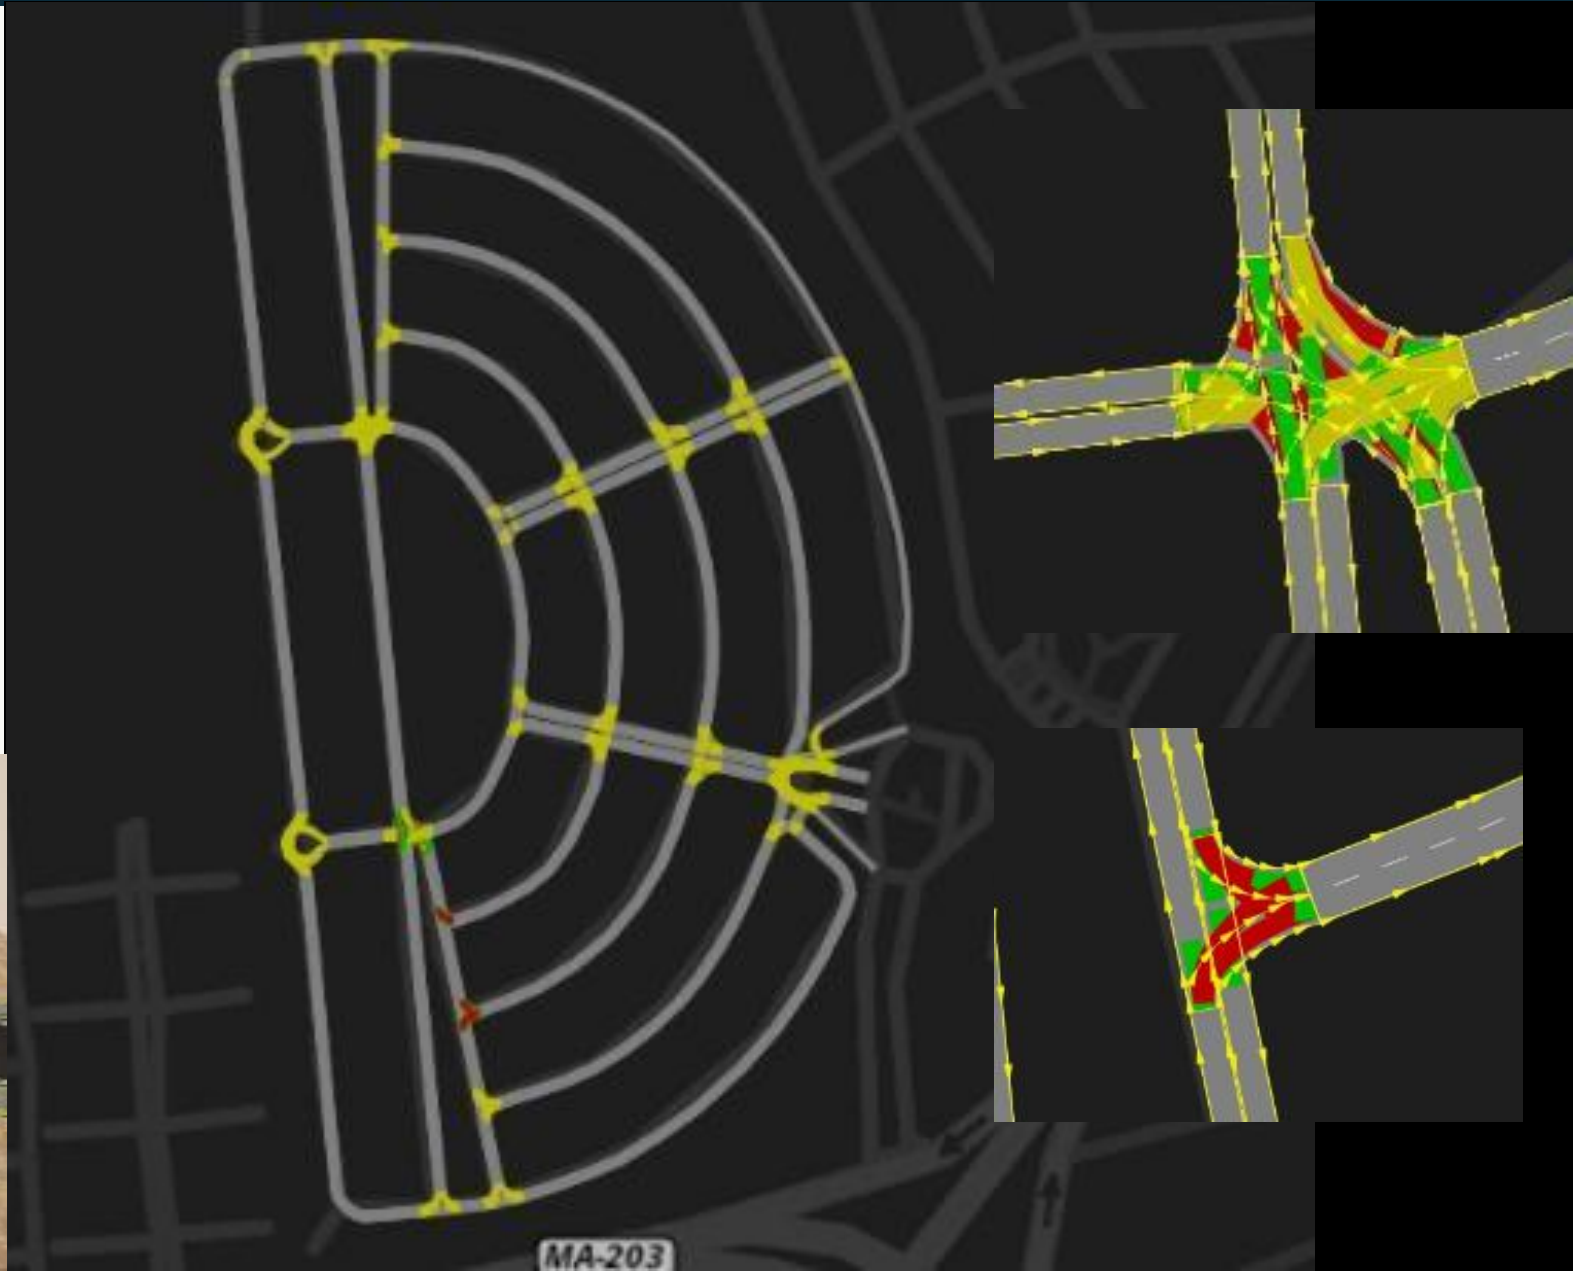

Trip Generation Pole

Impact analysis of a Trip Generation Pole simulating the addition of 300 vehicles/hour. São Luís-MA (2022).

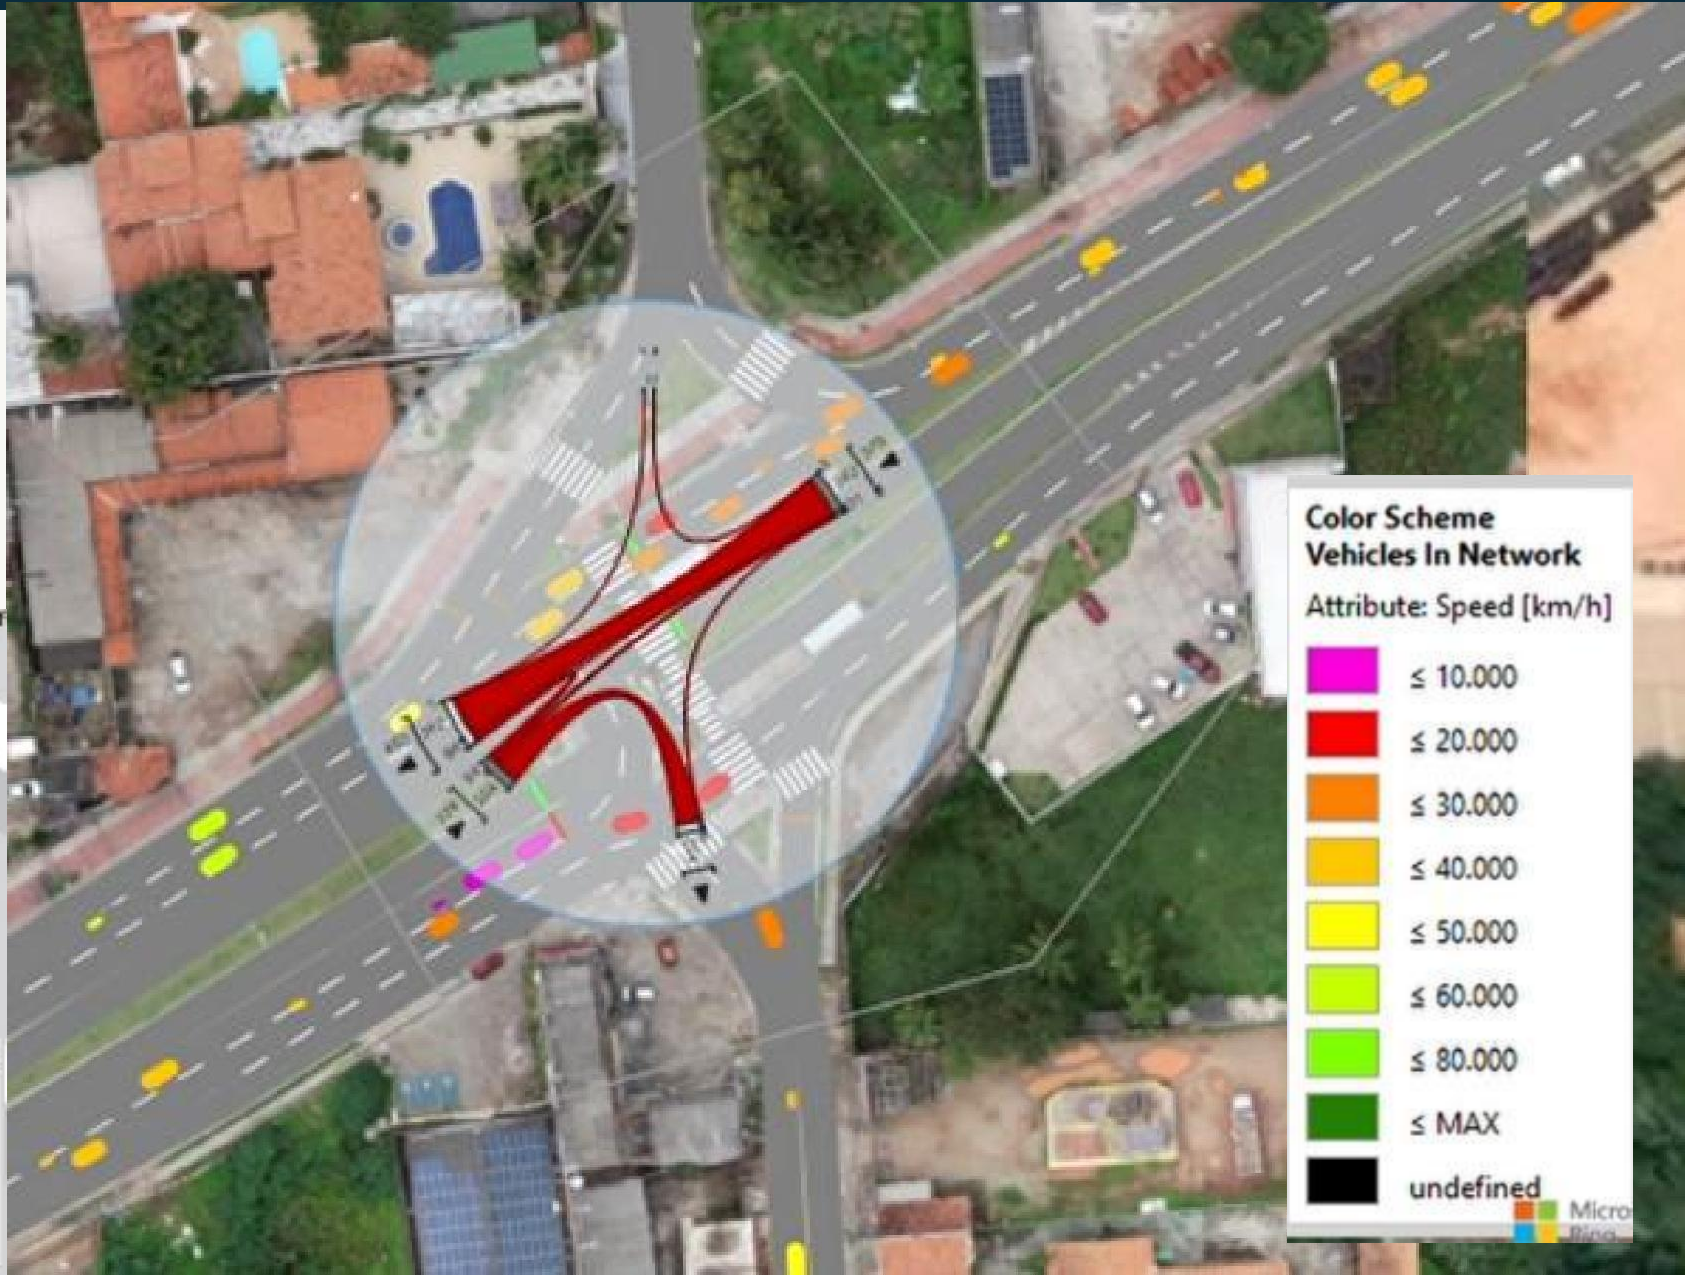

Road Safety

Project for the implementation of "Traffic calming measures" to reduce accident occurrences in a high-standard condominium. Paço do Lumiar-MA (2021).

Intersection Analysis

Traffic simulation as a tool for building road intervention scenarios. São Luís-MA (2023).

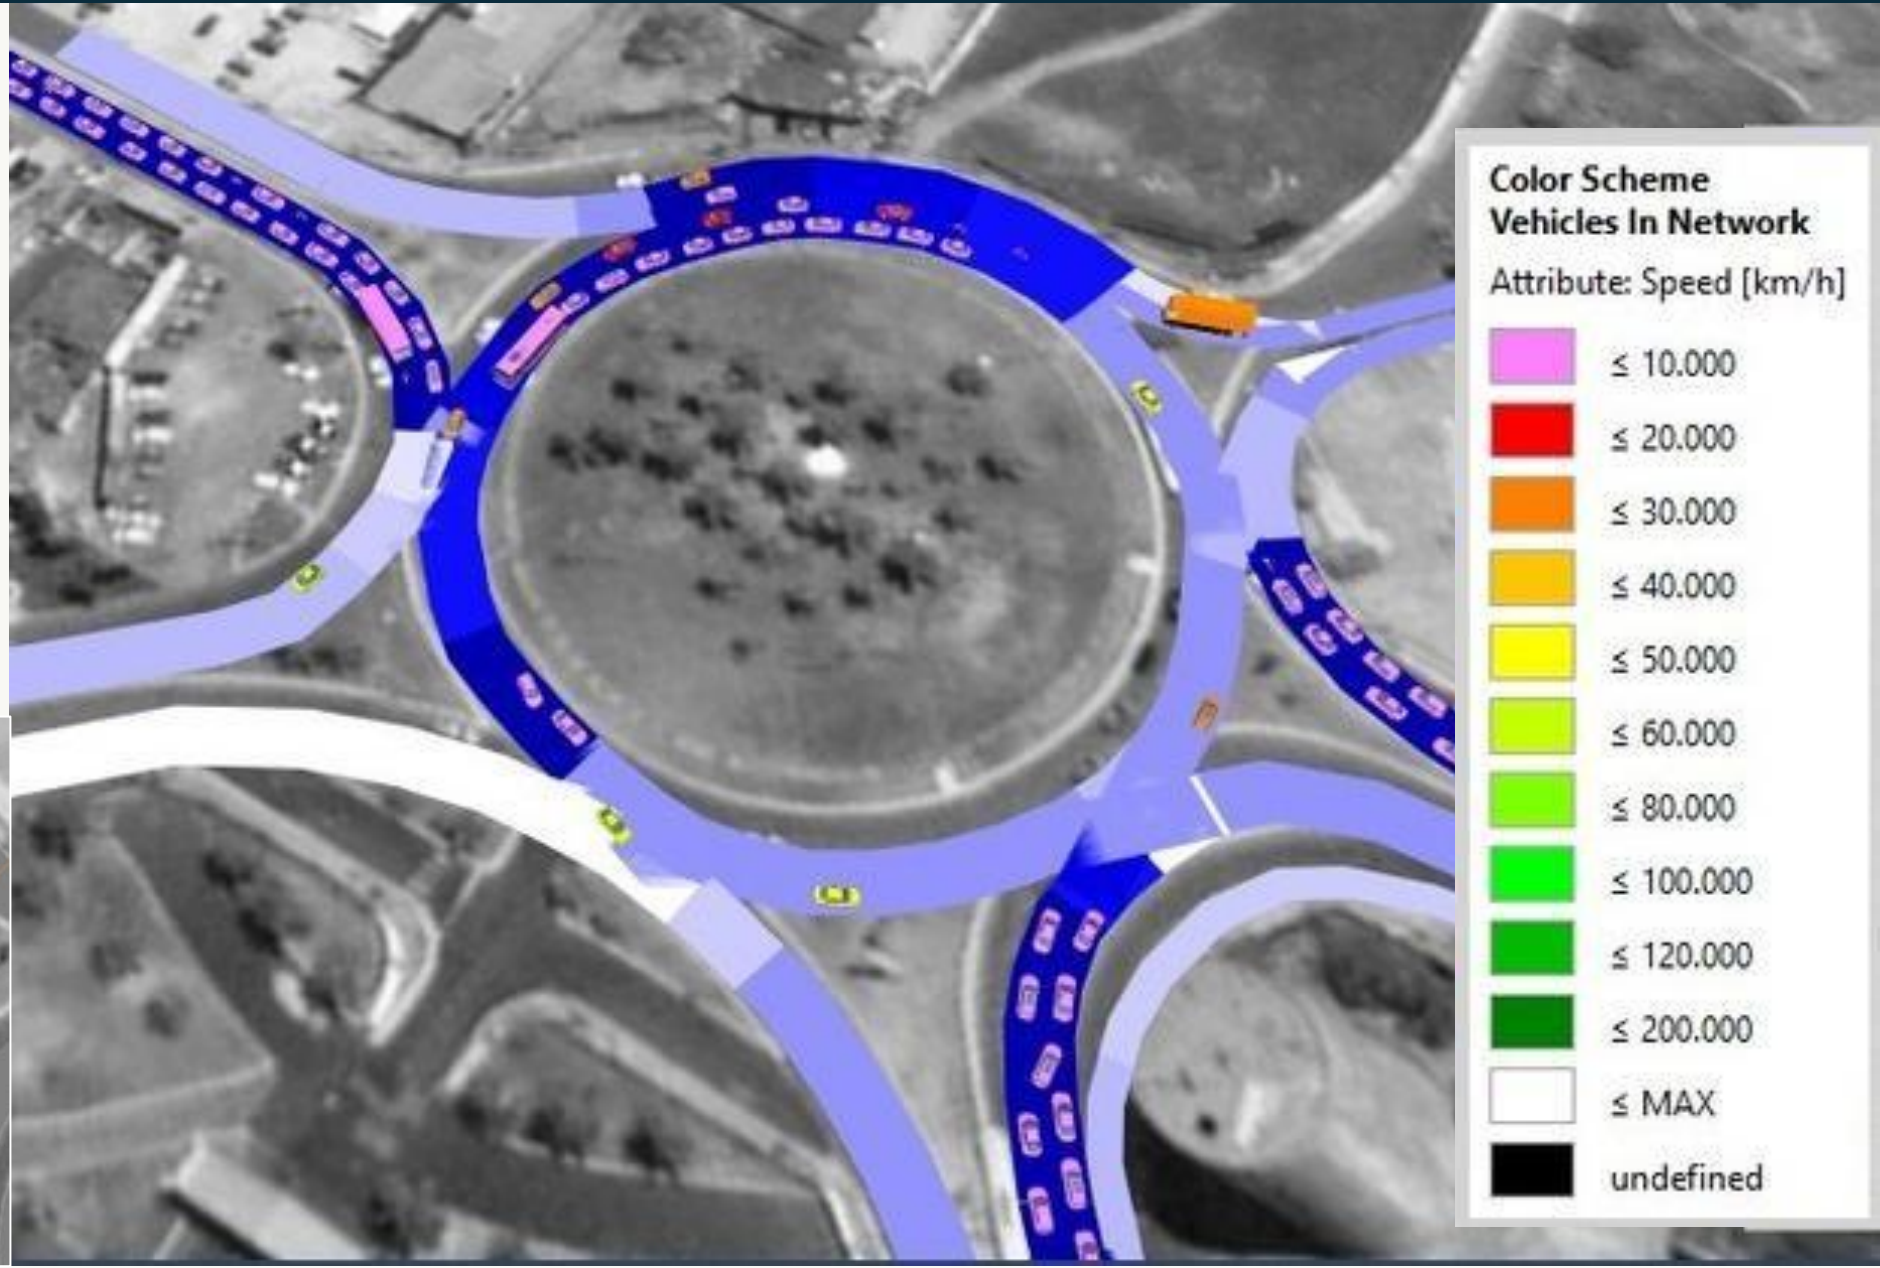

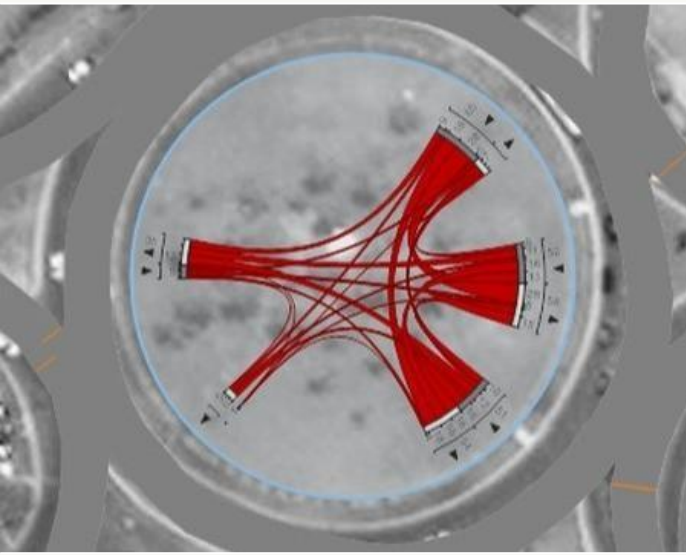

Intervention Scenarios

Creation of road intervention scenarios considering 3 alternatives and accounting for vehicle volume growth over the years. São Luís-MA (2023).

Roundabout Circulation Analysis – São Luís/MA

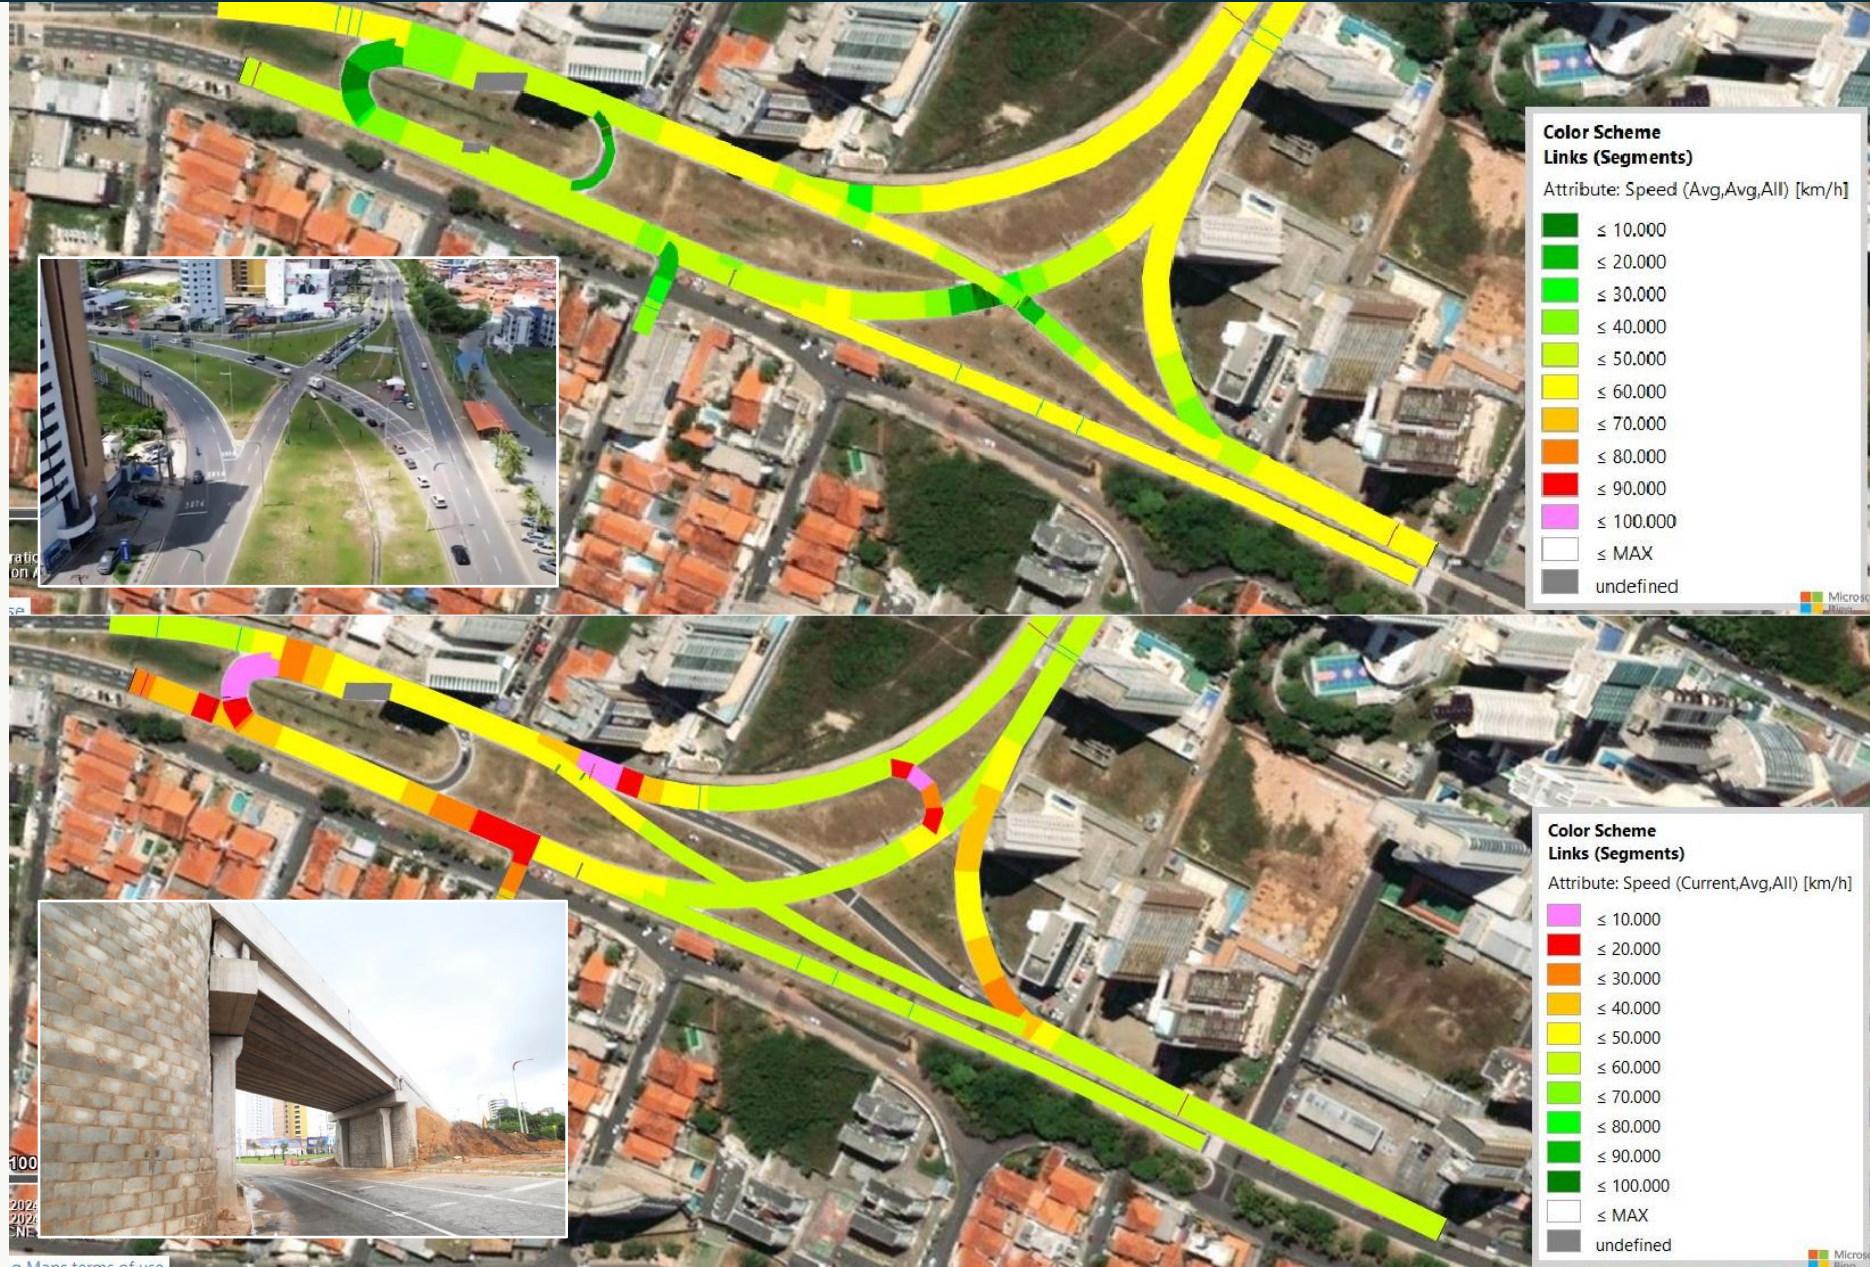

Simulation of intervention impact on pedestrian circulation

Simulating the impact
of a sales stand installed
on pedestrian
circulation in a walkway
within a heritage-
protected area

Impact of a Pump Station

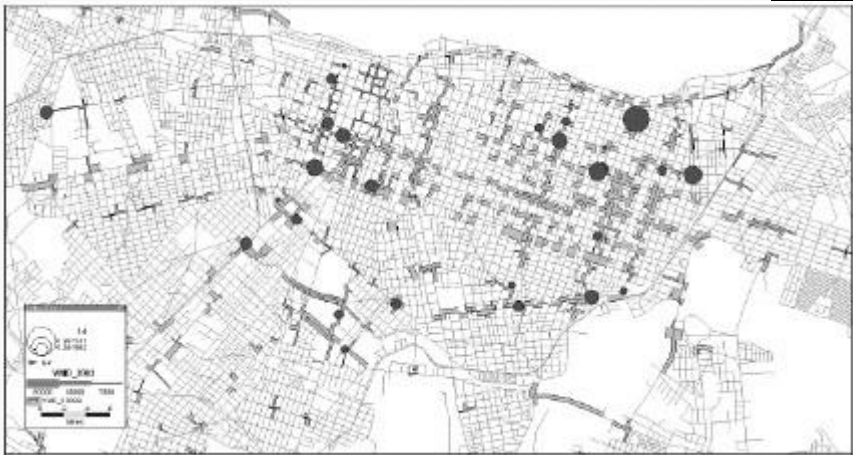

Territorial Analysis using Space Syntax

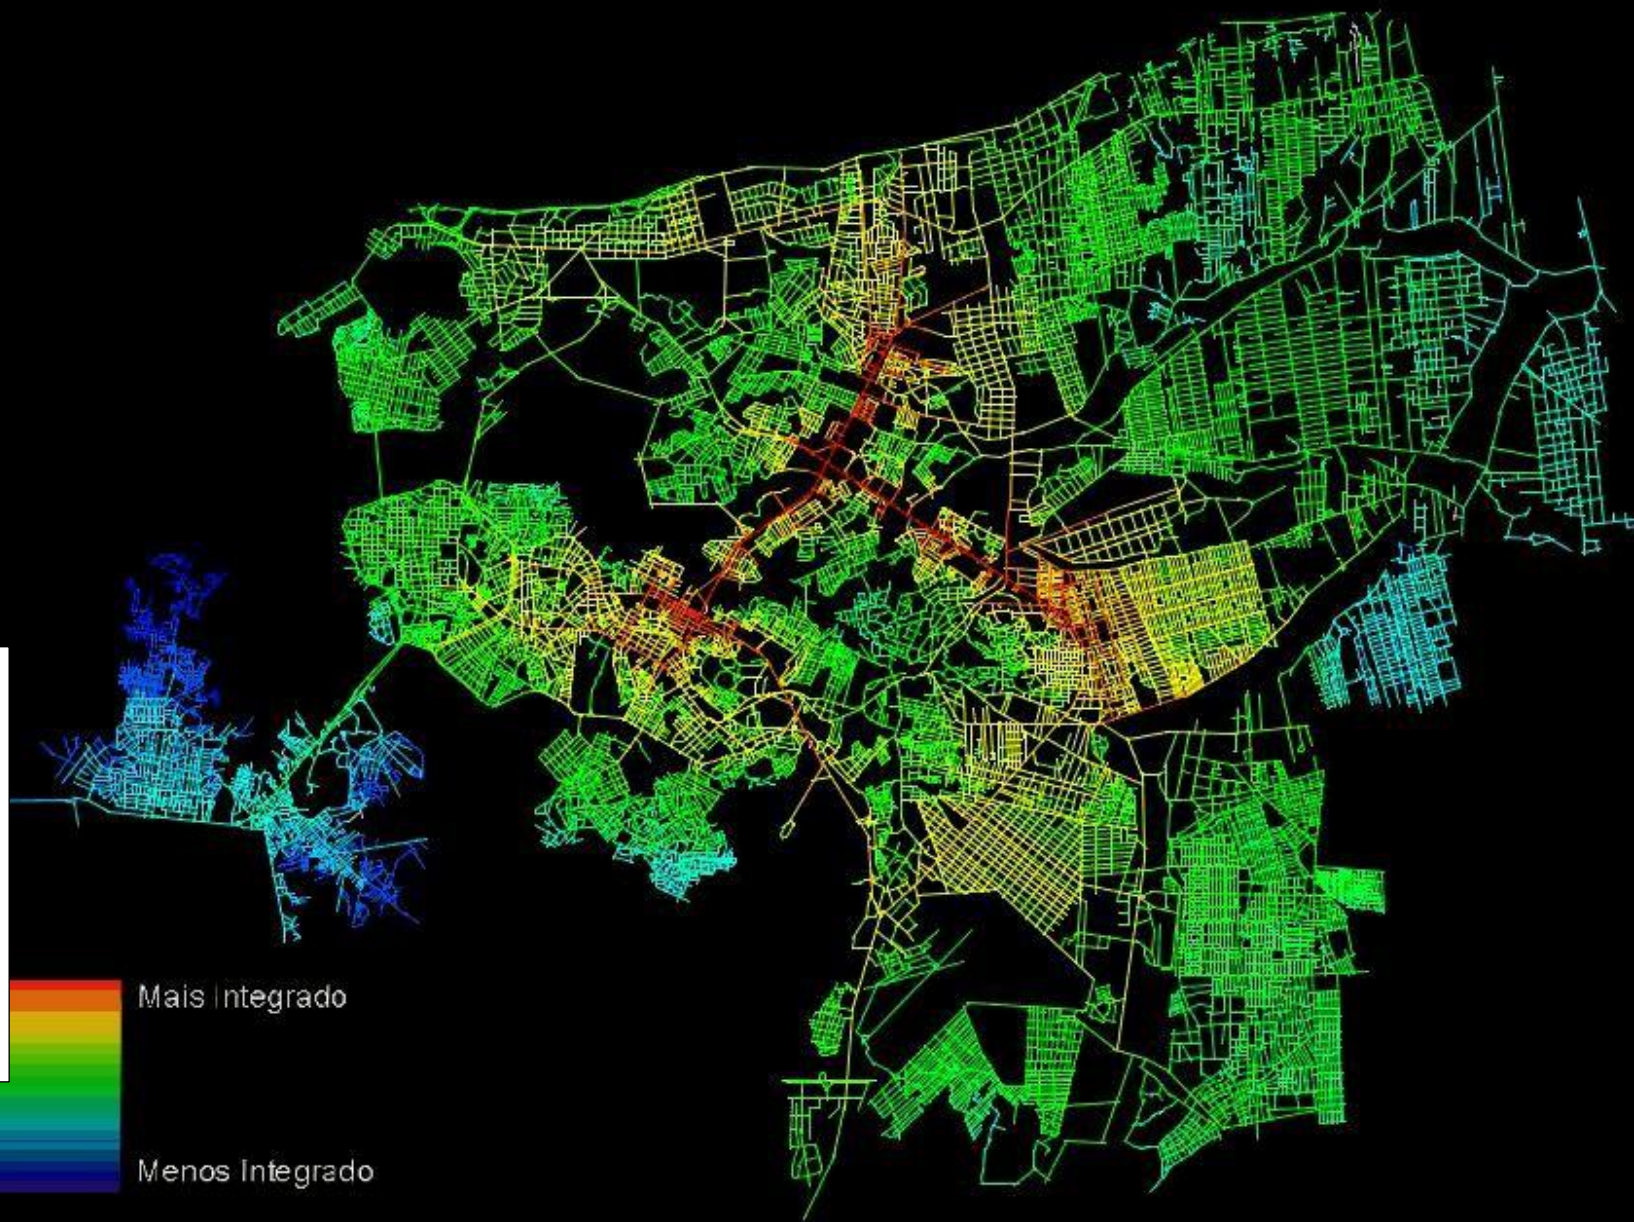

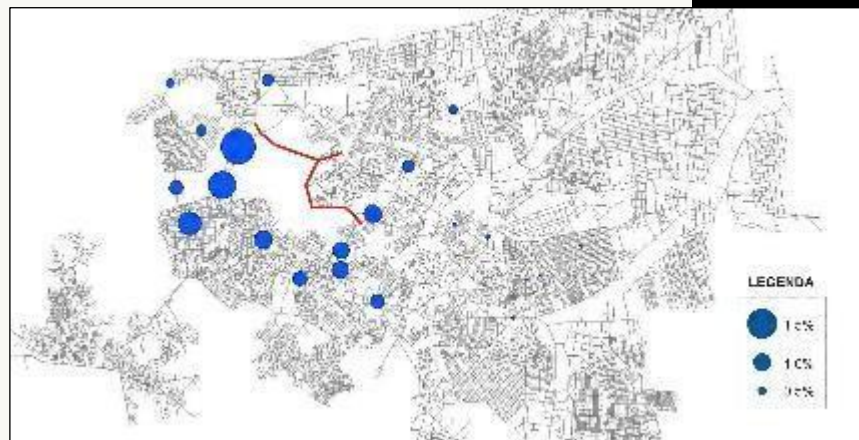

Macrosimulation

Low-cost method for traffic macrosimulation in urban areas using morphology. Fortaleza-CE (2012)

Road Impact

Analysis of the urban impact of a road intervention in São Luís-MA (2014)

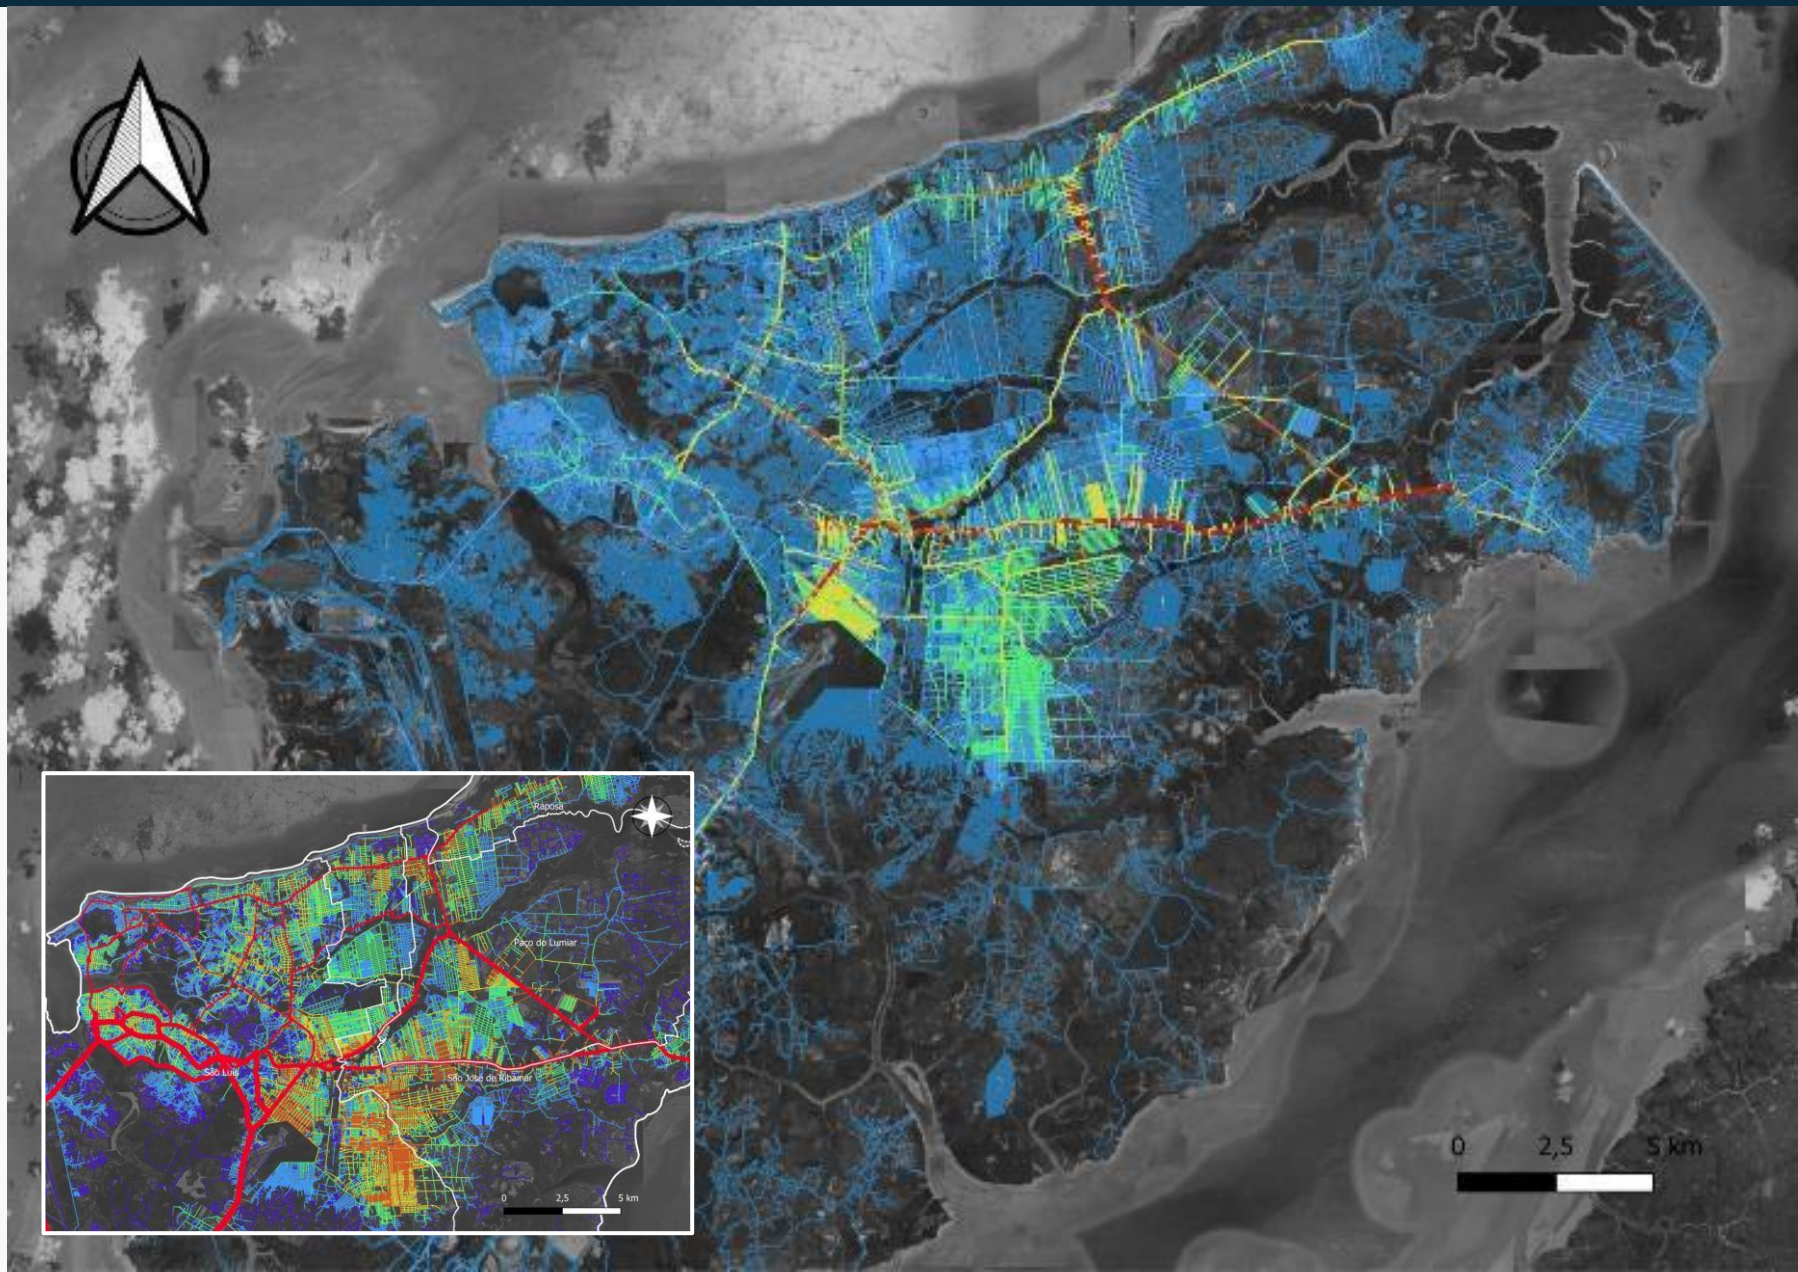

Study in Historic Areas

Analysis of the impact of an important commercial street in the Historic Center of São Luís-MA, through urban morphology and land use (2022).

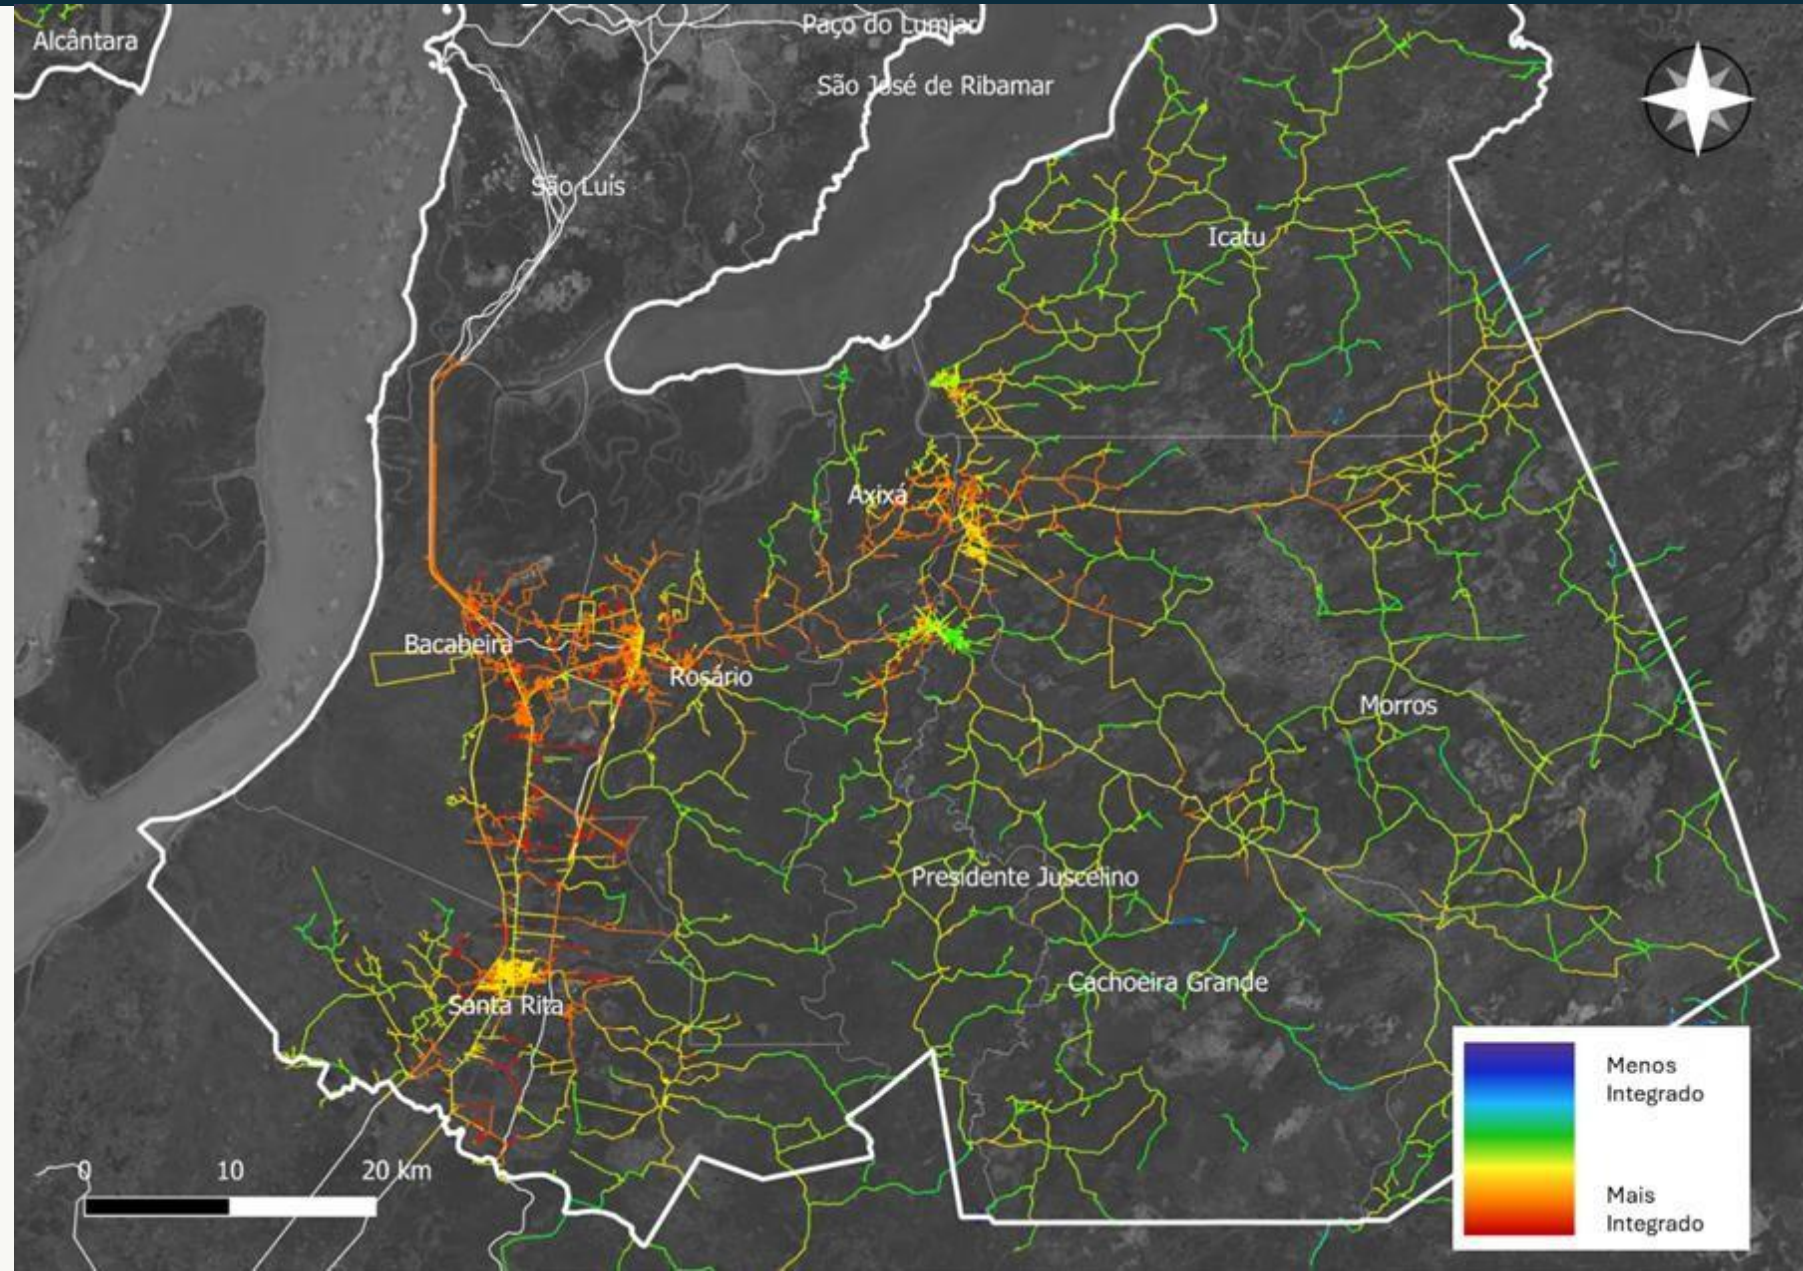

Road Analysis Metropolitan Region São Luís

Use of GIS tools and
Space Syntax to integrally
analyze the road system of
the entire São Luís island.

Road Analysis Metropolitan Region – Mainland

Use of GIS tools and Space Syntax to integrally analyze the road system of the RMGSL municipalities located on the mainland.

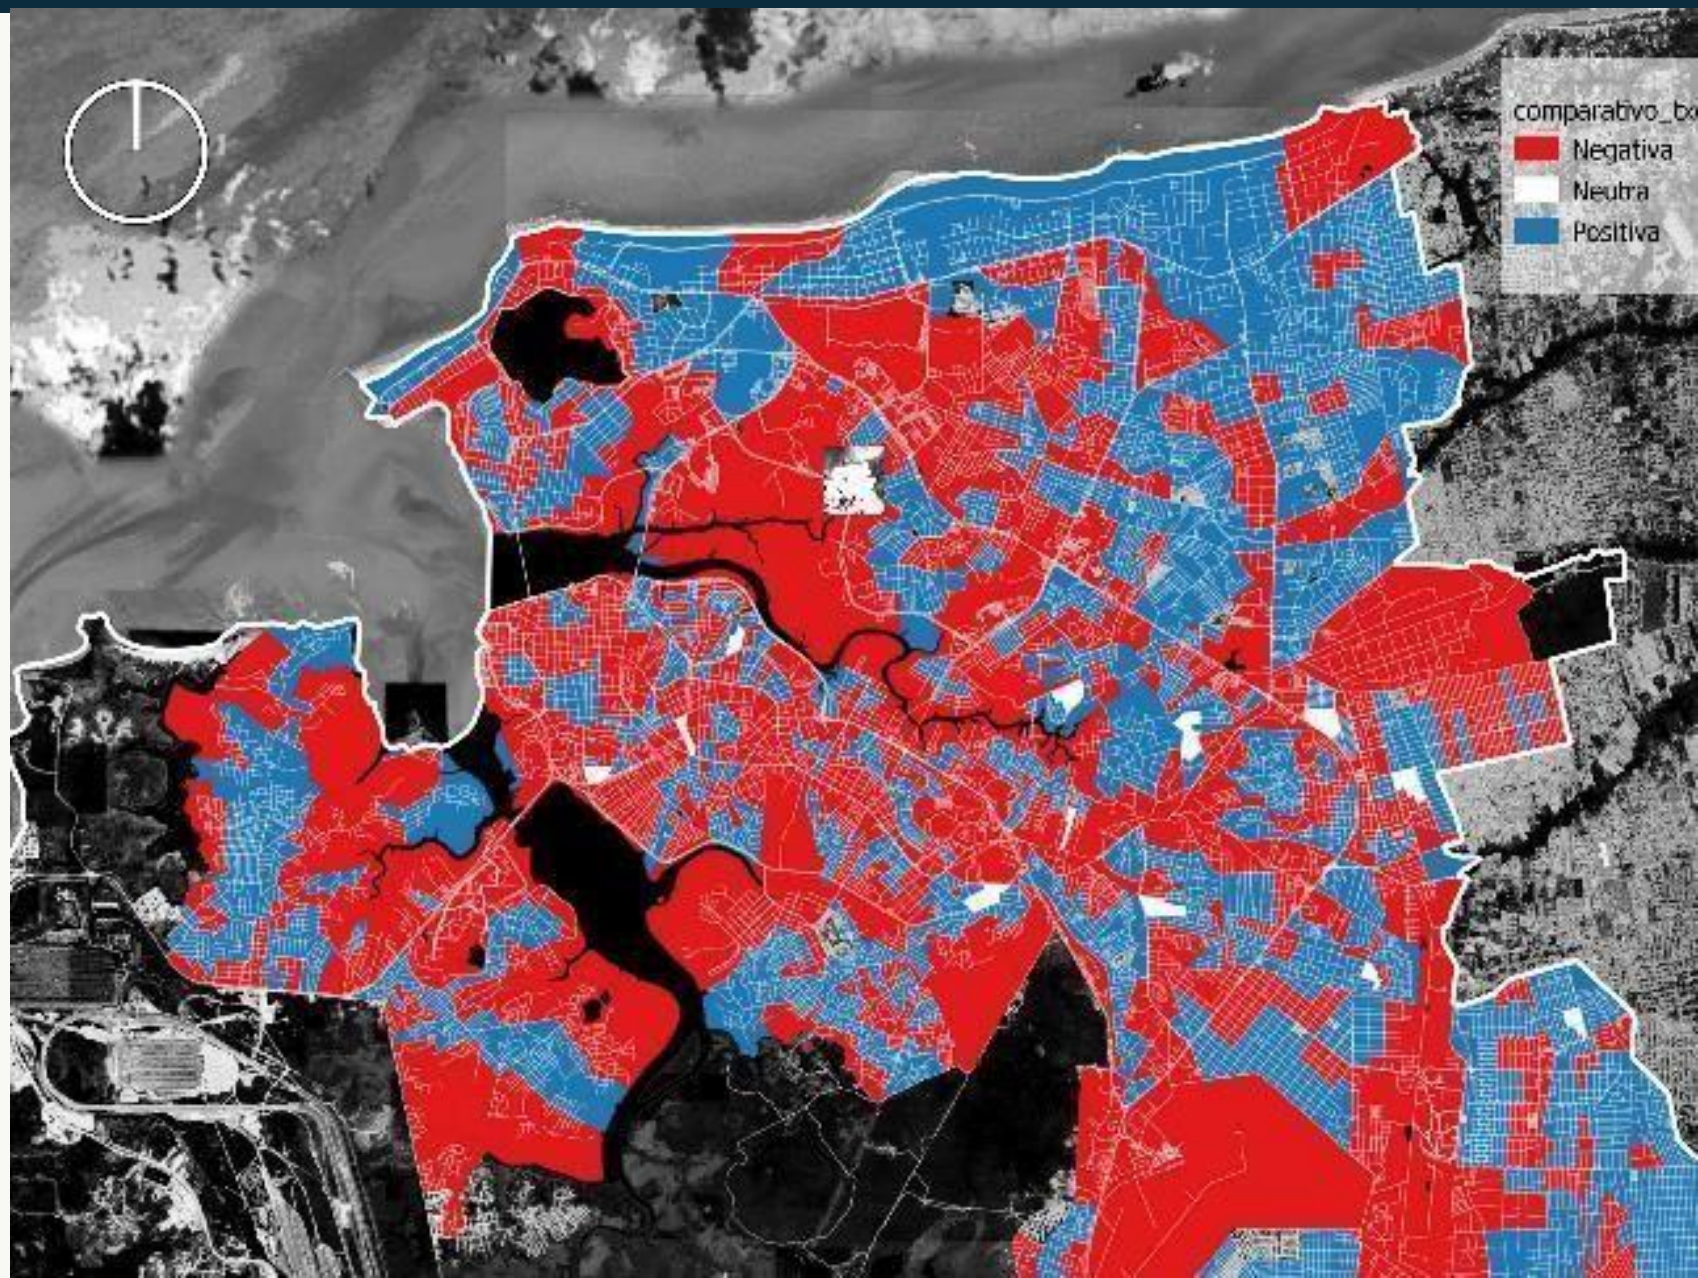

Geoprocessing

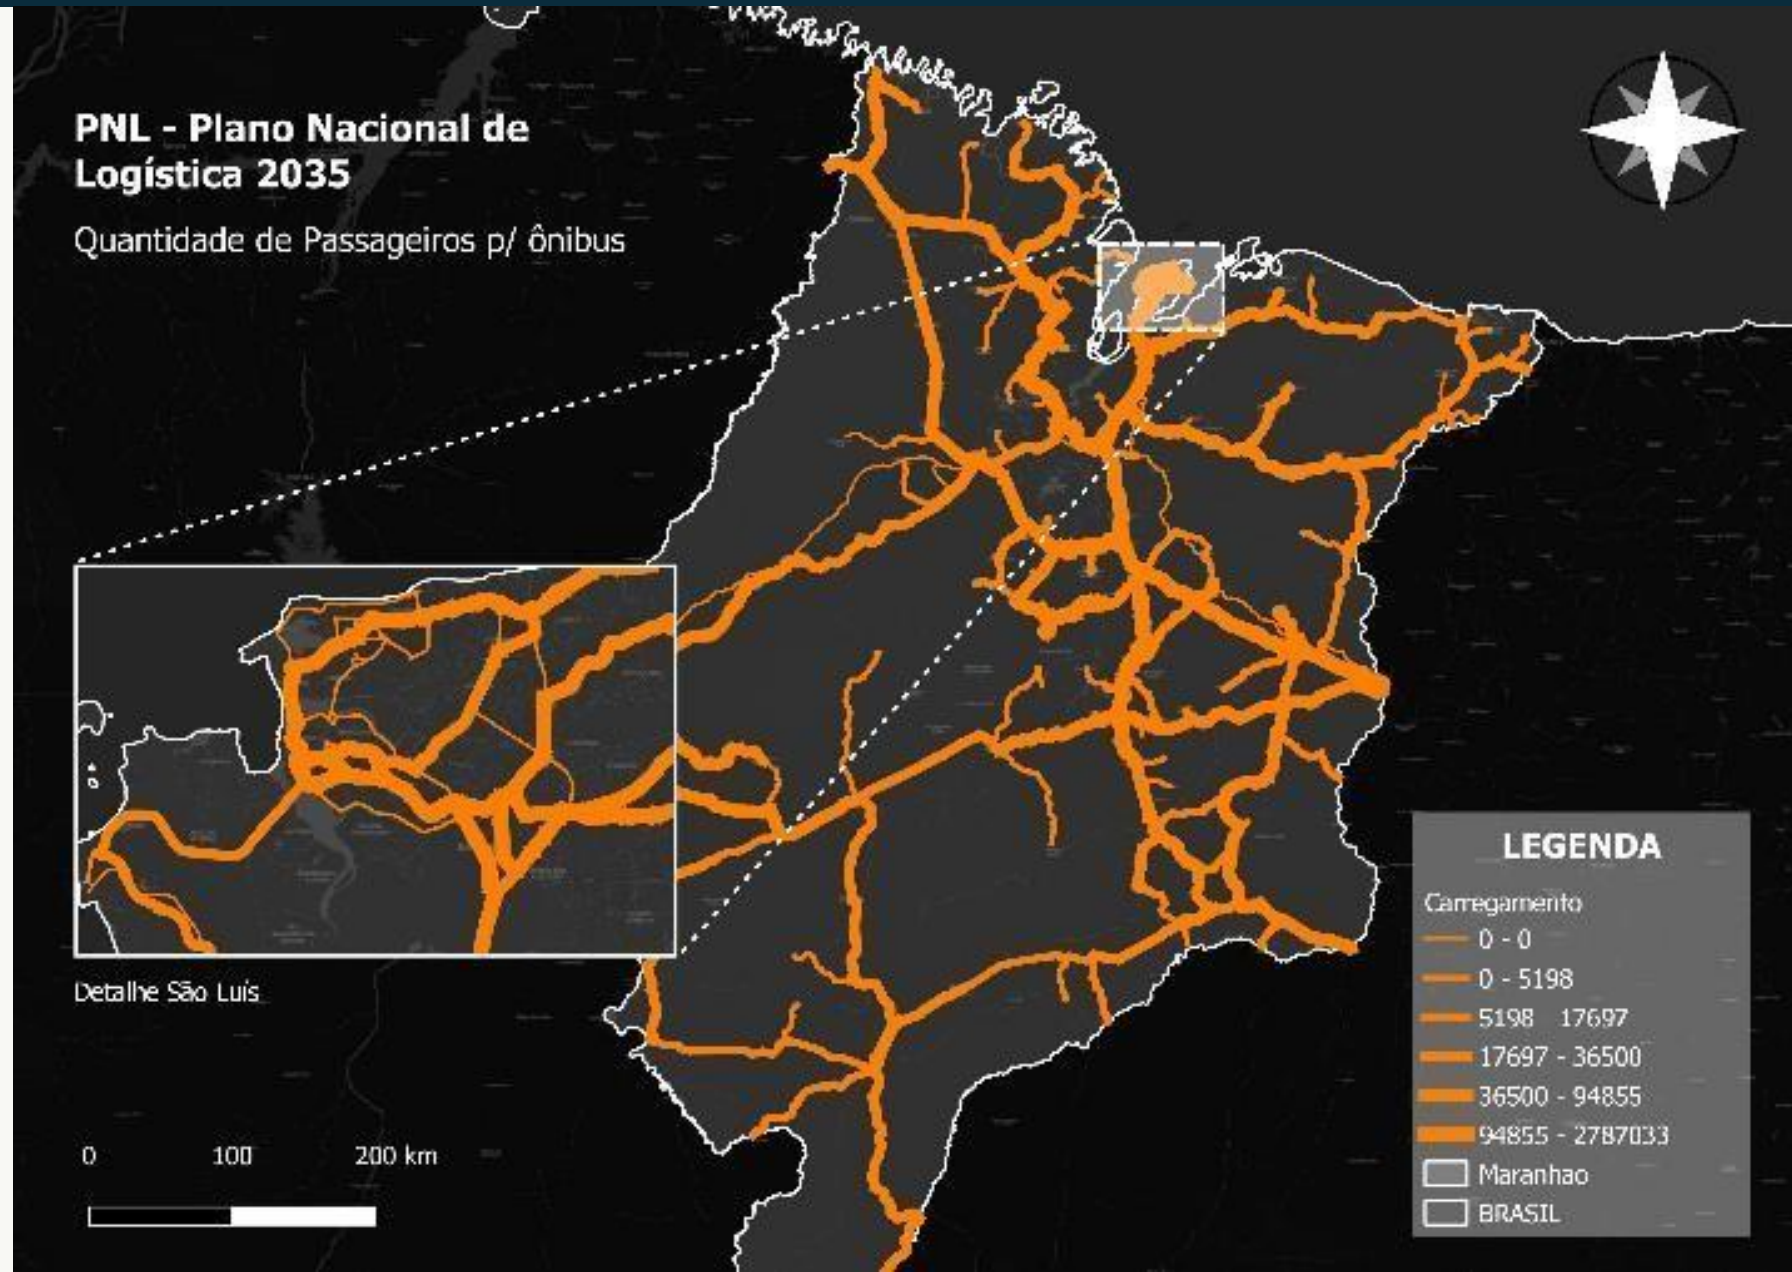

Urban Growth Simulation

Use of Geographic Information System to represent urban growth simulation. São Luís-MA (2023).

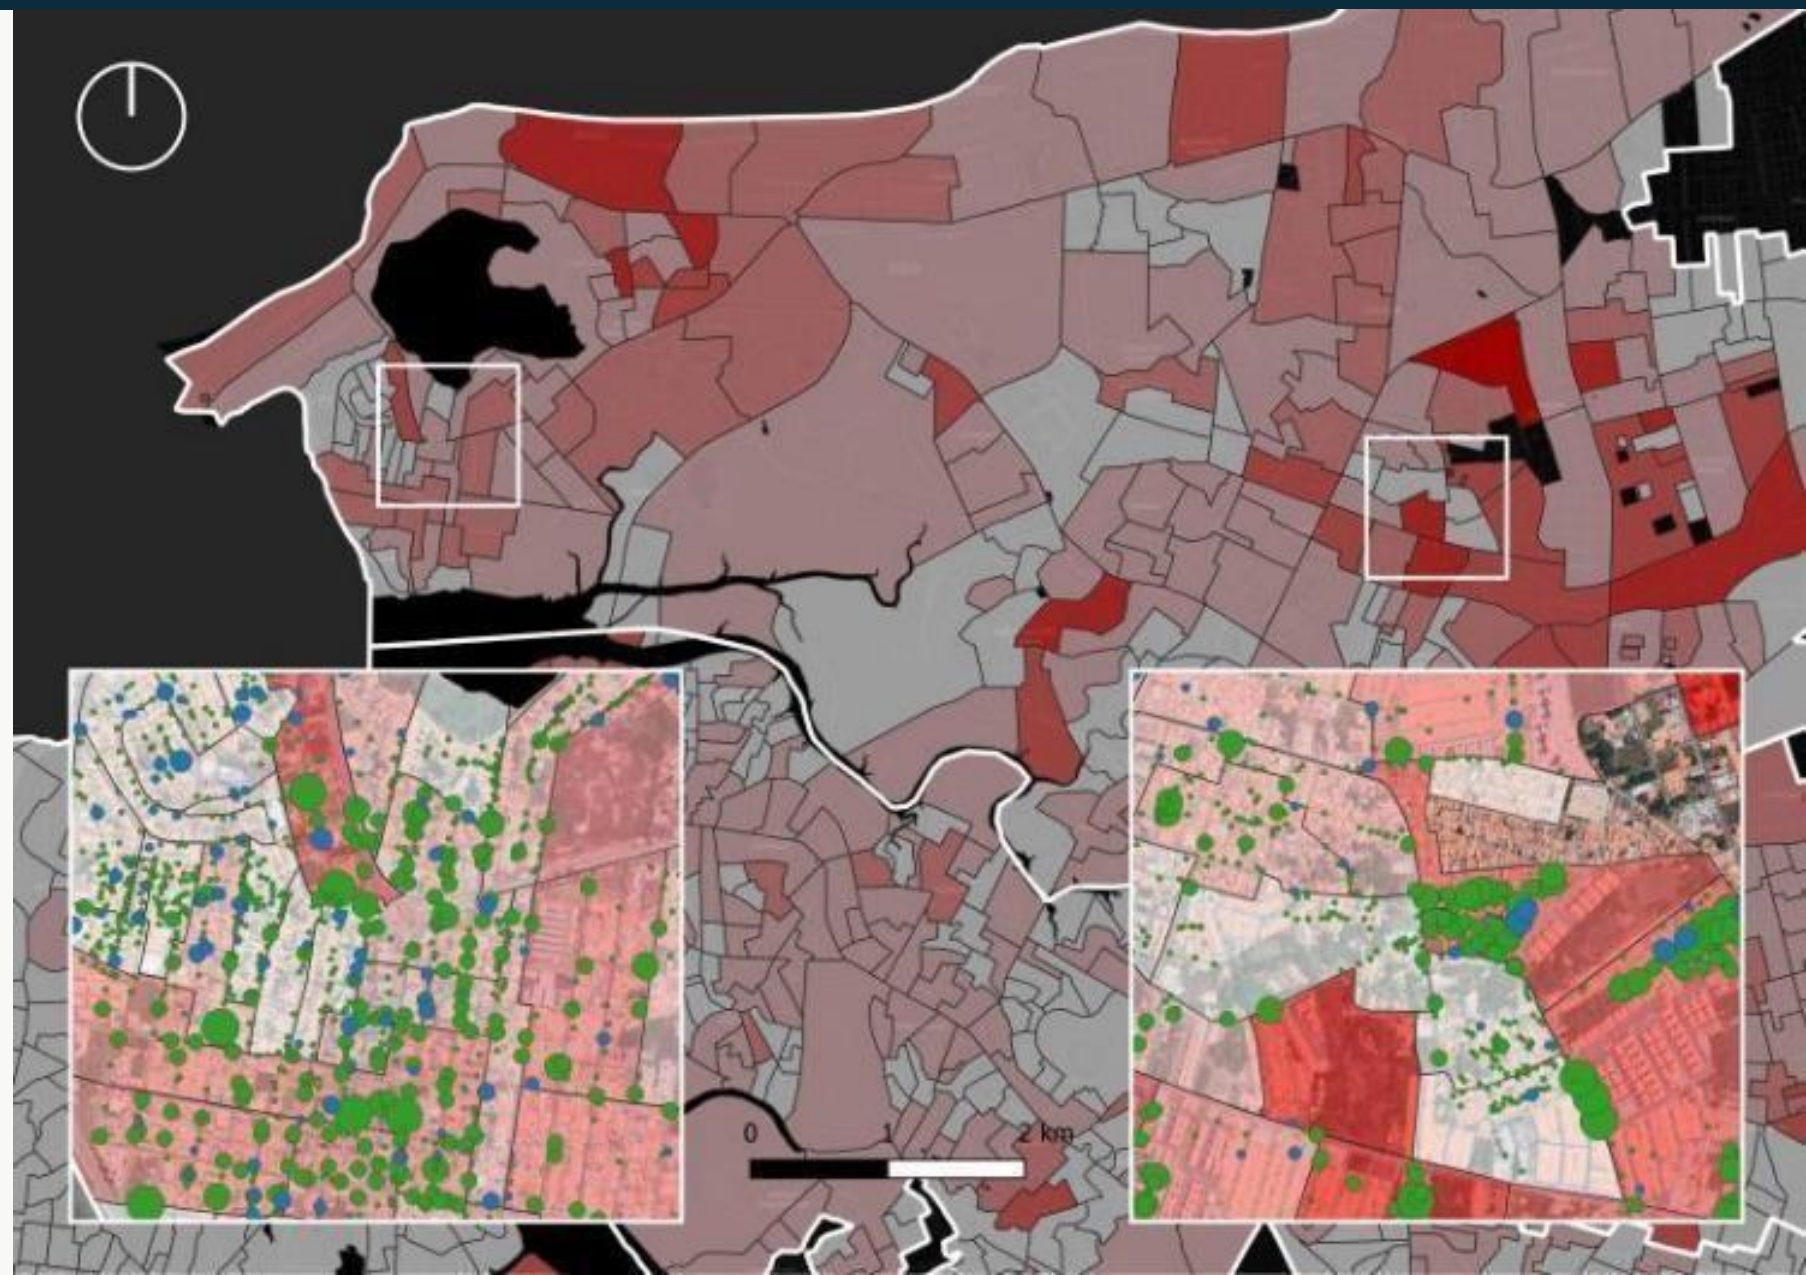

Road Loading GIS

Road loading
representation for
Maranhão highway
transport. Cargo and
Passengers. MA
(2023).

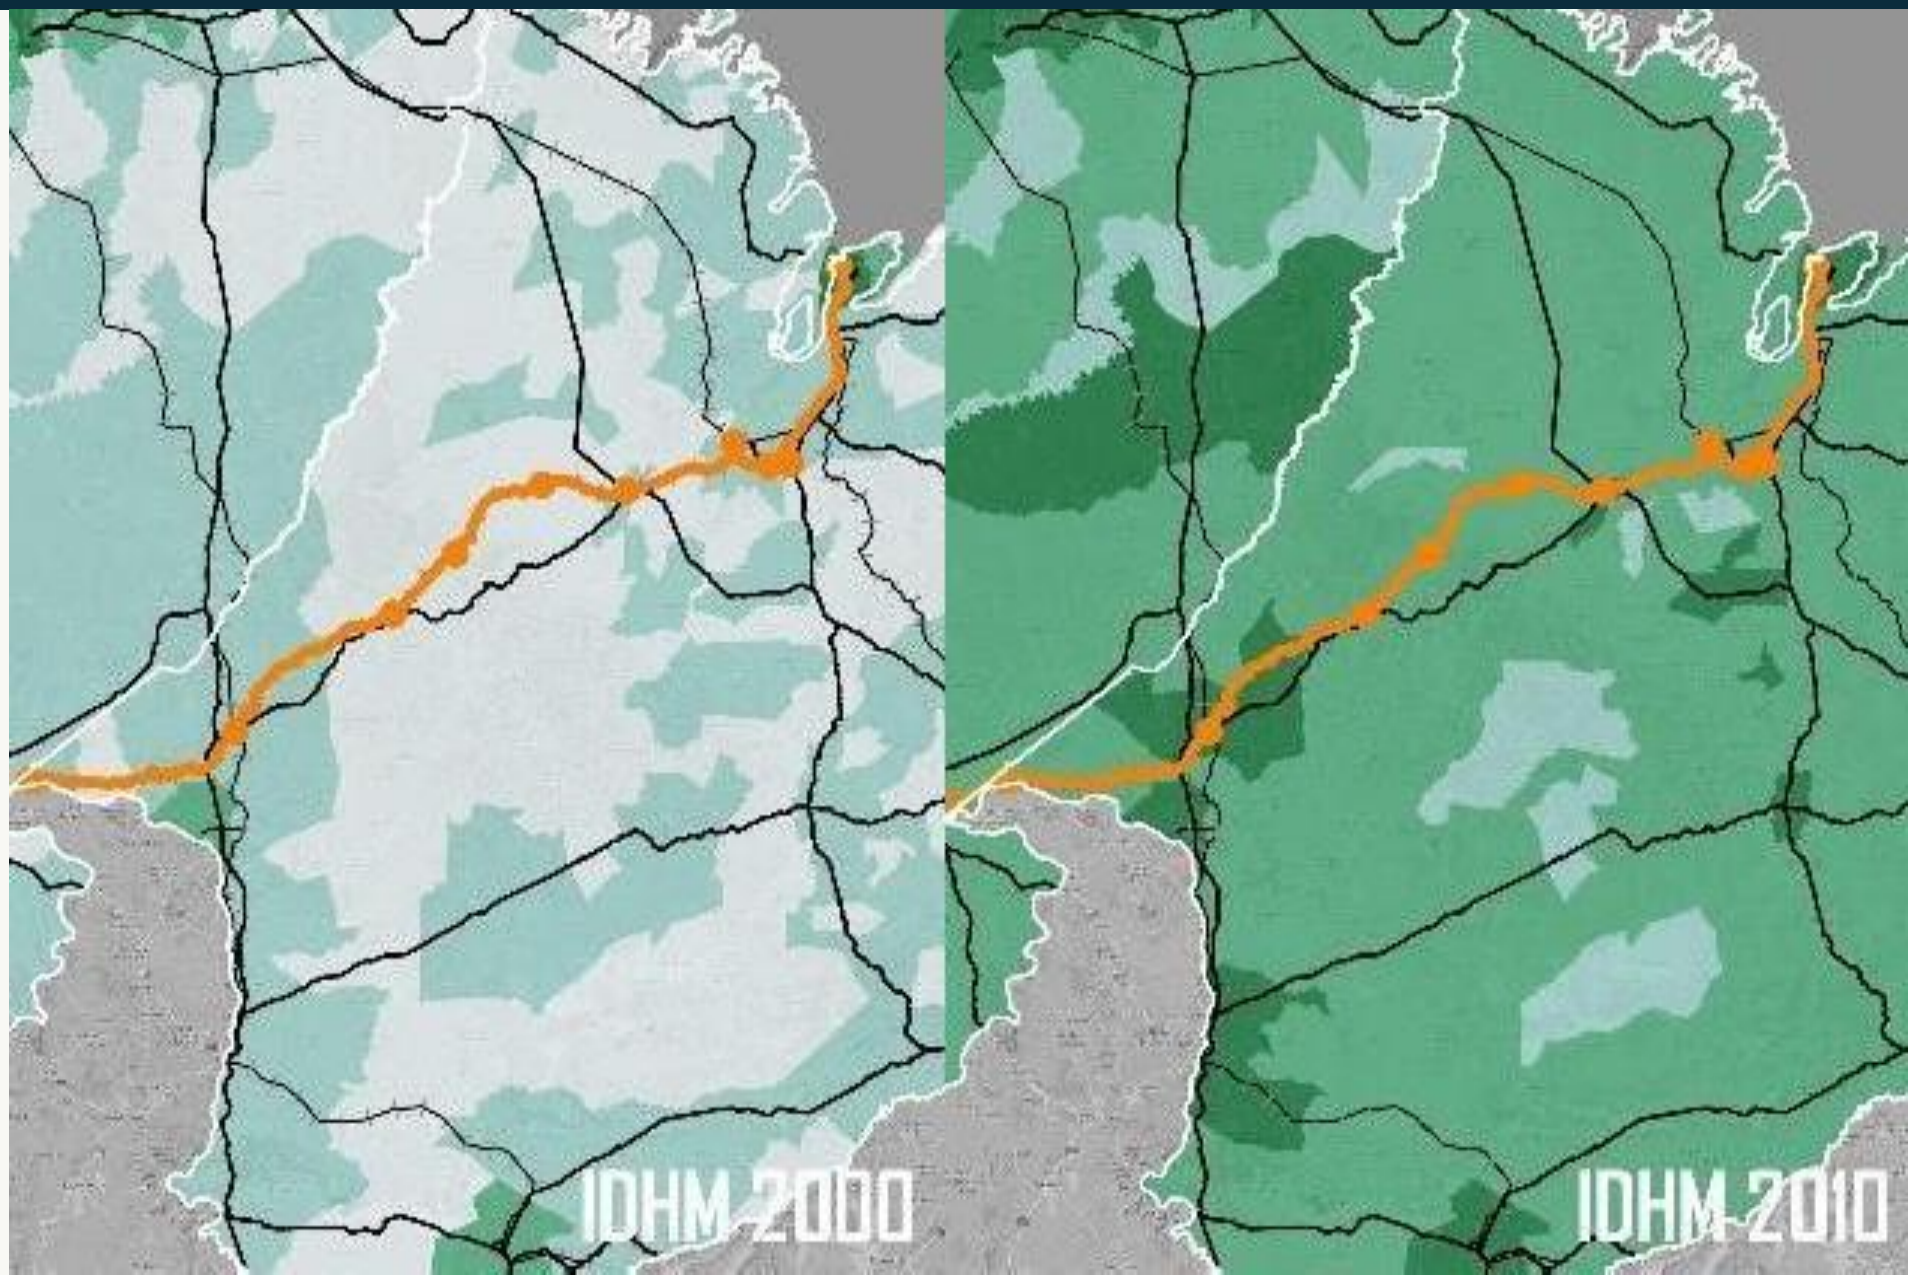

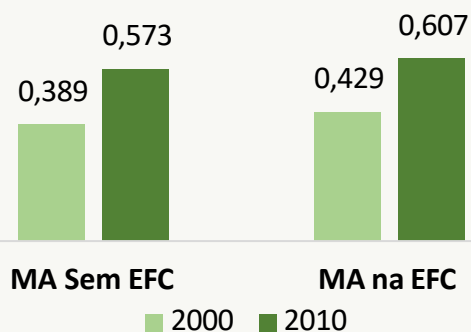

GIS Use in Sanitation

Use of GIS tools for visualization of Sanitation data to define the best collection strategy (2022).

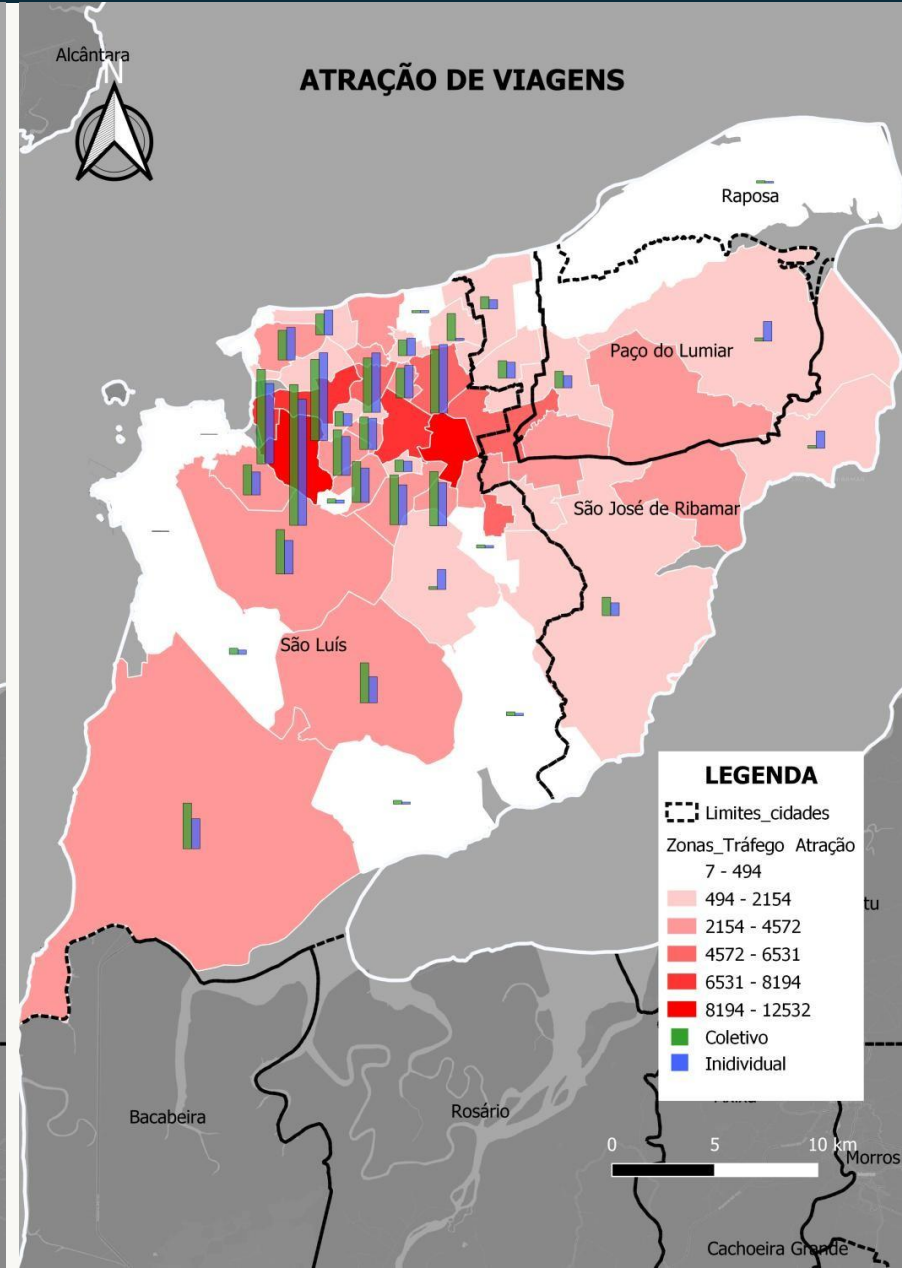

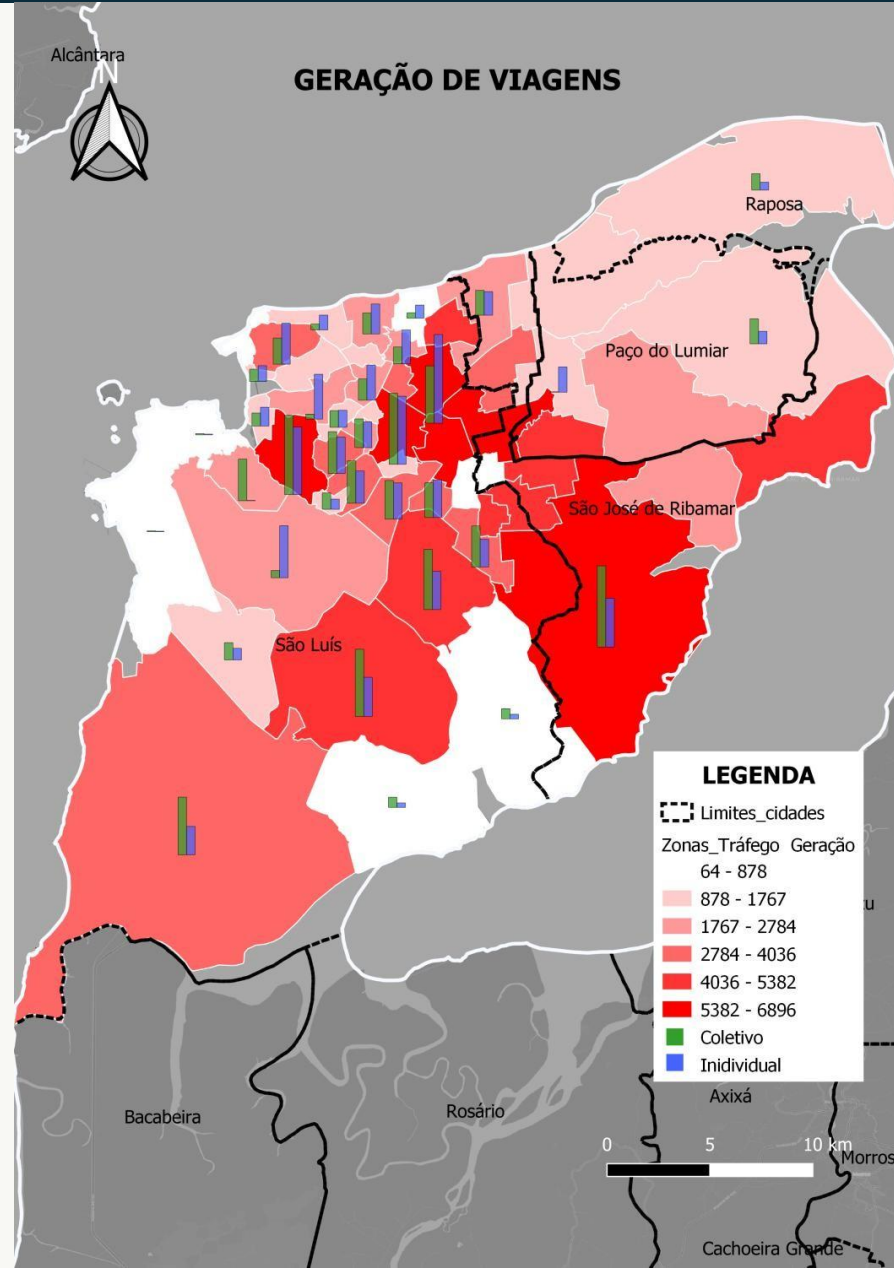

Social Impact of the EFC

Use of GIS tools to
analyze the evolution
of the HDI between the
2000 and 2010
censuses of
municipalities along
the Carajás Railroad.

Trip Generation and Attraction Representation

Use of GIS tools for analysis of trip generation and attraction data for the São Luís island. Planob 2017 data

The background of the slide is a faded, light gray aerial photograph of a coastal region. It shows a complex network of roads, a river or canal winding through the landscape, and various land parcels. The top half of the image is partially obscured by a dark blue horizontal band.

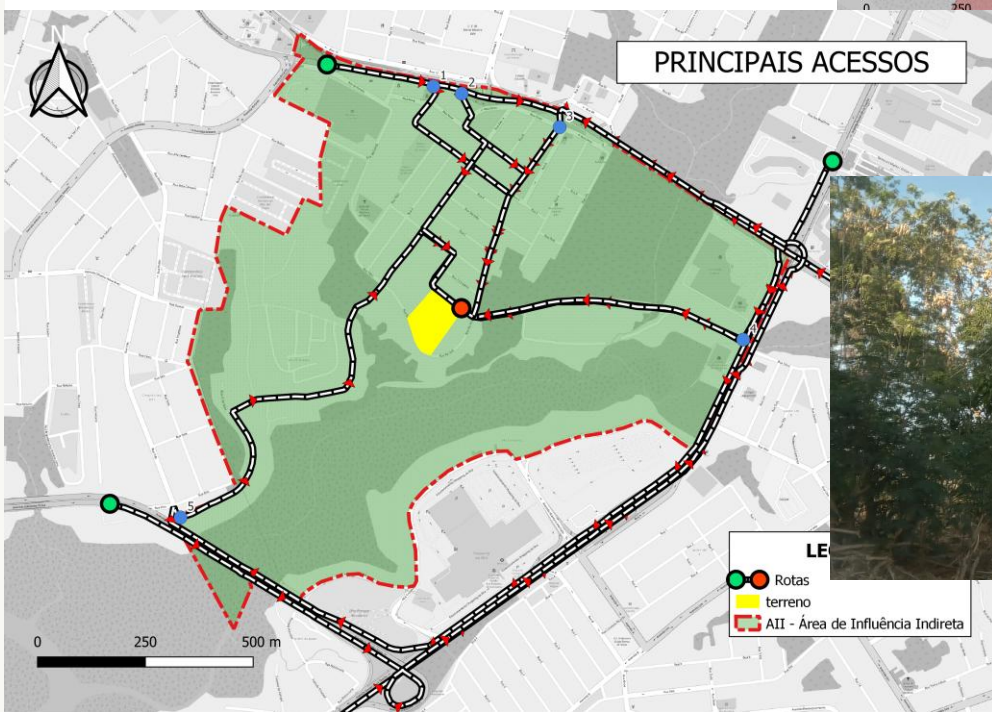

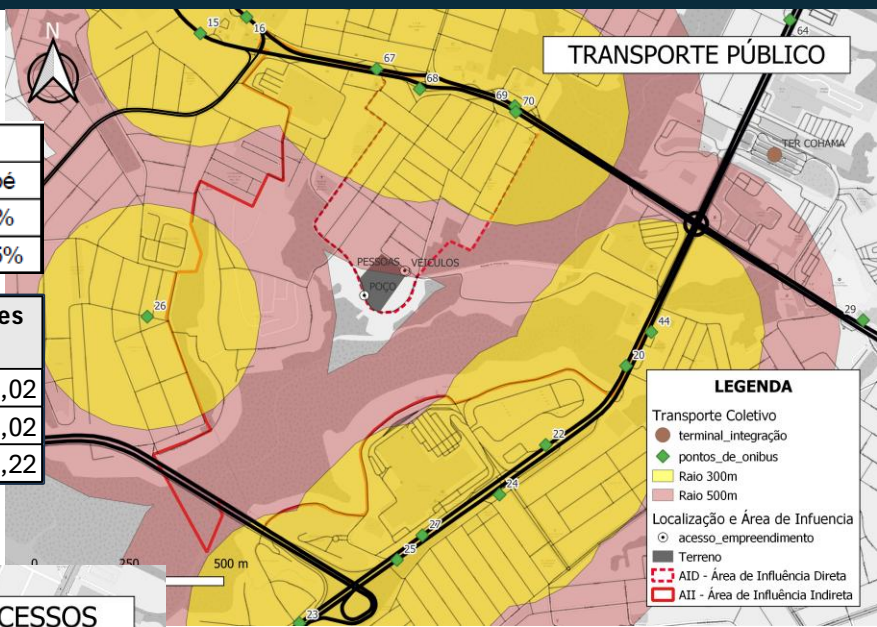

Development Impact Studies

Traffic Impact Report – TIR

Assessment of the impact of real estate developments through models that estimate trip generation and their impacts on the current road network

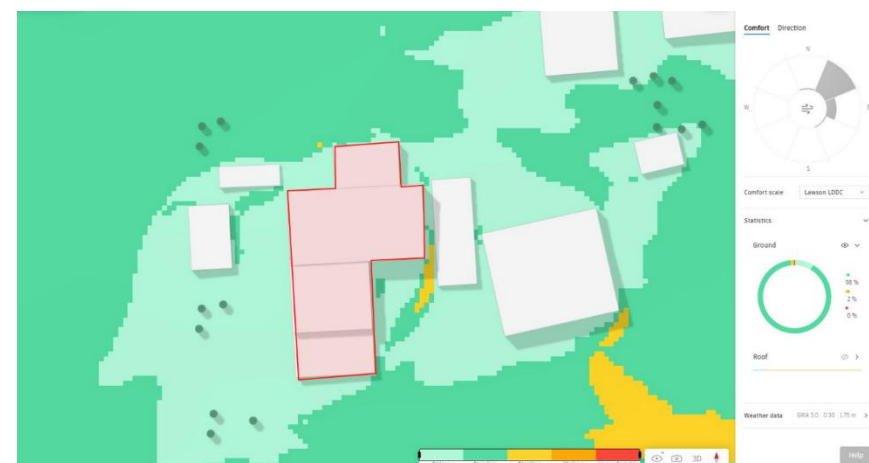

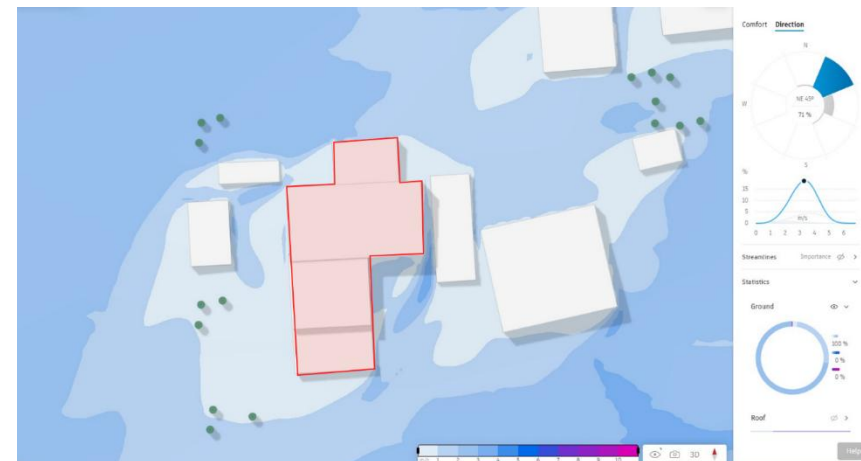

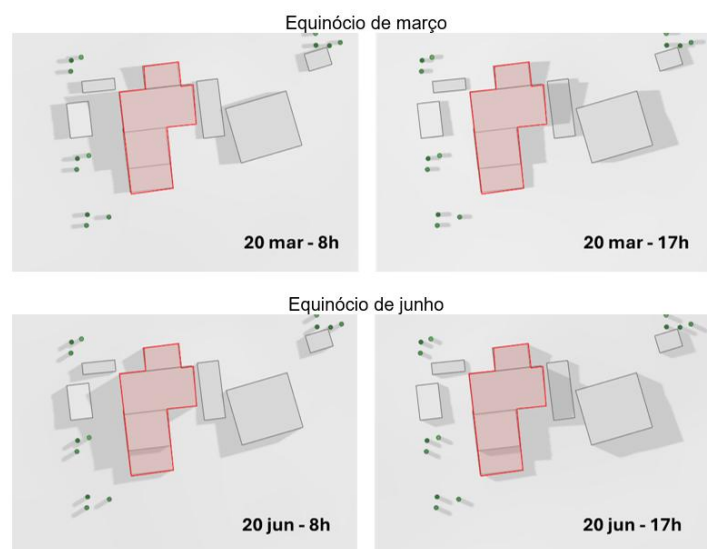

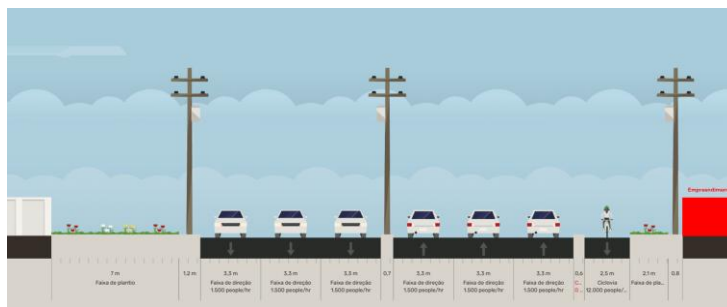

Pico	Equação de Geração	Atração % / Produção %	Divisão Modal %			
			Auto	Moto	Ônibus	A pé
Manhã	0,3543UH	15% / 85%	52%	12%	11%	25%
Tarde	0,3532UH	68% / 32%	48%	10%	13,5%	28,5%

Período	Viagens Geradas	Automóveis (70%)	T Público (20%)	Pedestres (10%)
Manhã (7h-9h)	200	140,04	40,04	20,02
Tarde (16h-18h)	230	161,04	46,04	23,02
Dia Todo	2500	1750,44	500,44	250,22

Neighborhood Impact Study – NIS

A more in-depth study of the impacts of a development that examines various aspects such as ventilation, lighting, waste generation, noise generation, etc.

TRECHO DA VIA	No de Faixas	Sentido	Capacidade	Vei/equiv	Incremento	V/C	NS
MA-203 - Calhau	3	Único	4.131	979,5	1.175,4	28,5%	B

The background of the slide is a faded, light-colored aerial photograph of a coastal region. It shows a complex network of roads, a river or canal winding through the landscape, and various land parcels. The map is oriented horizontally, with the coastline on the right side.

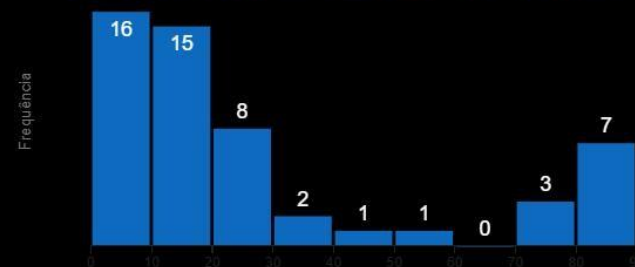

Other Tools/Techniques

Accident Analysis

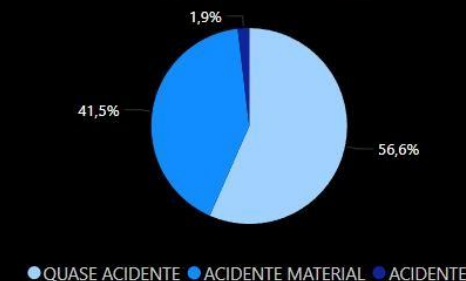

Applying Business Intelligence techniques to analyze accident data involving buses and vans operating the Headquarters-Residence employee transportation route. São Luis-MA (2021).

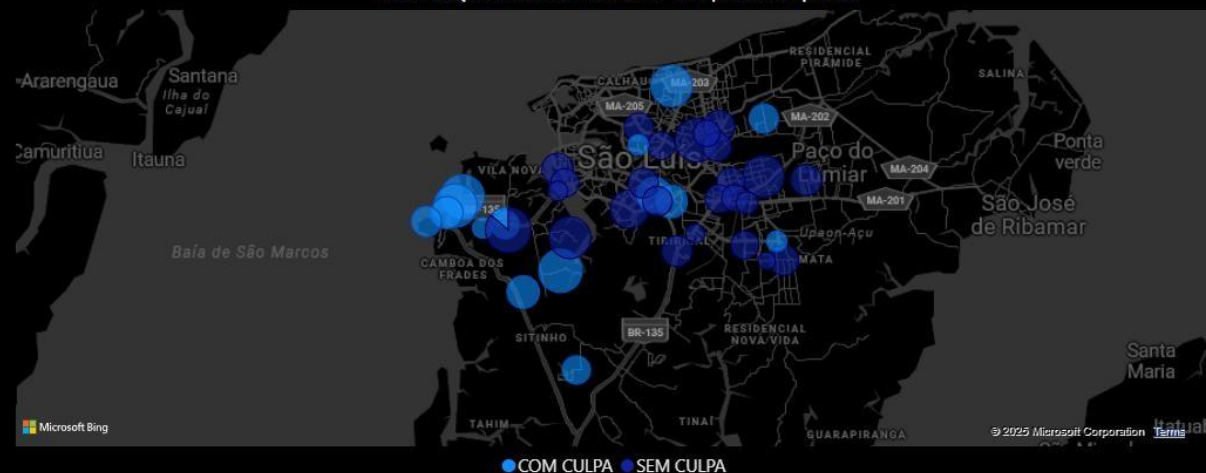

Histograma de "tempo de empresa" (meses) dos motoristas

Classificação da Ocorrência

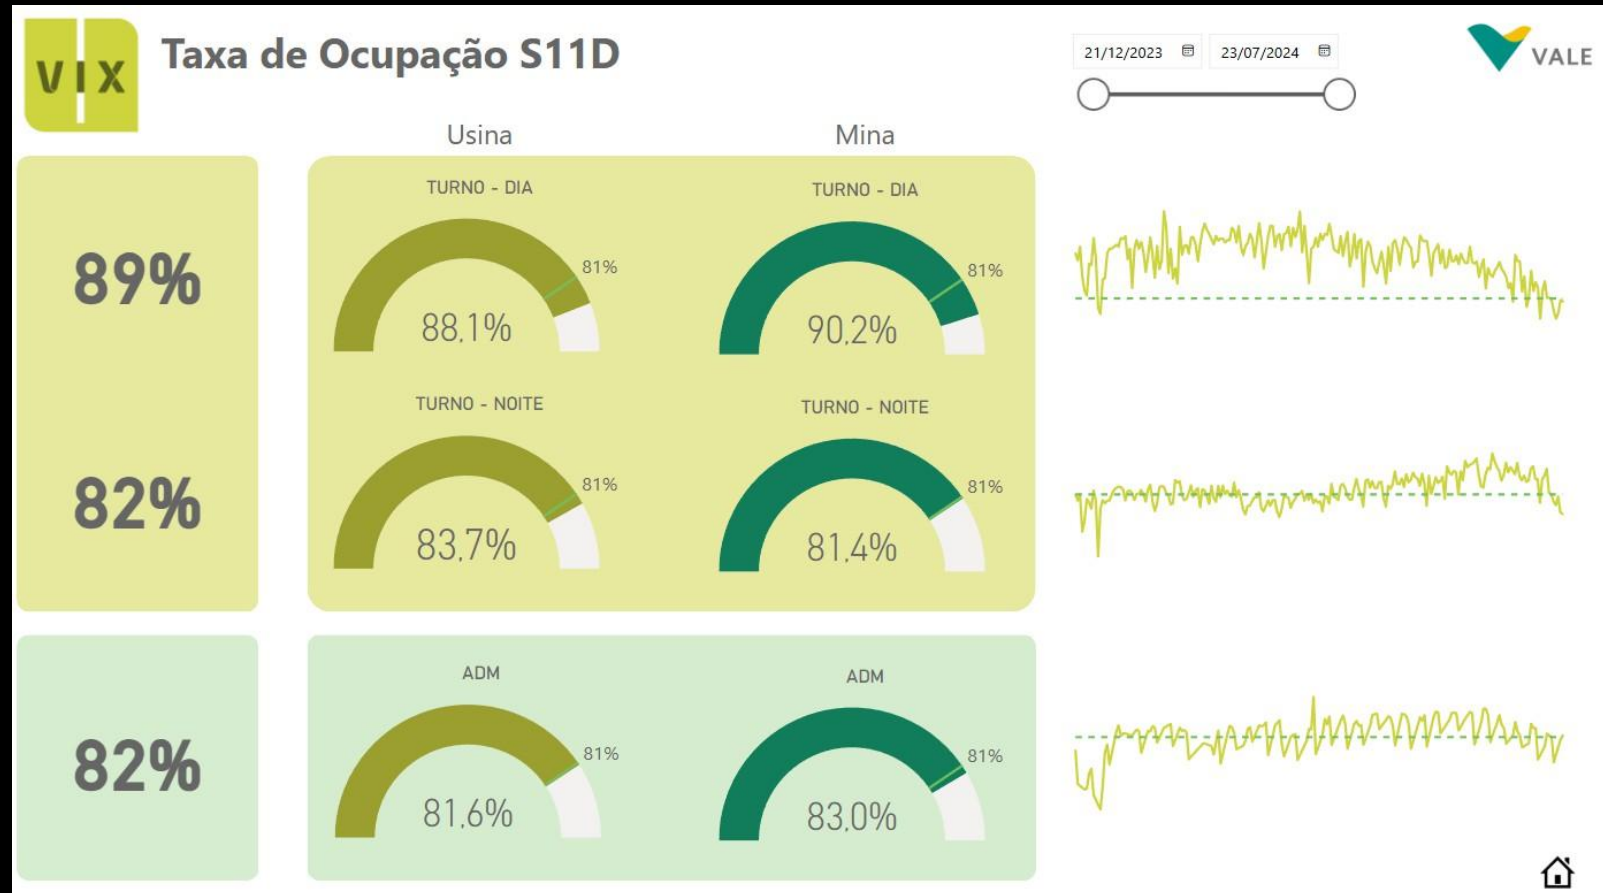

Localização das ocorrências / Tempo de Empresa

Shuttle Dashboard

Development of
Dashboards for
monitoring and analysis of
performance indicators
for the employee
Headquarters-Residence
transportation service
(2024)

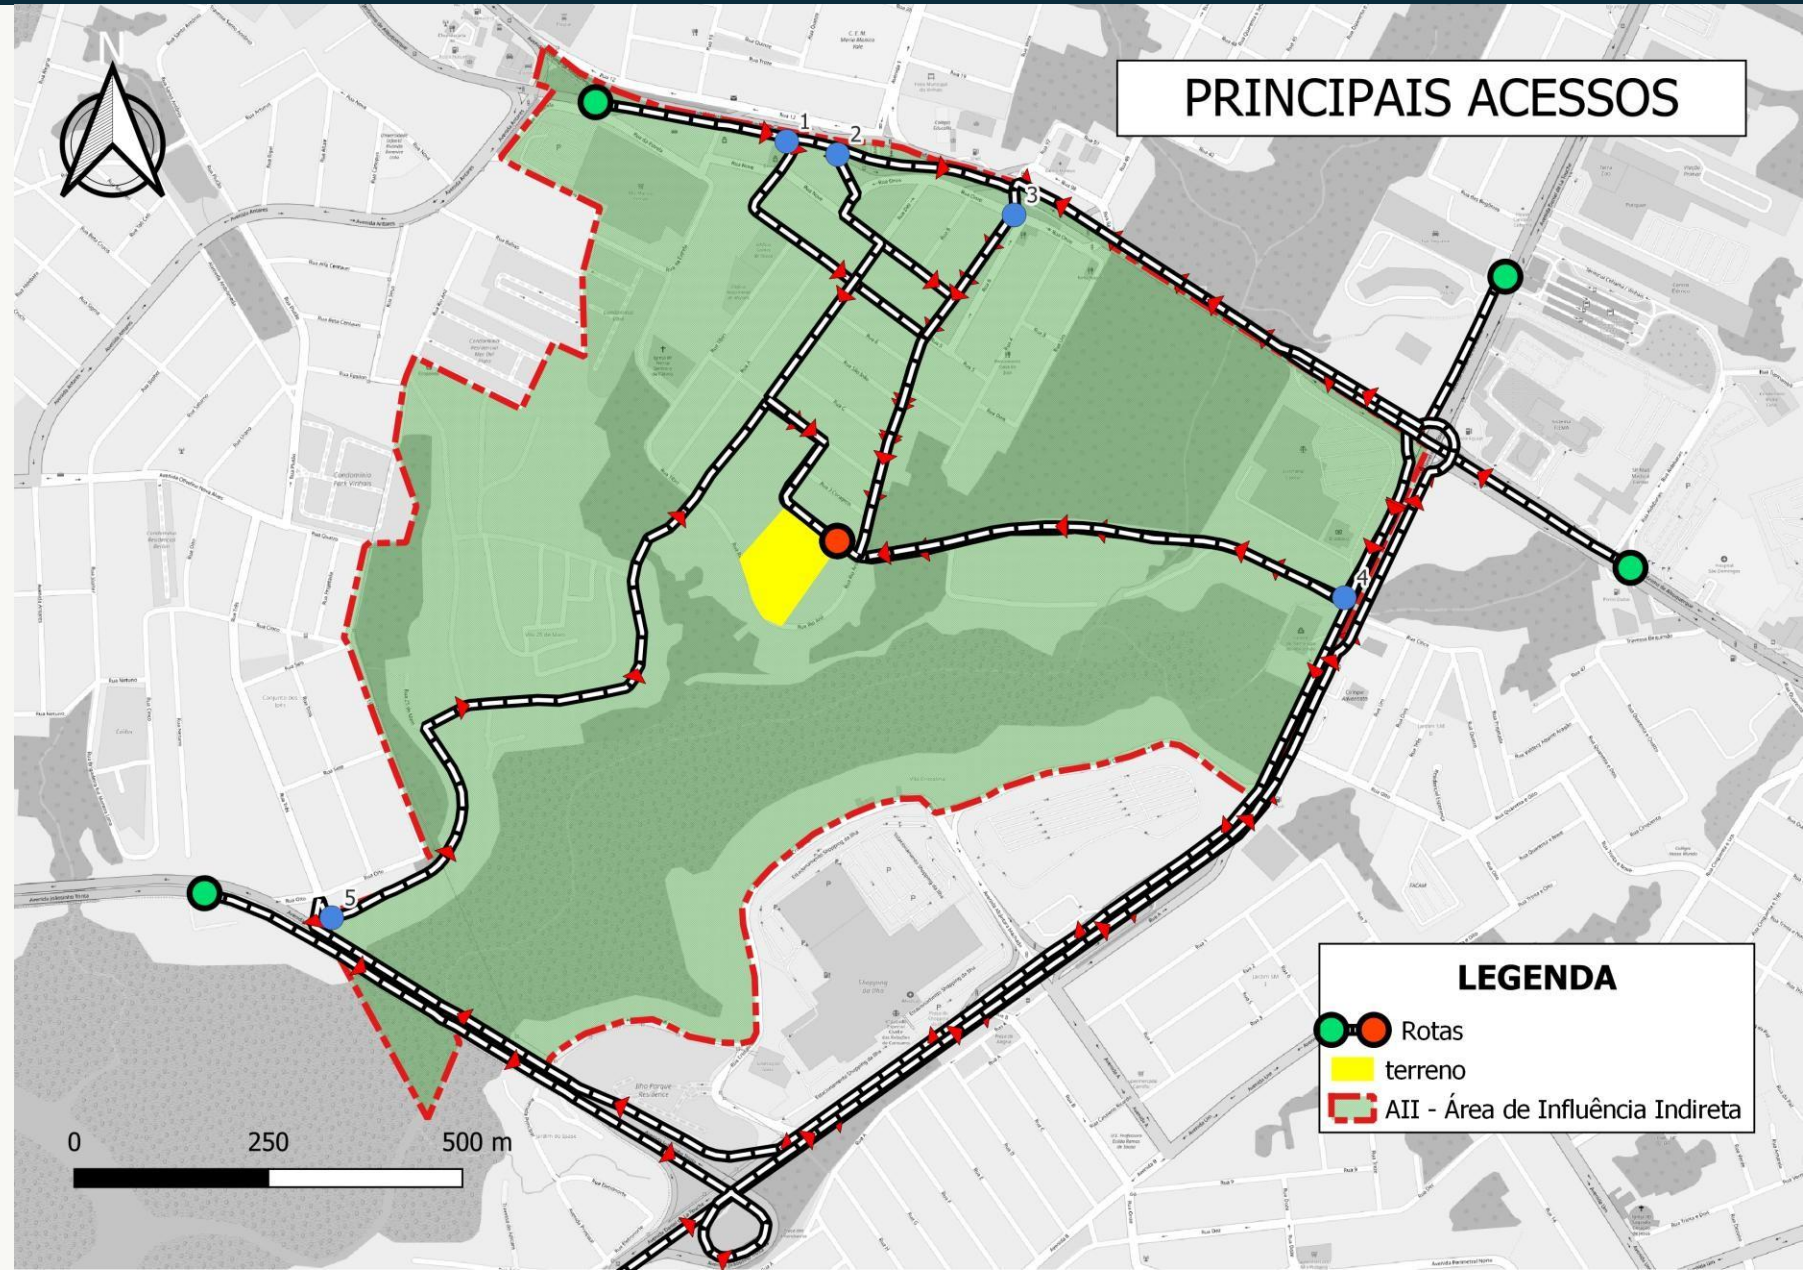

Road Intervention

Road intervention proposal at
the Calhau roundabout
(2022)

Traffic Impact Report (TIR)

Preparation of a TIR to
assess the impact of a
real estate development
on the regional road
network (2024).

Urban Intervention Project in São Luís/MA
